

# THE PROBLEM OF STRAY ANIMALS IN THE CITY AND ITS SOLUTION

*We all are wandering  
on the same planet-  
we are the crew of one  
ship.  
A. de Saint – Exupery*

**THE AIM OF THE PROJECT IS  
TO ANALYZE THE PROBLEM OF THE  
EXISTENCE OF STRAY ANIMALS IN SARATOV  
AND TRY TO FIND WAYS TO SOLVE IT.**

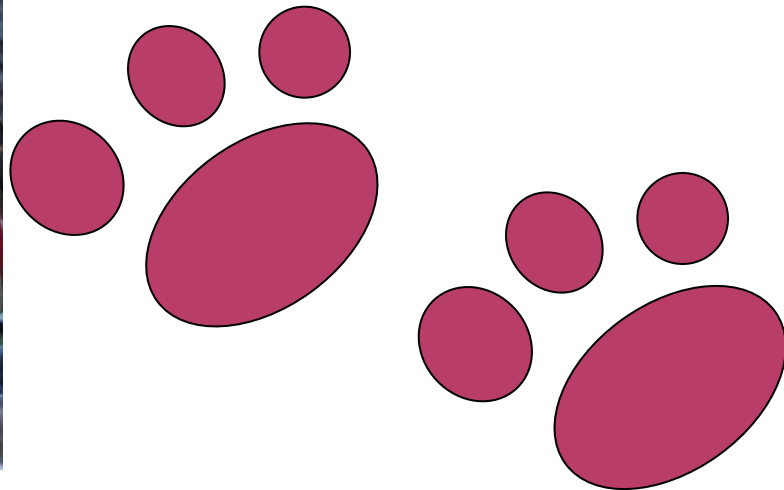

**We set ourselves the following tasks:**

- to identify the causes of stray animals in the city and their impact on the life of the city;**
- to offer solutions to this problem;**
- to contribute solving the problem of reducing the number of stray dogs and cats.**

# THE CAUSES OF HOMELESS ANIMALS

**Dogs have only one drawback –  
they believe people.**

**Elian George Filbert**

# THE PLACE OF STRAY DOGS IN URBAN ECOLOGY

- **The positive role:**
  - 1. Stray dogs are garbage disposal and a competitor of rats and crows.**
  - 2. Stray dogs are a natural environmental barrier to penetration into the urban environment of wild animals**

# NEGATIVE ROLE

- **Infectious diseases**
- **Aggressive behavior towards humans. Every year in Saratov several thousand people**
- **Cause death of wild animals, including protected species.**

# WAYS OF SOLVING THE PROBLEM OF HOMELESS ANIMALS

- 1) Creation of legislative framework ;
- 2) Explanatory activity among the population
- 3 You need to implement the dog training culture
- 5) State control over the breeding of animals
- 6) Control of the number of animals through sterilization

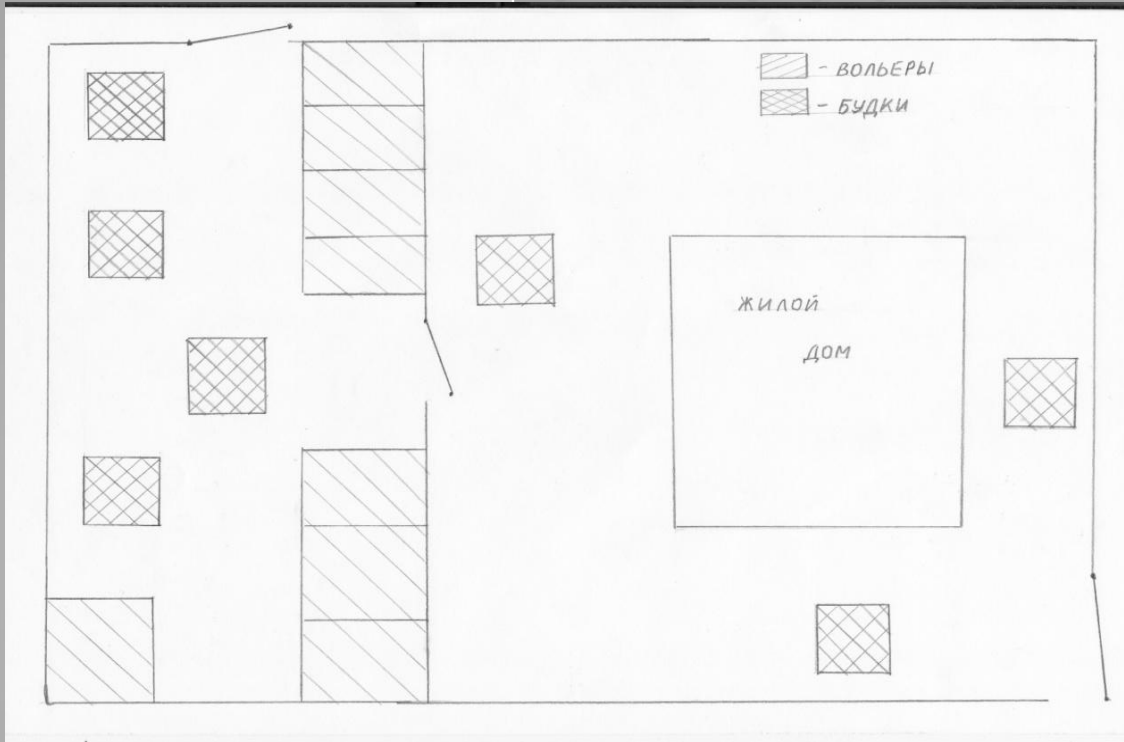

**CONTRIBUTION TO THE SOLUTION OF THE  
PROBLEM OF REDUCING THE NUMBER OF  
HOMELESS ANIMALS BY ESTABLISHING A  
SHELTER-KEEPING**

**A dog is not the meaning  
of life,  
but thanks to it life  
acquires a special meaning.**

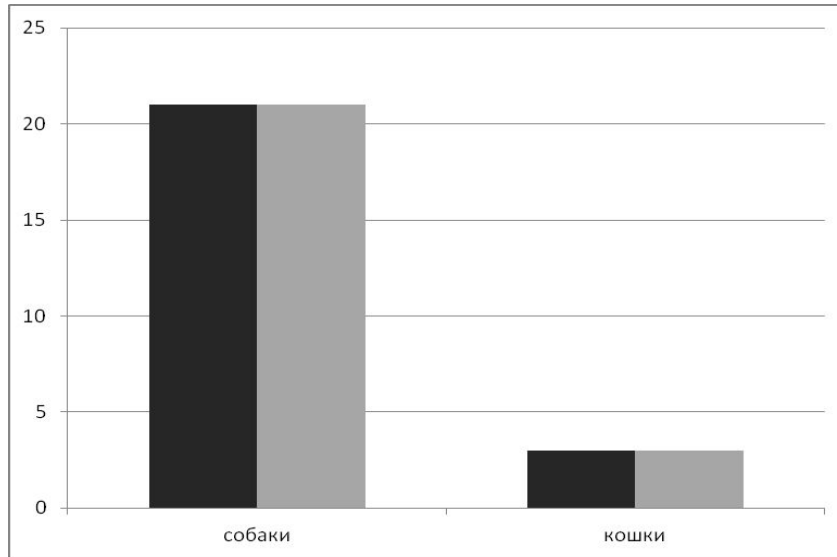

**R. Karas**
