

Project: Add your own ad!

performed by a student of class 9A Egorova Ksenia

And thing that I'm going to advertise is...

Introduction:

Why I choose “imagination” as what I’m going to advertise?

It’s simple!

I want to inspire people to use their imagination more often and develop their minds

(I could not invent theme of project and decided to take what is missing most of at the moment...

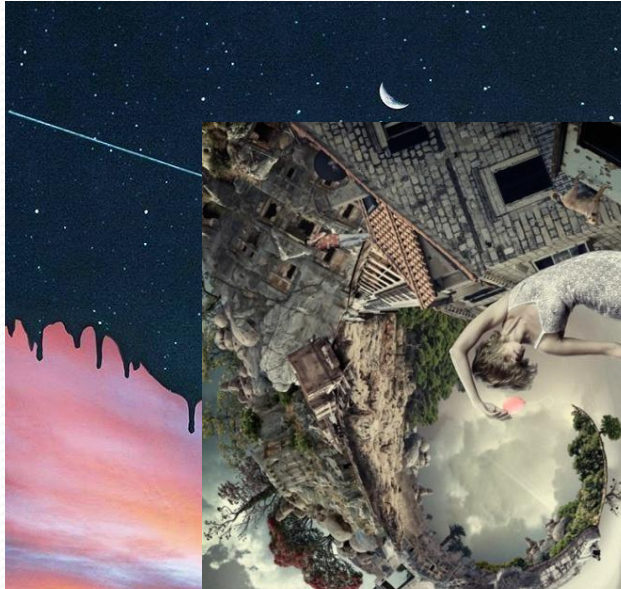

I didn’t have imagination for inventing a theme)

Let's start! What is "imagination"?

Or this?

in general, people with imagination have created many variations of its appearance:

but this is not so necessary

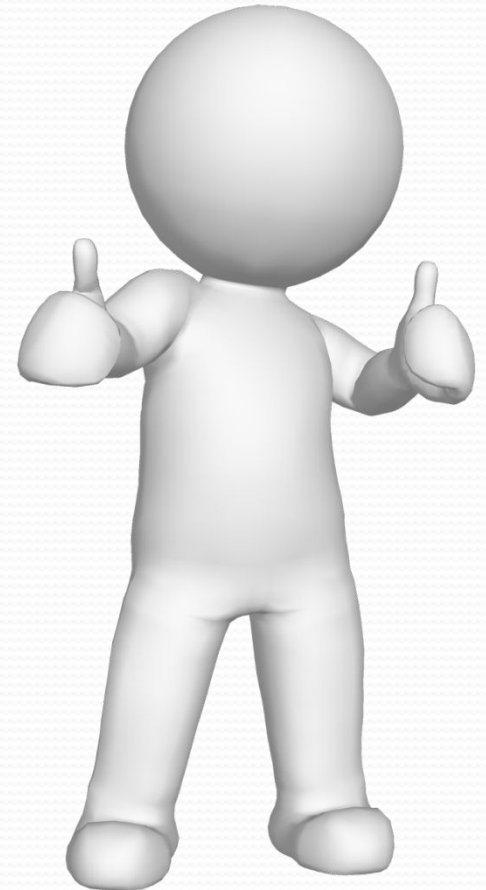

I don't know what it looks like, but I can say that:

It's a very useful thing!

Pluses of this:

- help to solve complicated tasks
- make world around even more interesting
- just a cool thing!)
- every one can use this!

OK, and where to find imagination?

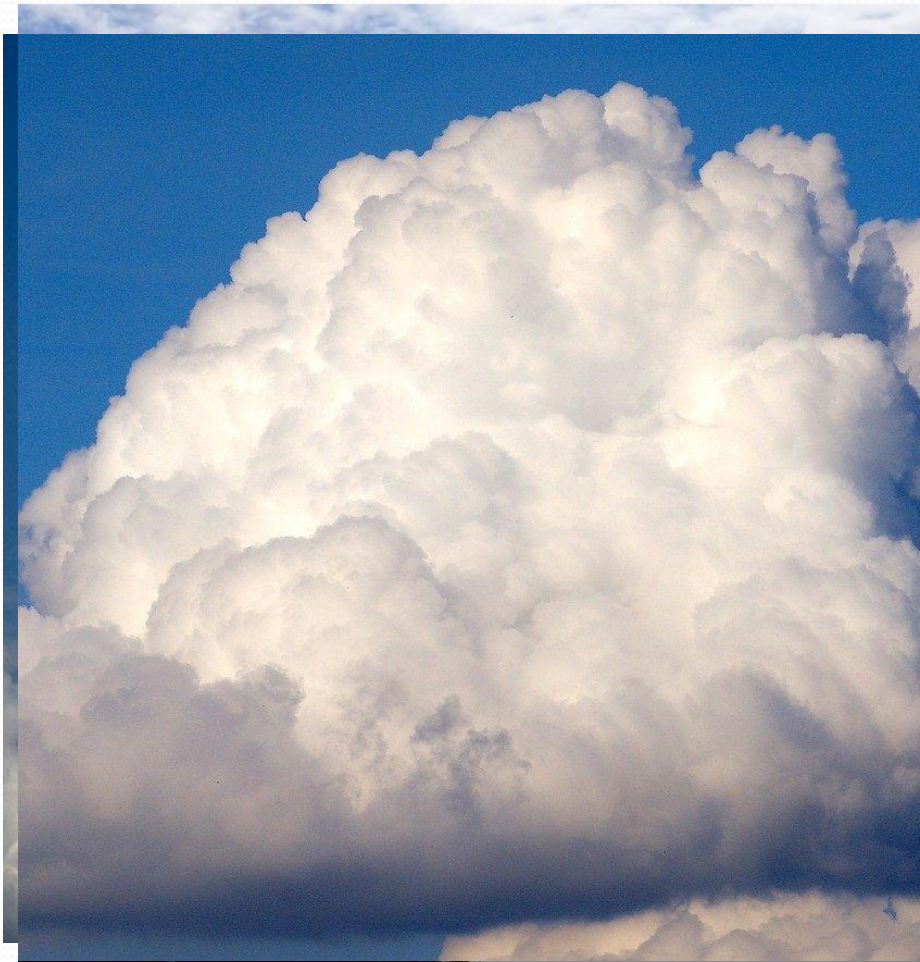

If I knew, project would be on other theme)

May be, you should look for it in your head

Test for imagination

if you are able to see here not just clouds, something other - congratulations, you have

I think that without imagination people would be bored to live, so I encourage you to use it more often. Let's make this life more colorful!)

in conclusion I will read you the motto:

**If your imagination is
great,
you can anything
created!**

The end

I hope everyone had fun!
