- Summer is the greatest time for all of students. It is time to relax and do what you want.

- But some students are faced with a “problem” like practice. Because at first I want to talk about my summer practice on camp “Polyanka”.

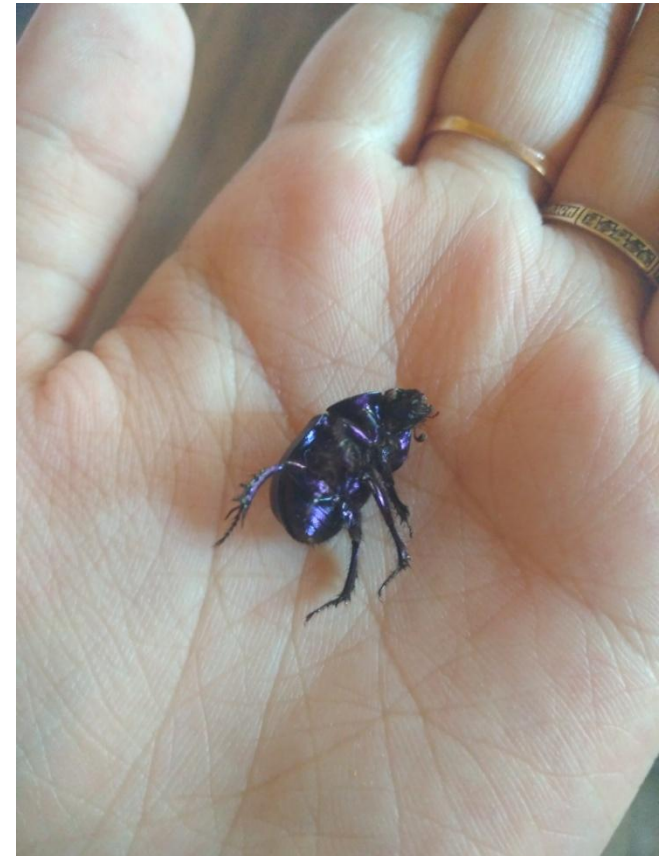

- It was interesting time for me and my friends. Together we lived a month in the countryside.

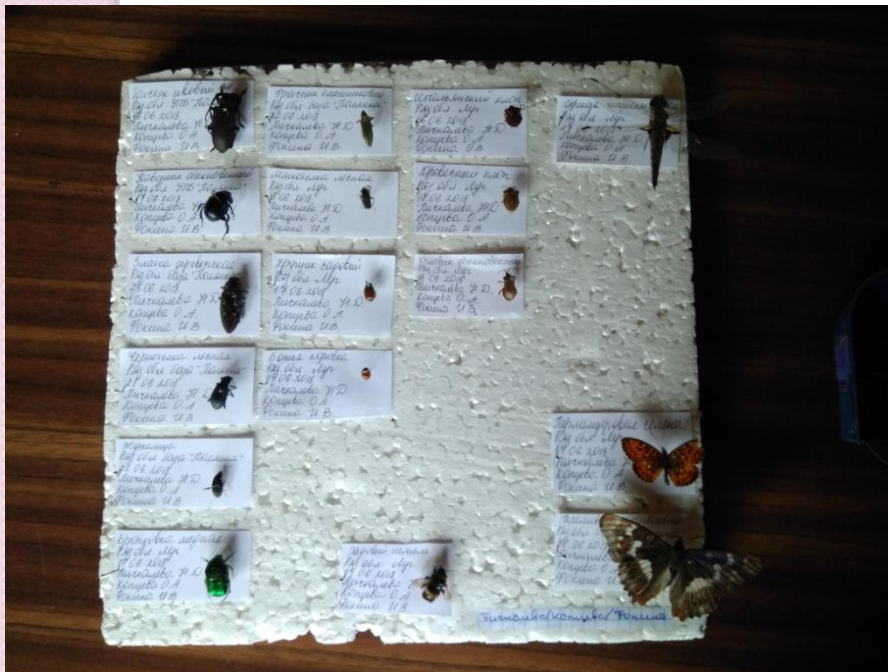

- At the beginning we caught various insects. How many beautiful beetles and butterflies we are surrounded by every day.

● Results of our work:

- Next time we were engaged in botany. Every morning we went on excursions and collected some plants for herbarium.

- Going to the forest was the most interesting and exciting. Huge trees stood like the kings of these place.

- Besides studying we rested and had fun together. Practice made us very close.

- The second part of summer I stayed at home with my family. All days I spent time with my little sisters, walked and played with them.

- Together with my family we went to the Konstantinovo and Poschupovo, visited the museum S. Esenin.

- In august I watched the starfall. It is so amazing! I even managed to make a wish.

- This summer was fulfilled with pleasant moments and it will remain forever in my memory.

*Thank you for
your attention!*
