

**My
speciality**

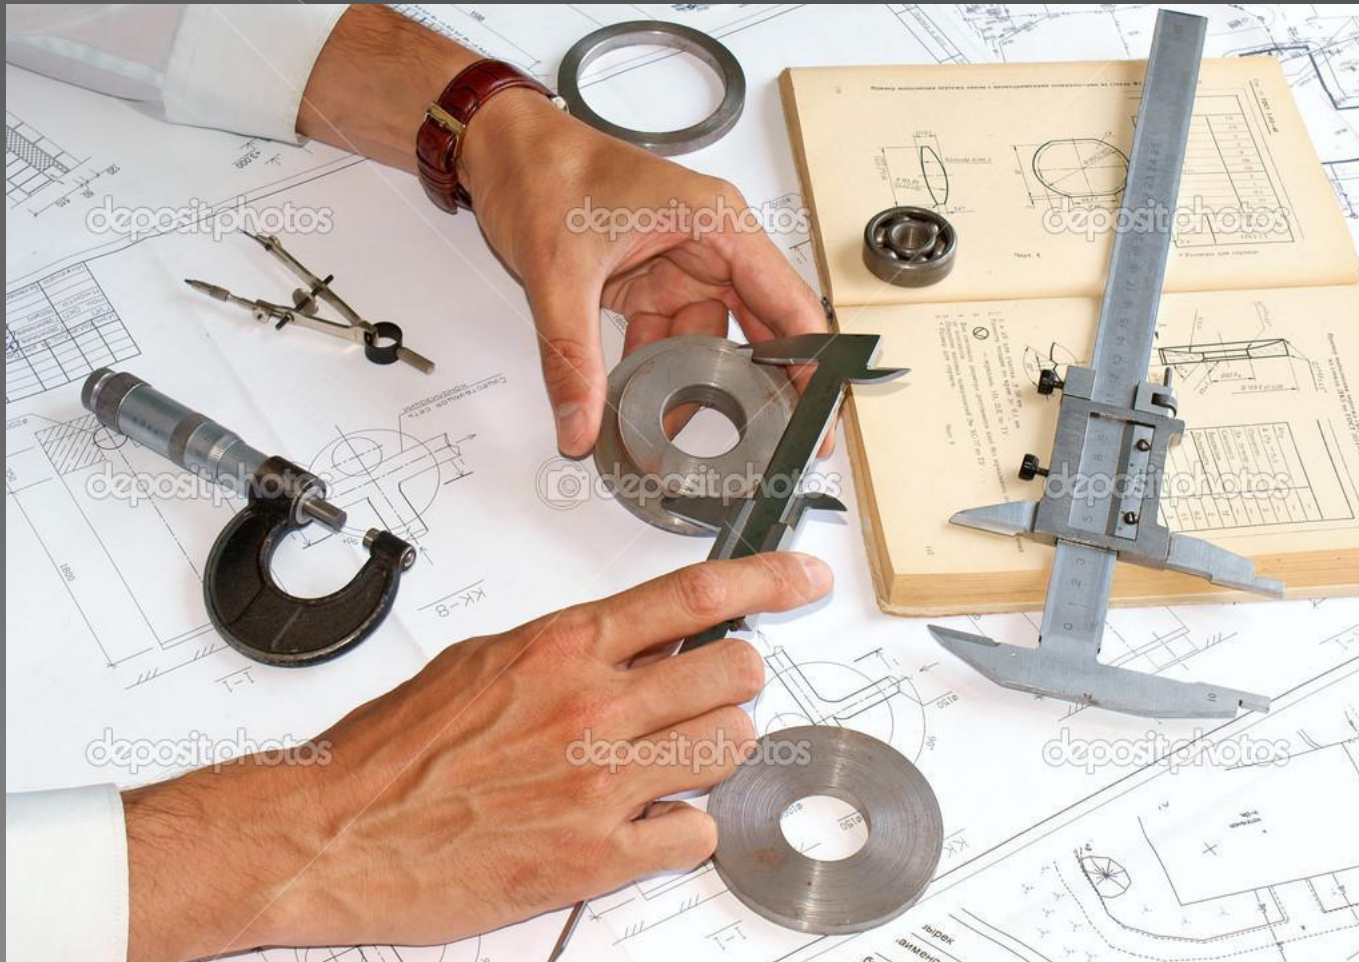

My name is Alina Uskova

I'm f student group TRK-13

My speciality is «Technical Regulation and Quality Control»

Duties

- Control the of finished goods
- Checking the real parametres of the manufactured products
- Execution of documentation (certificates)
- Quality control of raw materials

Plus and minus quality control

- The constant demand for such specialists in today job market. As mentioned above, the controllers can now be found almost everywhere, and the scope of their activities is constantly growing and as it happens there are more and more specialization of the profession
- First of all, it should be noted that it is even and constant, but rather a small source of income. In other words labor inspectors is very difficult to call a competitive which is the main cause of a huge «turnover» of personnel.

**Thank you
for attention**
