

Hello  
Autumn

**Winter** is the season having the shortest days and the lowest average temperature. There are 3 winter month; December, January and February

**Spring** is one of the four temperate seasons, the transition period between winter and summer. Spring has 3 months; March, April and May.

The nature is awake from long winter sleep. It is warm and pleasant in spring.

**Summer** is the hottest of the four seasons. It is the transition period between spring and autumn. Summer has 3 months; June, July and August.

**Autumn** is know as  
fall in American  
English. It marks  
the transitions from  
summer into winter.

Autumn has 3  
month; September,  
October and  
November.

In the fall leaves on trees start to change the color. From green they turn to reds, yellow, crimson. Look what multi-coloured wood happens in in the fall!

Leaves change the color because with approach dawn upon the sun shines ever less,  
and they do not have not enough solar color to remain green.

One step at a time days become shorter, and nights longer. In the evening quickly starts to darken. Often by the end of walk in the street already at all it is dark.

Together with colds rains in the fall begin. Even more often it drizzles an autumn rain.

Impulses of a wind break yellow, crimson and lilac leaves which cover the ground with a motley carpet from trees..

One step at a time trees lose all leaves, their branches remain at all naked. There comes a late fall.

Recent in the fall the sun looks out seldom, days become cloudy. You see what dark sky on this picture?

In the fall many birds depart on the south - to the warm countries. They depart because in the fall and in winter very cold, birds have nothing to eat - insects and plants - a grass and leaves of trees disappear.

In the fall animals start to prepare for winter.

Many animals in the fall as well as people start ' to be warmed ' - their wool becomes more dense and is more fluffy. With such dense and fluffy wool they precisely will not freeze in winter.

People reap a crop. In gardens and kitchen gardens.

A fall very beautiful season!
