

Natural disasters

Every year different natural disasters happen in our planet.

- Earthquake
- Hurricane
- Tornado
- Volcano
- Flood
- Drought

They destroy cities and towns, injure people and animals.

An earthquake is a sudden shaking of the ground. It usually happens in Japan, China, India, the USA, Armenia, Portugal.

A hurricane is a very violent wind or storm. It usually happens in Japan, China, the Russian Federation, the Philippines.

A tornado is a very violent wind in the form of a funnel of air that spins at great speed. It usually happens in the USA.

A volcano is a mountain with a hole called a crater in the top. Sometimes lava and gases are thrown from the crater. It usually happens in Italy, Salvador, Hawaii, the Russian Federation.
