

UK

Twelve million children attend about 40,000 schools in Britain. Education in Great Britain is compulsory and free for all children between the ages of 5 and 16. There are many children who attend a nursery school from the age of 3, but it is not compulsory. In nursery schools they learn some elementary things such as numbers, colours, and letters. Apart from that, babies play, have lunch and sleep there. Whatever they do, there is always someone keeping an eye on them.

A vertical stack of colorful pencils is positioned on the left side of the slide. The pencils are arranged in a column, with their tips pointing to the right. The colors of the pencils include red, orange, yellow, green, cyan, blue, purple, and black. The stack is dense and occupies the left edge of the frame.

Compulsory education begins at the age of 5 when children go to primary school. Primary education lasts for 6 years. It is divided into two periods: infant schools (pupils from 5 to 7 years old) and junior schools (pupils from 7 to 11 years old). In infant schools children don't have real classes. They mostly play and learn through playing. It is the time when children just get acquainted with the classroom, the blackboard, desks and the teacher. But when pupils are 7, real studying begins. They don't already play so much as they did it in infant school. Now they have real classes, when they sit at desks, read, write and answer the teacher's questions.

Compulsory secondary education begins when children are 11 or 12 and lasts for 5 years. Secondary school is traditionally divided into 5 forms: a form to each year. Children study English, Mathematics, Science, History, Art, Geography, Music, a Foreign language and have lessons of Physical training. Religious education is also provided. English, Mathematics and Science are called "core" subjects. At the age of 7, 11 and 14 pupils take examinations in the core subjects.
