

From hippie to yuppie

A **hippie** (or **hippy**) is a member of a liberal counterculture, originally a youth movement that started in the United States and the United Kingdom during the mid-1960s and spread to other countries around the world.

Hippies sought to free themselves from societal restrictions, choose their own way, and find new meaning in life. One expression of hippie independence from societal norms was found in their standard of dress and grooming, which made hippies instantly recognizable to one another, and served as a visual symbol of their respect for individual rights.

Hippies tended to travel light, and could pick up and go wherever the action was at any time.

Following in the footsteps of the Beats, many hippies used cannabis (marijuana), peyote, LSD, psilocybin mushrooms and DMT, while often renouncing the use of alcohol.

"Free love made the whole love, marriage, sex, baby package obsolete. Love was no longer limited to one person, you could love anyone you chose. In fact love was something you shared with everyone, not just your sex partners. Love exists to be shared freely. We also discovered the more you share, the more you get! So why reserve your love for a select few? This profound truth was one of the great hippie revelations."
