# CAP/SOLD FIELD

---

On the Cap/Sold field, Is the Cap segment the “Capacity” of the airplane and the “Sold” segment Is for the reserved and ticketed PNR’s. If you click on the Cap/Sold segment you reach to the seat map of the airplane. On this page you have the possibility to block and de-block seats.

You have to click the seats on which you have to make changes. If you will block seats, so you have to choose the “SEAT RANGE” to see the rows. Than just click on the seat or seats and choose them and click to **“BLOCK SEAT”** or **“RELEASE SEATS”**

Offload List

# Offload from a PNR

---

You have the possibility to offload a passenger from the PNR. For example the passenger on STH4HYP PNR;

01DEC/PC122 flight, the passenger is checked-in on 2F Sükran Akbal. If you need to offload the passenger you have to choose the passenger and choose the flight from which you have to offload the passenger.

Don't forget to write also an explanation for the Offload reason. The System will warn you before you offload the passenger with a pop-up "You are offloading the passenger. Are you sure?" After you click Ok the System will offload the passenger.

- Online check-in yapmış misafirlerimizin, kalkıştan en az 60 dakika önce havalimanında olmaları gerekmektedir. Var ise bagaj teslim işlemleri, dış hatlarda kalkıştan 45 dakika, iç hatlarda kalkıştan 30 dakika önce tamamlanmalıdır. Uçağa biniş zamanı geldiğinde, biniş kapısında hazır olmayan misafirlerimiz, check-in işlemlerini gerçekleştirebilirler bile uçağa alınmazlar. Biniş kartınızı bastıktan sonra, el bagajınız dışında bagajınız yoksa doğrudan giriş kapısına gidebilirsiniz.
- El bagajınız haricinde bagajınız varsa, checkin kontuarından teslim etmeniz gerekmektedir.

# BTM BILGISI

---

Offline stations and which doesn't make IATCI stations send us BTM (Baggage Transfer Messages) for passengers.

Incoming messages are committing to the our system.

If the station send us just piece, our system is automatically calculate per piece 13kg. These information is automatically add for the second flight to the passengers.

If BTM message not send, BSM message is not occur.

This Baggage messages is committed to the PADES system.

# CHECK-IN

---

If the flight is open for the check-in so you have the possibility to search a passenger via surname, flight number, date, destination, Dom/Int options.

You can also search a passenger, if the passenger is actually on reservation status, via PNR, Surname, Check-in rank, check-in group, seat number and bag tag number.

Also you have the possibility, if in a PNR more than one passenger, to search them in one time.

---

You have two ways to find a passenger In the system. If the passenger Is already checked In or In reservatIon status.

The only thInk you have to do Is, to select;

“Check-In Passengers” or

“Reserved Passengers” on the rIght sIde.

If you don't know the PNR number, you can also search the passenger via the **surname**, **arrIval port** and **Dom/Int** InformatIons.

# THRU CHECK-IN

---

Thru check-In Is a check-In process, If passengers have more then one flight In a direction, you have the possibility the check the passenger to the last point of destination. You have also the possibility the check the luggage until to the last destination too. The system will you print the bagtag and the boarding until the last destination.

At first we make the check-In process for the first flight. At this point the system will forward us to the seat selection page from the first flight. On this page you have also the possibility to add luggage. Then you have to click “Continue” and you will see the link “Check-In next Segment”

# SAME PNR THRU check-In

# DIFFERENT PNR THRU CHECK-IN

In different PNR's Thru check-In Is a check-In process, If passengers have more than one flight In different PNR, you have also the possibility the check the passenger to the last point of destination. But In this case the system will not give automatically the second box on the check-In.

On the check-In page you will the only one box and a "T" letter. If the passenger give you are information that he have another flight too, then you have to click the T letter to let the system search for the another flight.

## THE PASSENGER WHO PURCHASED THE SEAT

---

The passengers who purchased seat, show ant check-In page.  
And If the staff want to change the seat, system will Issue a  
warning.

Also If you have a warning at headline about Reseat  
Passenger you will check the new seat and give the  
passenger new Boarding Pass.

# Rule Changes on Check-In Close procedure

- In cases when the aircraft type has change and if you passangers on the flight without seat selection, the System will warn you if you try to close the flight fort he Check-in via pop up “ You have passangers without seat selection, please check reseated passanger list”
- If you ignore this pop up, and close the flight vie click “OK”. Or you can click on this pop up on “no” and after that you can check the “Reaseated Passangerlist” and set for the passangers whitout seat new seats.
- Example:
- You have a Aircraft with 189Y, and this aircraft has also 31 and 32 rows. If you have some passangers who are checked in 31-32 rows the System will reseat these passangers after when the aircraft is changes to 180Y aircraft. In that case the rows 31-32 will not exist and the passangers who have the seats for 31-32 will be without seats. When you try to close the CI the System will shows advise you “you have passangers without seat selection, please check reseated passanger list”

# ADD ONWARD FLIGHT

---

In this case If you try to add a onward flight to a passenger, the passenger must have a flight which is open for the check-in.

For add a onward flight please see the steps below;

- At first, click the airplane on the right side from the passenger.
- For adding a manual flight, the system will open a new page. On this page you have to fill out the details for the manual flight.

# ADD TRANSIT BAG

---

Adding the Transit bag is in two ways possible, with BTM and without BTM

## Add without BTM Transit Bag

On adding transit bag, the passenger must have a bagtag coupon, which we add to the system for the connecting flight.

After when you are click Continue Check-In the system will forward you to the seat selection and add luggage info. On this page you have the possibility to add the local luggage info also the transit bag info into the “TRS Bag Count” part.

# ADD TRANSIT BAG

---

On the “TRS Bag Count” part you can write piece and weight. After you wrote these Informations the system will open a new tab. You have to write all necessary Informations in this part. For example which airline code, bagtag number, to which port is the connection.

If the passenger comes from an offline station and SAW is the connecting station. The passenger will contact the counter to take his boarding pass for the next flight, you have to save into the system the TRS bag information. In this case the system will not print a new bagtag.

# ADD TRANSIT BAG

---

## Add with BTM Transit Bag

We go to the check-In page and take the bagtag coupon from the passenger. On this page we see the bag details from the passenger but the weight info is empty. We add the weight information and finished the check-In.

In this process the system will not create a bagtag.

# SSR(SPECIAL SERVICE REQUEST)

You can add on the system SSR's for passengers who have special request's.

For example;

WCHR, WCHS, OTHS, OSI, PETC, AVIH, HUM

You have to go to the PNR and click "Add Change SSR", the system will forward you to the SSR page. At first you have to choose which SSR you're need after that you have to choose the passenger and for which flight you will add the SSR. After when you click "Add SSR" the system will save It Into the PNR.

# APIS

---

Some countries need the APIS data. The APIS data includes passport details. The system sends the APIS data automatically and sends the passport-ID, expiry date, gender, nationality, type of document, issue date, issuing state, birthdate, name and surname.

Some countries need the passport information before the flight arrives the destination.

You will see below the APIS create and send procedure.

# APIS

Go Into the System;  
At first you have to go to the check-In page.

# DENIED BOARDING

In the case when for a flight, more than the capacity are tickets sold (overbook), then makes the airline company with the passengers an agreement. This agreement for the denied boarding can be happen in two ways:

a) Voluntary

When we offered and the passenger agree.

b) Involuntary

When we don't find in the normal check-in time passengers who volunteer, then we make this procedure to passengers who came after the total capacity.

# BOARDING/UNBOARD

If you click on the “\*\*Boarding” button the system will forward you to the boarding page

---

On some stations we have gate readers. On these stations if you open the DCS system and board the passengers via the gate reader, the system will check it automatically. But some stations they don't have gate readers, they have to board the passengers manually via security numbers. In this case you have to search the passenger via the security number and then you have to click the "Board" button.
