GEOGRAPHIC COORDITES

LOS ANGELES (Los Angeles), a city in the southwestern United States, in the state of California. It is located in the southern part of the Pacific coast of the country, on a narrow coastal lowland bordered by the mountains Santa Monica, San Gabriel, Santa Ana, etc.; in a seismically active zone. The largest city in California, the 2nd most populous city in the country (after New York).

TOTAL AREA

Originally, the settlement of Yangna [en] was located on the site of today's city (translated from the Tongva language — "the place of the poisonous oak") [10], in which about 300 people lived [11]. The population was engaged in weaving, canoe construction and fishing. The head of the settlement was the chief responsible for the storage of religious objects, settlement of disputes and collection of taxes [12]. The belief of the Indians referred to polytheism [13]. The Indians spoke dialects of the Takian language group and belonged to the Tongva people [14]. In the early 1800s, they were integrated into the Spanish mission system. In 1833, as a result of secularization, the Tongva dispersed throughout Southern California. Up until the 1860s, they represented a visible ethnic community [15].

POPULATION

The median household income in Los Angeles is \$96,416 with a poverty rate of 16.89%. The average cost of rent in recent years is \$ 1,523 per month, and the average cost of a house is \$670,700. The average age in Los Angeles is 35.6 years, 34.7 years for men and 36.5 years for women.

The official US census conducted in 2020 showed that 3,898,747 people live in Los Angeles.

Los Angeles is located in one of the most ethnically diverse counties in the United States. The City of Angels is a global city, and the Los Angeles Unified Statistical Area (CSA) is the third largest in the world after Greater Tokyo and New York. It is also the 66th most populous city in the world, and the capital region is the 18th largest.

RELIGION

The main religions in Los Angeles are Protestant, Roman Catholic, Buddhism, Judaism, Islam, Hinduism. There are quite a lot of neo-Pagans in the city, as well as parishioners of the Church of Jesus Christ of the newest Saints, many adherents of mystical religions and Scientologists. Evangelical televangelists are also popular here.

GOVERNMENT

- **The elected government consists of the Los Angeles City Council with 15 city Council districts and the Mayor of Los Angeles, which operate under the leadership of the mayor–council government, as well as several other elected positions. The current mayor is Eric Garcetti, the current city attorney is Mike Feuer, and the current city controller is Ron Halperin.**
- **In addition, there are many departments and designated officials, such as the Los Angeles Police Department (LAPD), the Los Angeles Fire Department (LAFD), the Los Angeles Department of Transportation (LADOT), the Los Angeles Public Library (LAPL), the Los Angeles Department of Public Works (LADPW), and the Los Angeles Department of Water and Energy (LADWP).**

TIME

- **The current local time in Los Angeles (California, USA) is accurate to the second on the server of the exact current time. Find out the exact Los Angeles time or the time difference between Los Angeles and other cities online. The time zone in Los Angeles is UTC-8 (GMT-8). The exact time with seconds in Los Angeles is now.**

AREA CODER

- **The city of Los Angeles is located in the Southern California basin adjacent to the Pacific Ocean, and extends through the Santa Monica Mountains into the San Fernando Valley, covering a total of about 469 square miles (1,210 km²). It is the county seat of Los Angeles County, which is the most populous county in the United States with a population of just over 10 million in 2020**

CLIMATE

- **The climate of Los Angeles is mild to hot all year round, mostly dry. It is classified as a Mediterranean climate, which is a type of dry subtropical climate. It is characterized by seasonal changes in the amount of precipitation - dry summer and winter rainy season. According to the modified Köppen climate classification, coastal areas are classified as Csb and inland areas are classified as Csa.**
- **The Los Angeles area has a microclimate where daytime temperatures can vary by as much as 36°F (20°C) between inland areas such as the San Fernando Valley or San Gabriel Valley and the Los Angeles coastal basin.**

FOUNDATION

- **The history of Los Angeles began in 1781, when 44 settlers from New Spain founded a permanent settlement on the territory of the current center of Los Angeles on the instructions of the Spanish governor of Las California Felipe de Neve and with the permission of Viceroy Antonio Maria de Bucareli. After the sovereignty of Mexico passed to the United States in 1848, great changes occurred after the completion of the Santa Fe railway line from Chicago to Los Angeles in 1885. Old industries have declined, including agriculture, oil production, military and aviation, but tourism, entertainment and high technology remain strong. Over time, droughts and forest fires have increased in frequency and have become less seasonal and more year-round, which further strains urban water security**

SYMBOL

- **The famous sign is located on Mount Lee at a 490-meter altitude above sea level, and is securely guarded by a video surveillance system and motion detectors (when approaching closer than 45 m, an alarm is triggered and the police are automatically called). But tourists have a chance to admire the inscription and take a lot of photos – the best views of the inscription open from the observation deck of Griffith Park.**
