

Home

MIDCREST is well prepared for a world with a growing population and continuously evolving communications needs. We have a clear mission, focused strategy and strong culture, all of which we expect will support the creation of value over the long term for our company, our shareholders and society.

Our strategy is to use new technology-based innovation to deliver customer outcomes in growing areas of telecoms industry.

We believe innovation that produces breakthrough telecommunication technologies will be more important than ever in the telecoms industry in the coming years. We maintain substantial investment in development of our network aimed at areas of unmet communication need. Our product pipeline is fed by a research and development approach that uses the latest technology to advance the most promising projects.

About us

The MIDCREST's network is a combination of the industry-leading global VoIP network and developed TDM infrastructure. We offer 24x7 support services of our NOCs located in different places around the world. MIDCREST offers to its partners both international call completion (based on SS7 and SIP) and a variety of VoIP services. Incumbent carriers, mobile operators, and VoIP providers in amount above 100 of them are involved into our operations due to our low-cost infrastructure, quality management system and comprehensive voice portfolio to maximize profitability in their international voice operations.

We enable rapid direct IP interconnection with a wide variety of gateways, gatekeepers, session controllers, and SIP proxies from many of the leading equipment vendors. Also we accelerate market entry for voice over broadband services by providing fast and secure VoIP connections to the MIDCREST's network.
