Function and importance of political science

• "The function of political science is to discover the principles that should be adhered to in public affairs that eventually would serve as a model that can be applied to matters of urgent concern to public officials and to private citizens".

Elements of state:

- 1. People the mass of the population living within the state.
- 2. Territory demarcated area that rightly belongs to the population.
- -answer the question, "where?";
- -terrestrial, fluvial, maritime and aerial;
- -should be permanent and large enough to be self-sufficing.
- 3. Government Refers to the agency to which the will of the state is formulated, expressed and carried out.
- 4. Sovereignty may be defined as the supreme power of the state to command and enforce obedience to its will from the people within its jurisdiction and corollary to have freedom from foreign control.

Sovereignty:

- a) Internal power of the state to rule within its territory (Chechnya);
- b) External the freedom of the state to carry out its activities without subjection to or control by other states (Russia).

State distinguished from nation:

- -"The state is a political concept while a nation is an ethnic concept";
- -"A state is not subject to external control while a nation may or may not be independent of external control";
- -"A single state may consist of one or more nations or people and conversely, a single nation may be made up of several states (South Korea and North Korea)";
- -"A state cannot exist without a government, but it is possible to have a government without a state";
- -"A government may change, its form may change, but the state, as long as its essential elements are present, remains the same".
