As most people spend a major part of their adult life at work, job satisfaction is an important element of individual well-being.

What factors contribute to job satisfaction? How realistic is the expectation of job satisfaction for all workers?

Give reasons for your answer and give any relevant example or experience you have to support your answer.

Some people argue that it is more important to have an enjoyable job than to earn a lot of money. Others disagree and think that a good salary leads to a better life.
