OUR

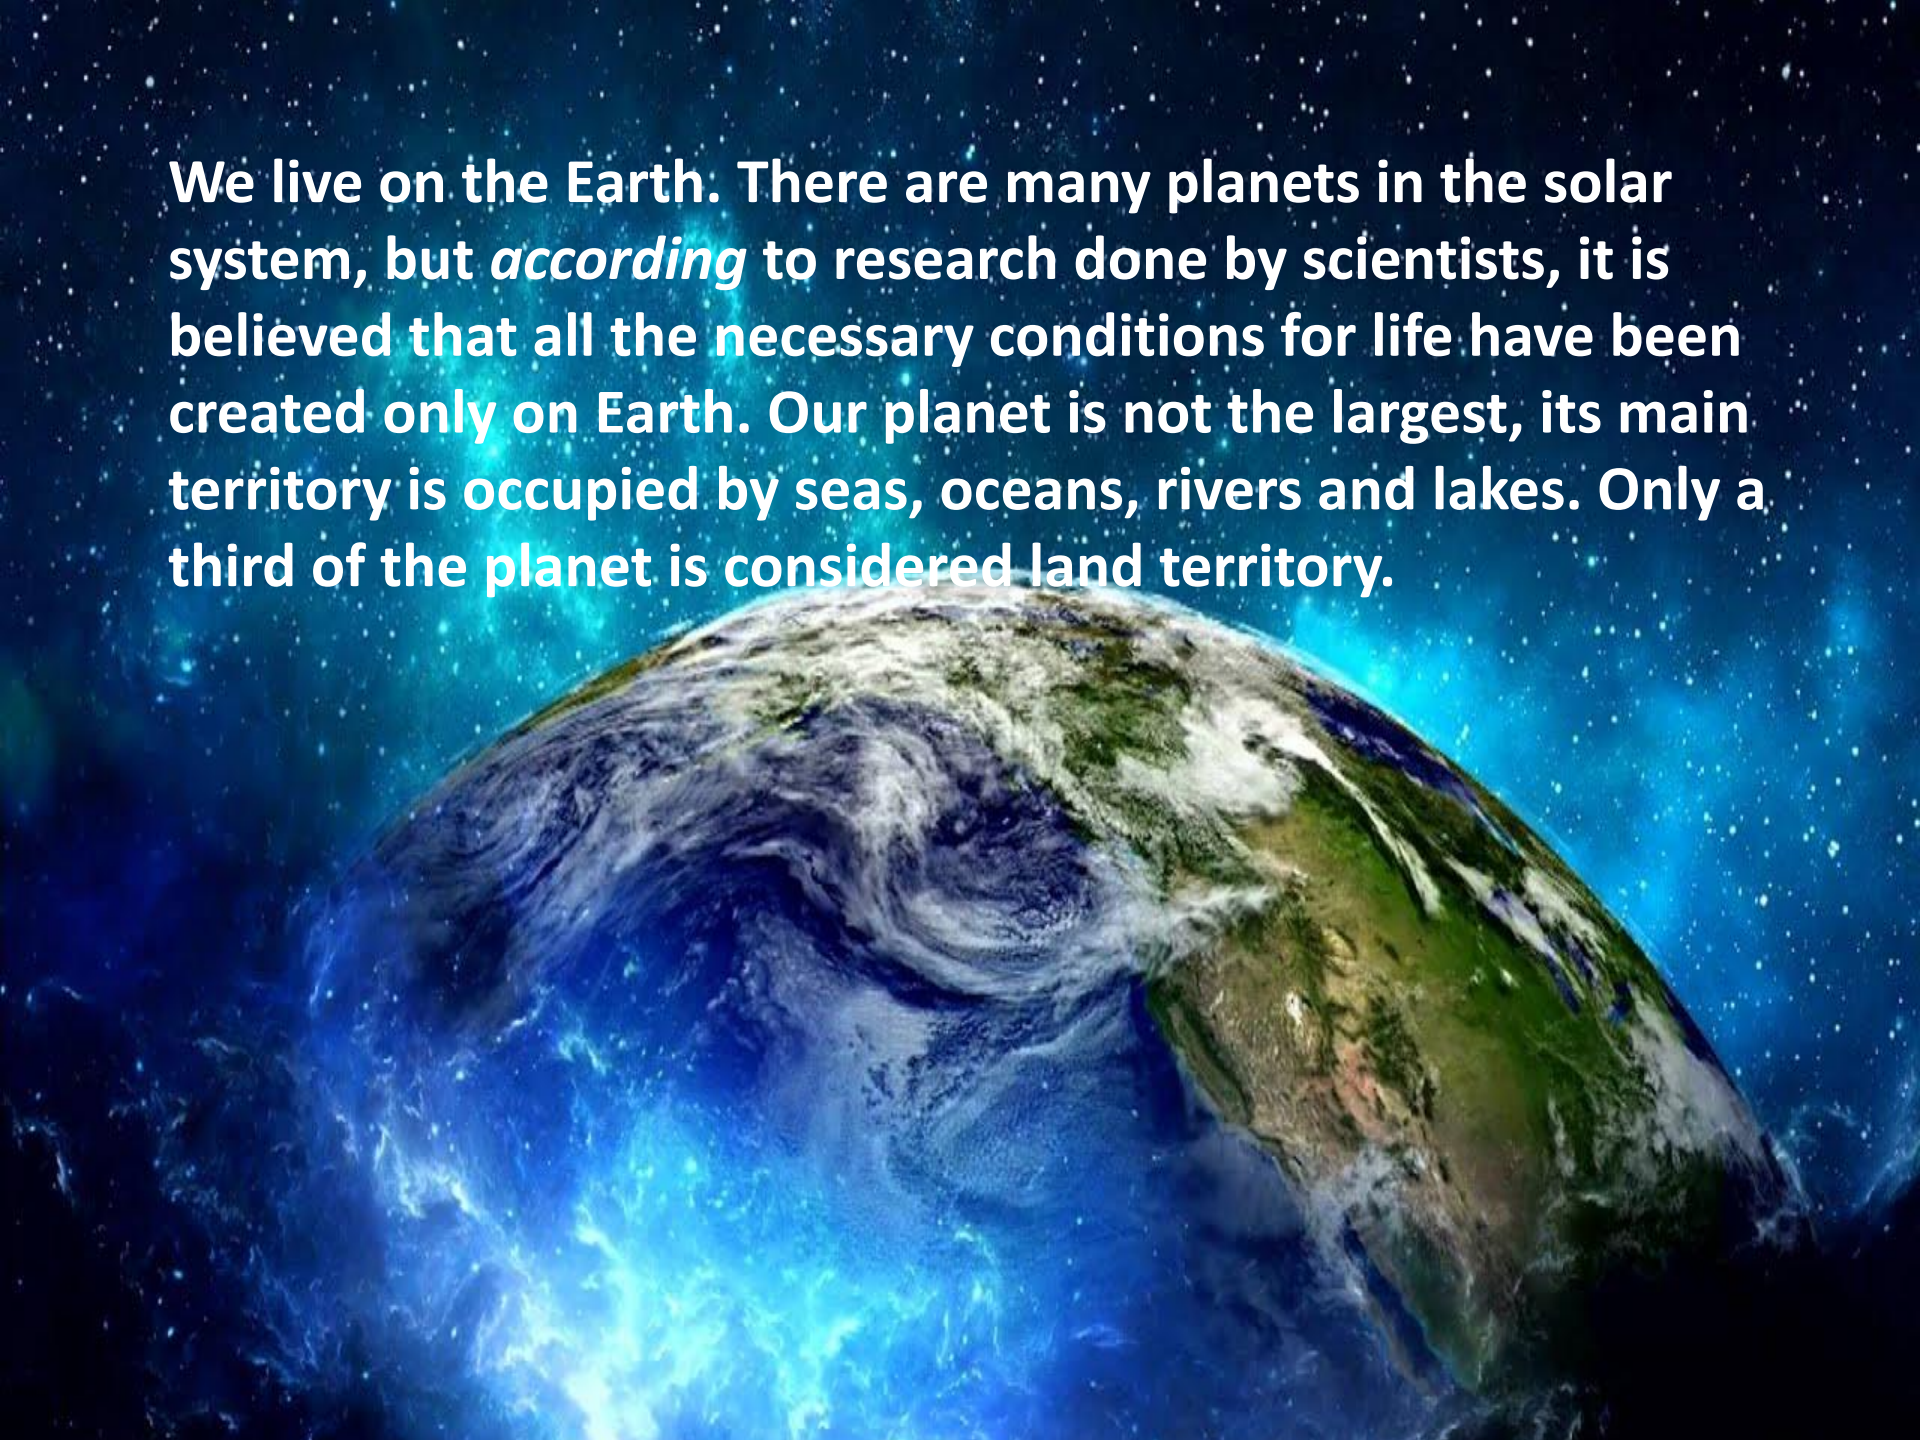

WORLD

Our usual satellite rotates around our planet - this is the Moon. It is very important for life on the planet, adjusting the ebb and flow. The sun warms the Earth to favorable temperatures. Otherwise, the Earth will cool, and all living things will perish from the cold. Planet Earth is our home, it is beautiful. The decoration of the Earth are forests, meadows, mountains, rivers, oceans, seas, deserts. Everywhere there are conditions for life.

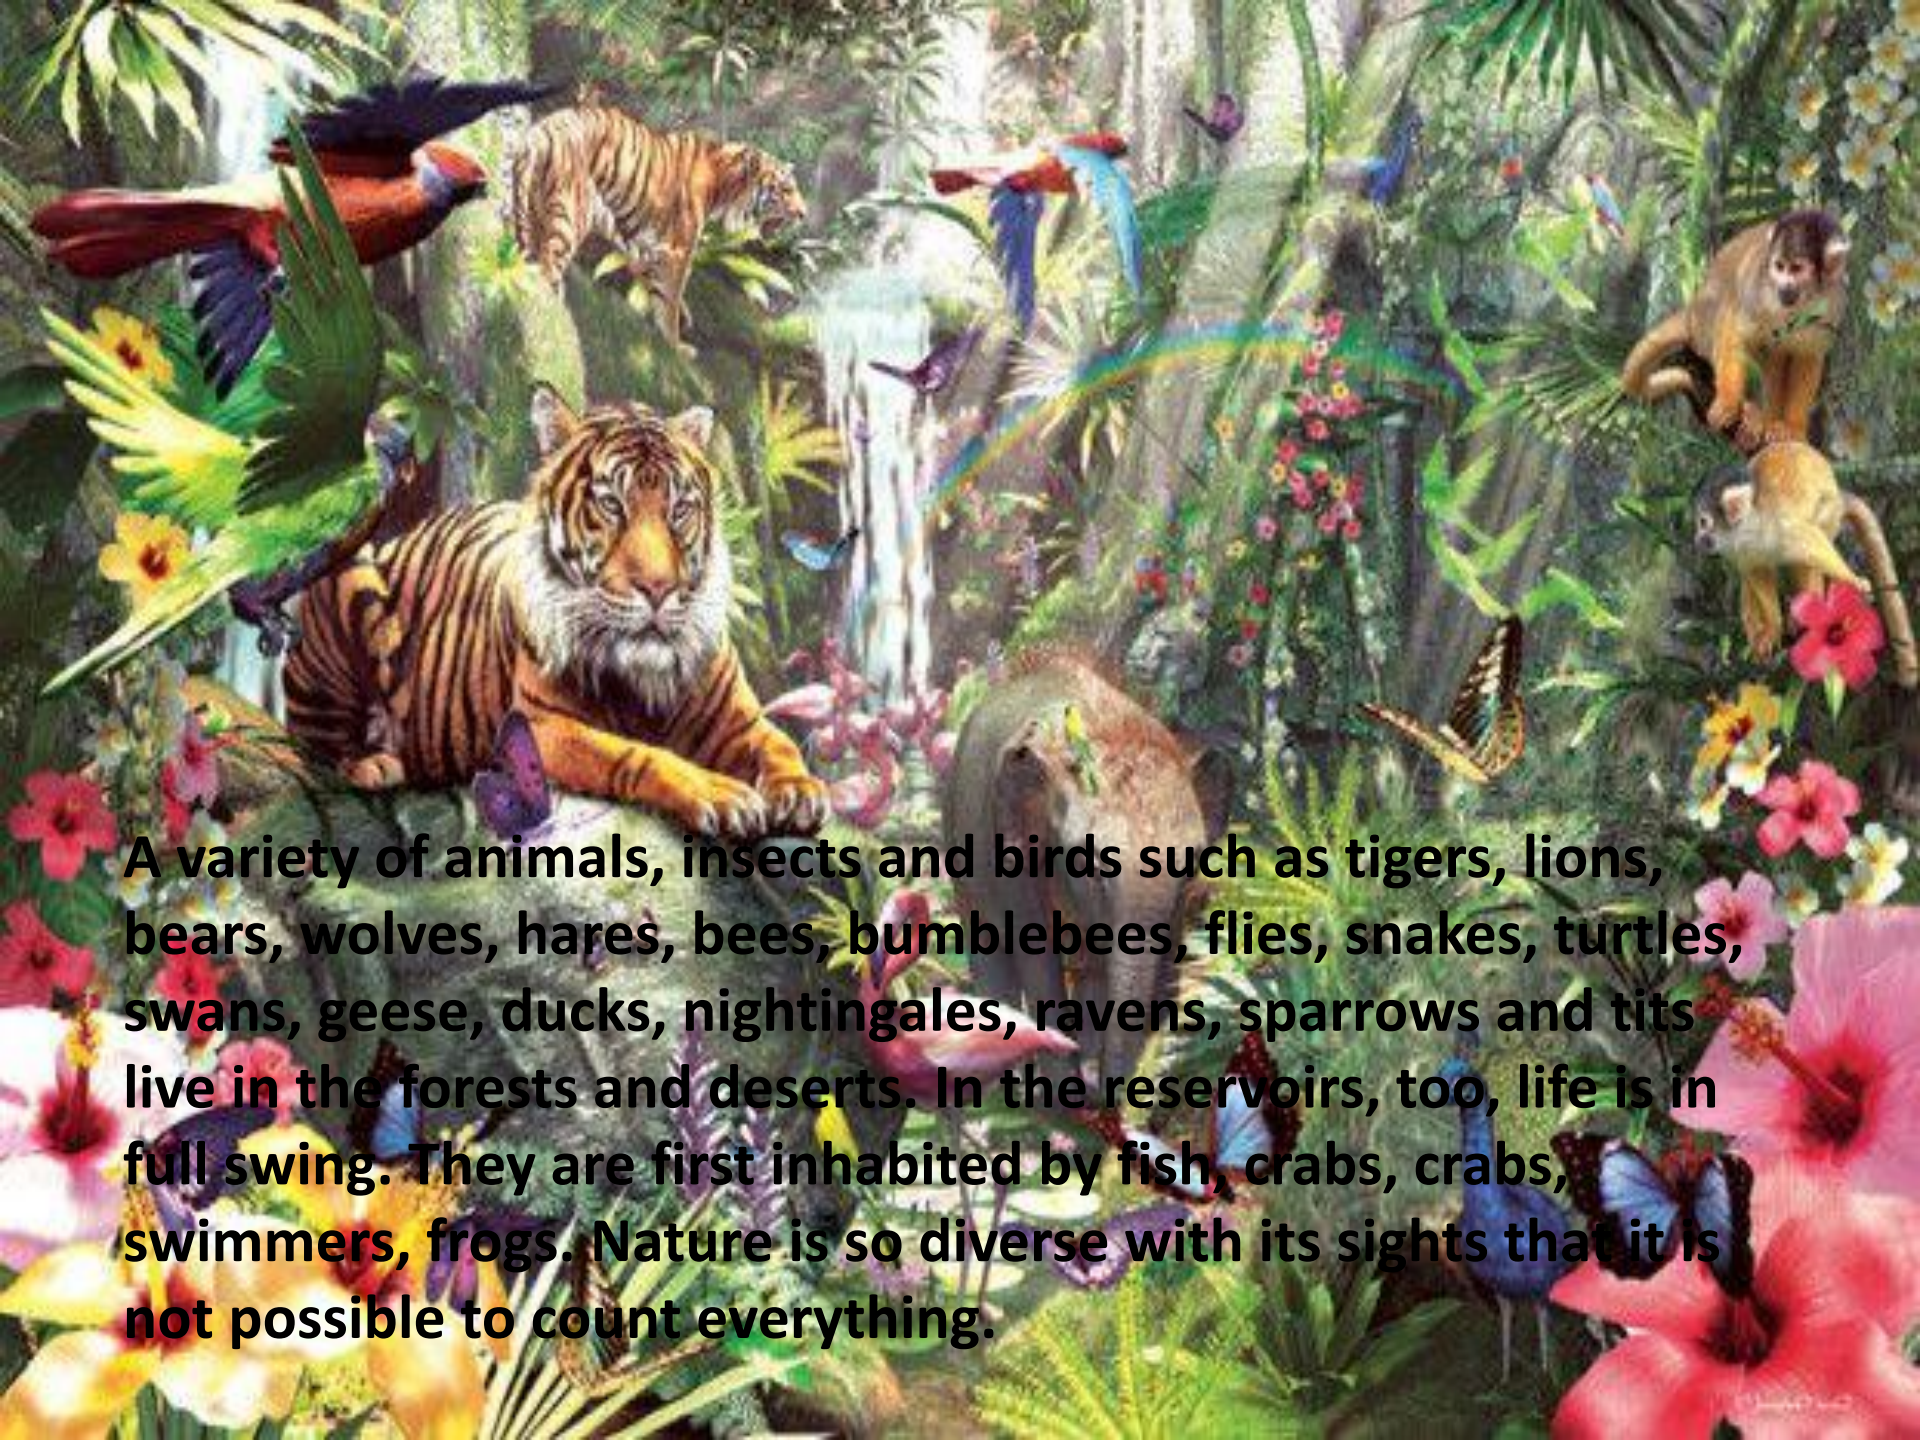

We live on the Earth. There are many planets in the solar system, but *according* to research done by scientists, it is believed that all the necessary conditions for life have been created only on Earth. Our planet is not the largest, its main territory is occupied by seas, oceans, rivers and lakes. Only a third of the planet is considered land territory.

A scenic view of a mountain range with purple flowers in the foreground. The mountains are rugged and grey, with some snow patches. The sky is blue with white clouds. The foreground is filled with tall, thin purple flowers on green stems, some with small purple blossoms. The overall scene is bright and clear.

We are surrounded by a wide variety of flora and fauna, depending on the climate. We can admire: fir, spruce, cedar, as well as palm trees, magnolias, oaks, birches, poplars. Everywhere there are various herbs and flowering plants: roses, lilies, carnations, chrysanthemums, chamomiles, cornflowers, bluebells

A variety of animals, insects and birds such as tigers, lions, bears, wolves, hares, bees, bumblebees, flies, snakes, turtles, swans, geese, ducks, nightingales, ravens, sparrows and tits live in the forests and deserts. In the reservoirs, too, life is in full swing. They are first inhabited by fish, crabs, crabs, swimmers, frogs. Nature is so diverse with its sights that it is not possible to count everything.

A satellite view of Earth from space, showing the Americas, the Atlantic Ocean, and the Arctic region. The image is a composite of several satellite images, showing the curvature of the planet and the vibrant colors of the land and water. The text is overlaid on the bottom right of the image.

In order to save the planet, everyone needs to try this. It is necessary to be interested in nature, to study its features, to plant everything around, not to throw garbage anywhere, that is, to love and protect the environment, and our only home is planet Earth.

THE END
