

Some interesting facts from the  
Film Sherlock Holmes and Dr.  
Watson

While breakfast Watson , Holmes comes down to the boys . Note his collar.

# Part 1- introduction

While Watson was having breakfast Holmes came down to the boys to talk with them about the crime. Note his collar

And now note his collar again. Firstly pay attention to its form and secondly there is butterfly here.

Look at this photo. There are leaves on the trees. It is summer as you can see.

But here  
there are no  
leaves on  
the trees.  
And it  
doesn't look  
like  
summer!

Here dr. Watson is going to study pharmacology and he is going upstairs to his study.

And of course he isn't  
going there

Thank you for your attention!
