Database-centric web application development framework

Develop desktop and mobile web apps

Visualize and maintain database data

Leverage SQL Skills and database capabilities

Also known as Oracle APEX (ā'pěks)

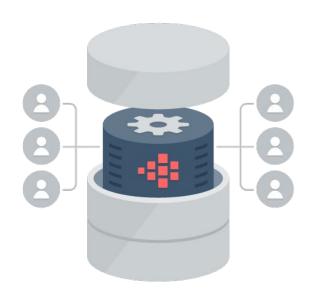

Distinguishing Characteristics

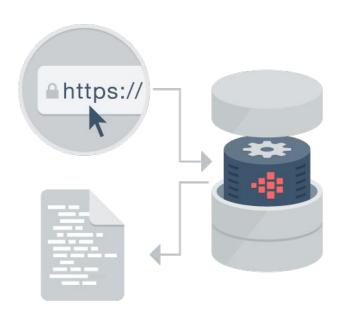

Application Development IDE is a web browser.

No client software needed

Application definitions are stored in the database as meta data.

Declarative – No code generation

Very efficient page generation - single request single response.

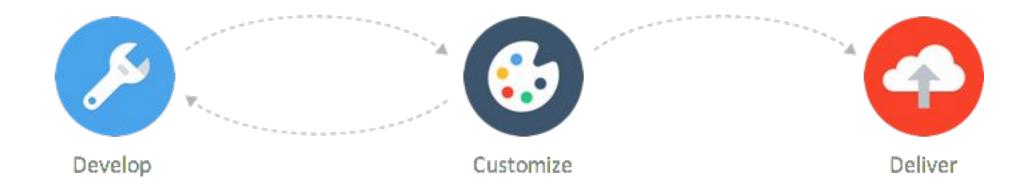

Data processing done in the Database

Develop faster, release more frequently

Pre-built controls for security, authentication, database interaction, validation, session management and more...

Go from prototype to production in minutes

Use Cases

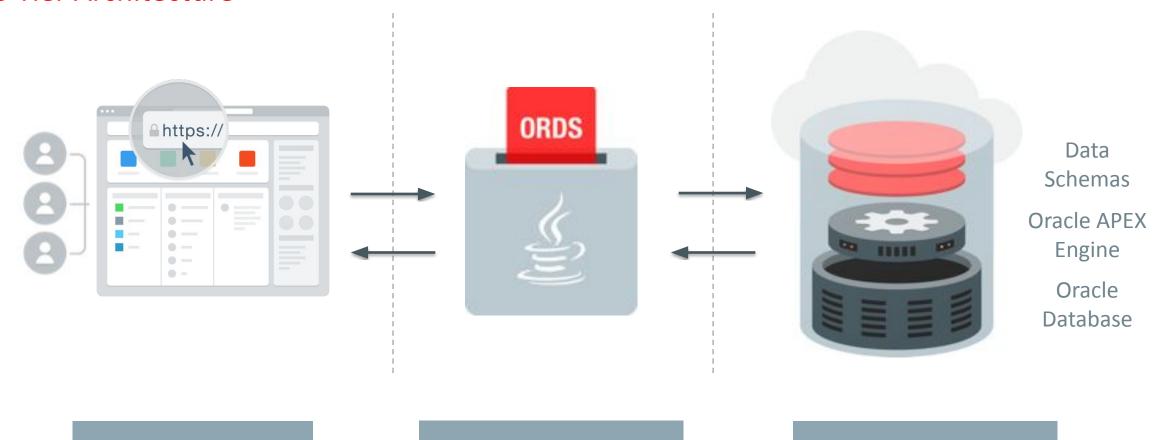

Developing opportunistic & self service web apps

Extending enterprise application solutions

Migrating file based and client server apps to the web

3 Tier Architecture

Browser

Mid Tier

Database Tier

ORDS = Oracle REST Data Services

No cost feature of the Oracle Database

- No-cost fully supported feature
 - Any number of developers, apps, & end-users
 - Specialized Oracle Support Team
 - 11gR1, 11gR2, 12c
 - All DB editions: EE, SE, SE1, XE
- Included with Oracle Cloud Services
 - Exadata Express & Schema services 5, 20, 50 GB
 - Dedicated DBaaS services
 - No cost evaluation http://apex.oracle.com
- Easy to install
 - Included by default with all editions of Oracle database
 - Download latest release from http://otn.oracle.com/apex

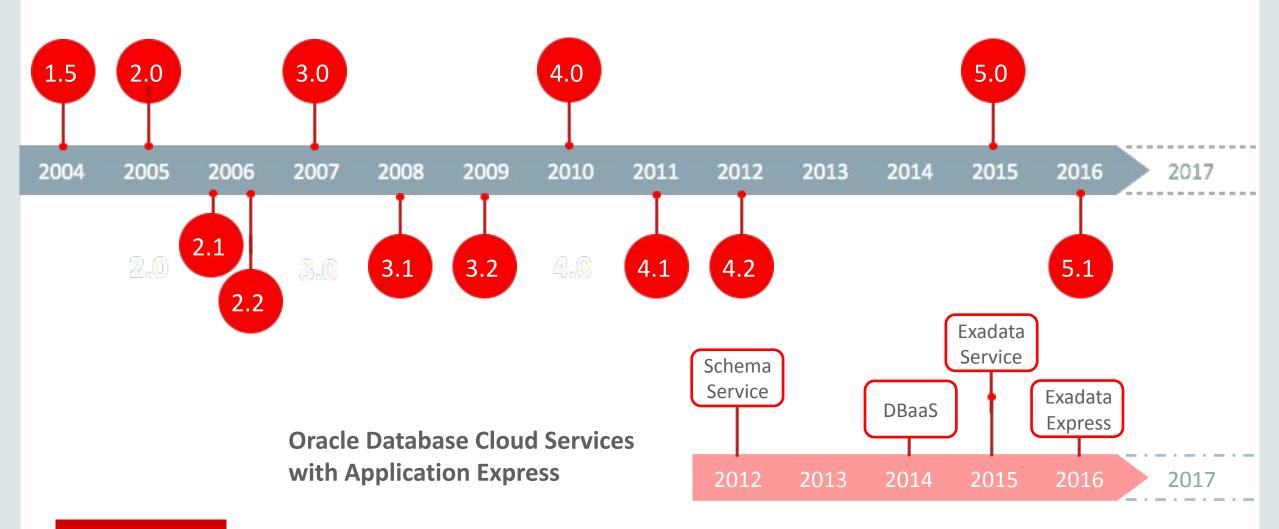

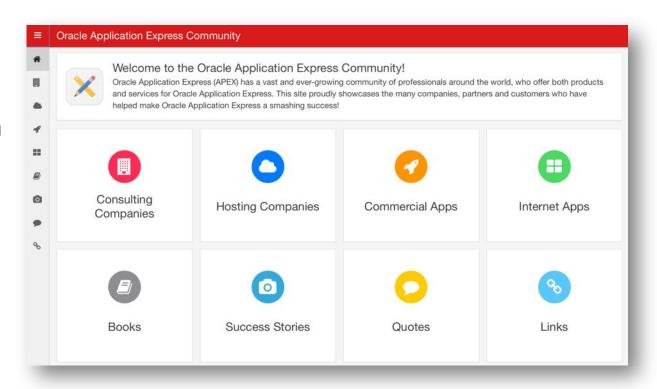

History

Community

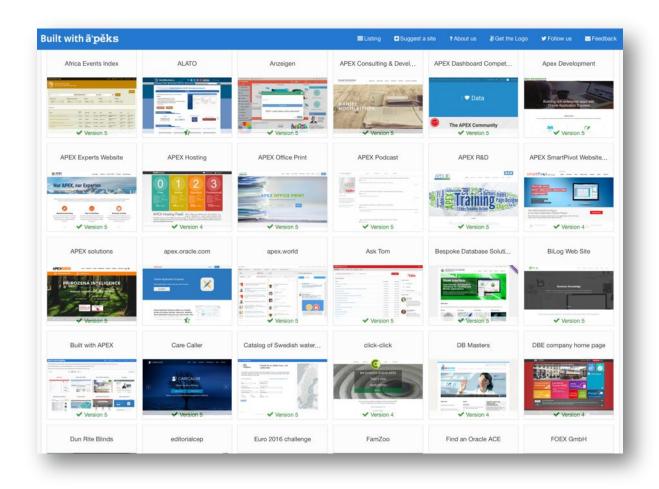

- Over 400,00 developers worldwide
 - Estimated from support requests, downloads, conferences, discussion forum activity
- More than 100 active bloggers http://odtug.com/apex
- http://apex.oracle.com/community
 Consulting companies, books, success stories, quotes, commercial apps

Internet Sites built with Oracle APEX

http://builtwithapex.com

- Showcases large diversity of types of applications and different themes
- Launched October, 2016
- > 100 sites published, more being added daily

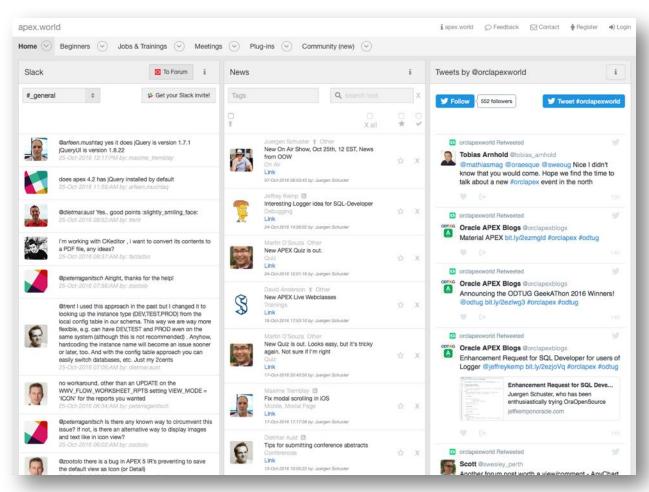

Community site built by the community for the community

http://apex.world

- Community-authored site providing:
 - Plug-ins
 - Slack discussion channels
 - Twitter feeds
 - News
 - Jobs
 - Conferences
 - Meetups

- 1 Oracle Application Express Overview
- **Interactive Grid**
- Oracle JET Charts
- **Universal Theme**
- **Productivity Improvements**
- Packaged Apps
- Calendar

Motivation

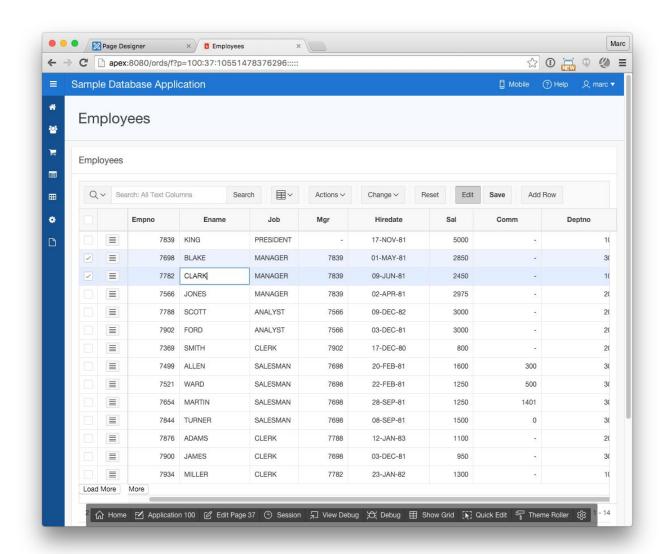

- Long-standing customer requests to enhance Tabular Forms:
 - Support multiple tabular forms on a single page
 - Cascading LOVs
 - Dynamic Action Support
 - Lift 32k limitation on report rows

Major Features

- Modern, rich & interactive multi-row editing component
- Use of existing Item types
- Declarative support for Cascading LOVs and Dynamic Actions
- Upgrade utility for Tabular Forms
- Master Detail / Detail

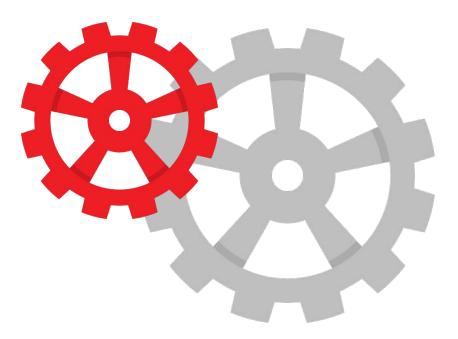

Features

- JSON-based, lightweight Ajax communications
- Client-side and server-side validation
- Declarative validations and processes
 - Support for bind variables to reference columns
 - Execution scope: all rows or only rows modified and added
- Column groups, fixed headers and frozen columns
- Infinite scrolling and lazy loading
- Accessible, excellent keyboard support, right-to-left support

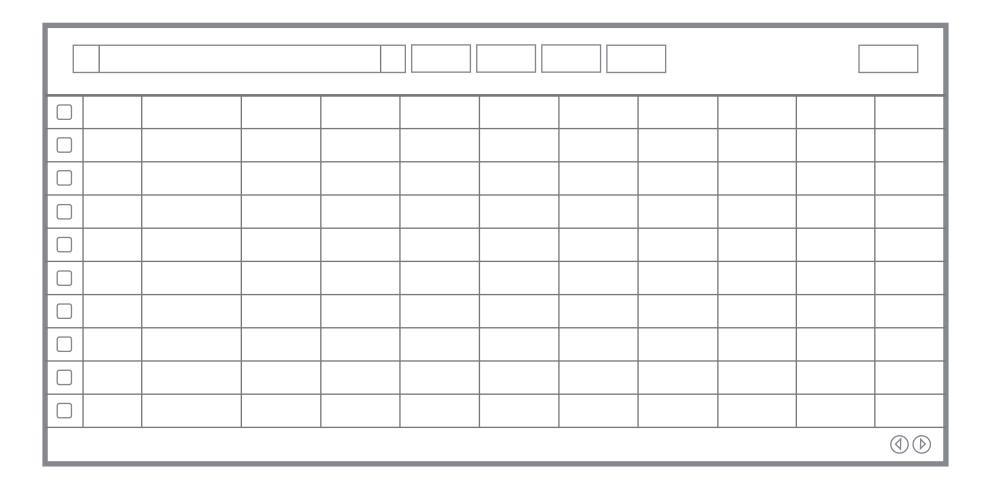

Architecture Changes

- Removal of limitations like 32k bytes per row
- Warn on unsaved changes
- JSON-based page submission
 - Form not mapped to p_t001-200 and p_v001-200
 - All item values now stored in JSON document
 - Allows for > 200 page items

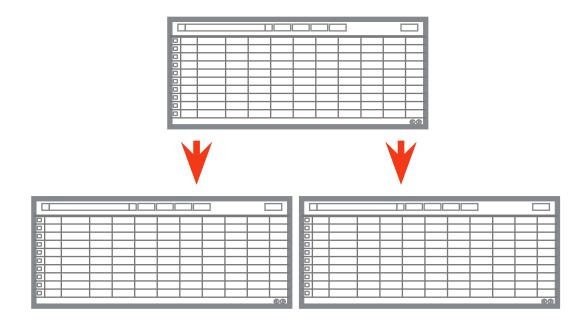

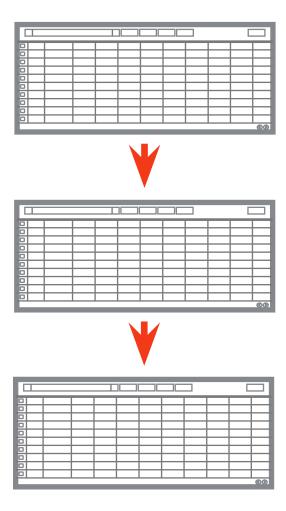

Page Layout – Single Grid

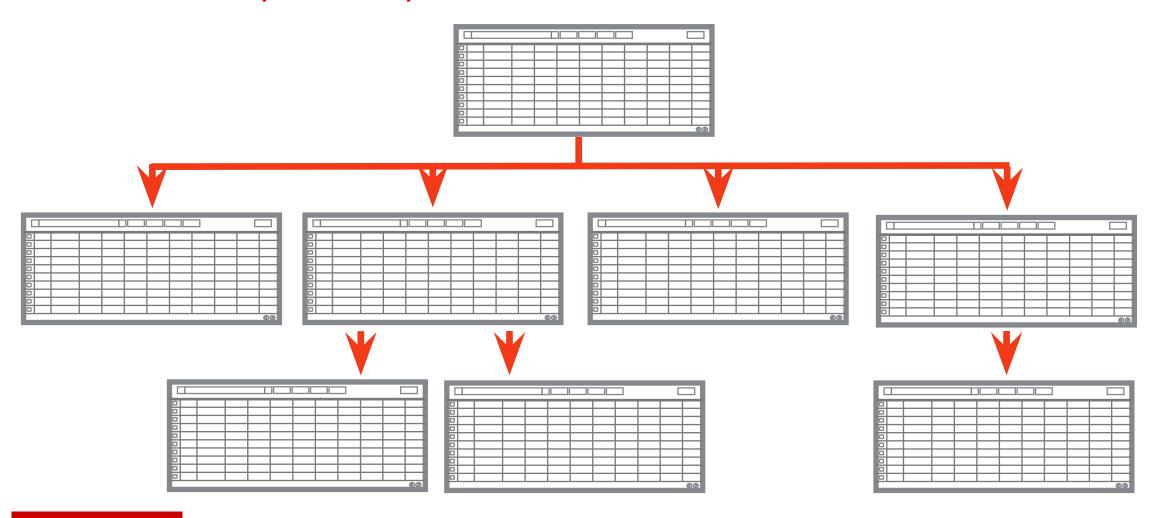

Master Detail Layout – N-levels wide or deep

Master Detail Layout – Any combination

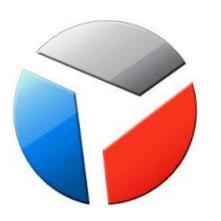

- 1 Oracle Application Express Overview
- Interactive Grid
- 3 Oracle JET Charts
- Universal Theme
- **Productivity Improvements**
- Packaged Apps
- Calendar

- Based on Oracle JET Data Visualization Components
- Oracle Jet (JavaScript Extension Toolkit) is open source
- JavaScript-based solution, data being provided in JSON format
- Highly Customizable
 - Using 'JavaScript code' to provide function to be called when chart is initialized
 - Using Dynamic Actions to add interactive behavior
- Built-in Accessibility Support
- Built-in Responsive Design Support

- Oracle JET charts fully integrated into APEX 5.1 using Plug-In Architecture
- Declarative Chart creation using Page Designer and Wizards
 - Updated Create Application wizard
 - New Create Chart Page wizard
 - Chart Source Definition Simplified
- New Chart Types Funnel, Area, Polar, Line with Area, Radar
- Color palette integrated with Universal Theme

- No more 32k restriction
- Built-in Document Direction Support RTL
- Upgrade path from AnyChart to Oracle JET Charts
- Support for Oracle JET Charts in Interactive Grids
- Enhanced Sample Charts application

- 1 Oracle Application Express Overview
- Interactive Grid
- 3 Oracle JET Charts
- 4 Universal Theme

Developer Productivity

Page Designer

- Modern, intuitive and powerful browser-based IDE
- Introduced in Application Express 5.0
- Cohesive User Experience
 - No context-switching when modifying multiple components
 - Undo and redo changes
- Better Visual Representation
 - Immediate visual representation of region and item layout
 - Changes immediately reflected across the Tree, Grid Layout and Property Editor

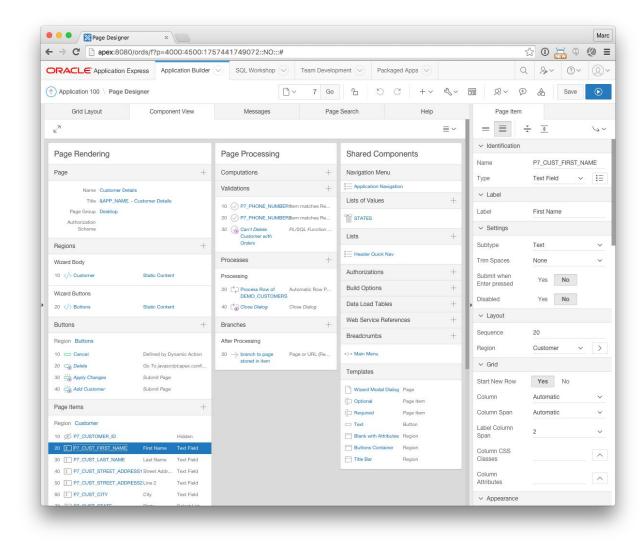

Developer Productivity

Page Designer

- Intuitive Drag and Drop
 - Drag new components from the Component Gallery
 - Move and copy existing components around
 - Drag to move and copy multiple components at a time using Treee View
- Enhanced Code Editor
 - SQL and PL/SQL validation with inline errors
 - Auto completion, syntax highlighting, search and replace with regex support
 - Preferences for tabs, indentation, and color scheme.

Developer Productivity Page Designer

- Integrated 'Component View'
- New Two Pane Mode
- Movable Tabs
- Property Editor Filter
- Style and contrast enhancements

Developer Productivity

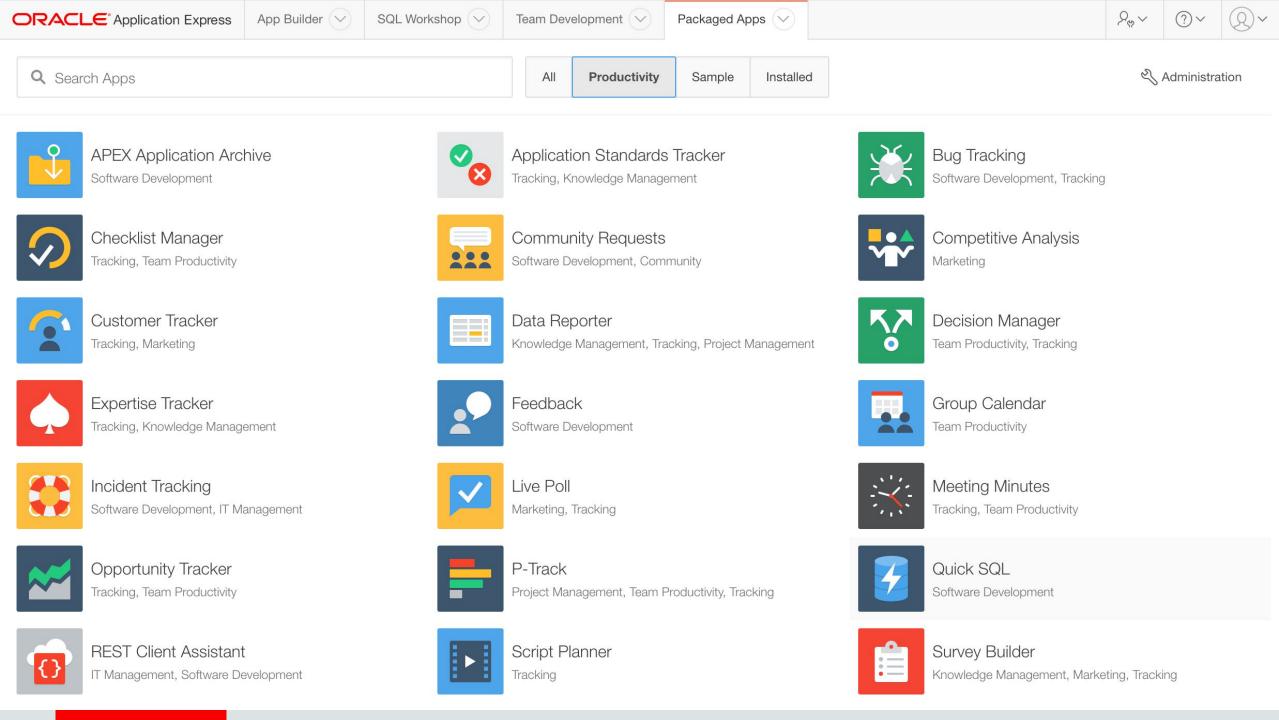

Legacy Component View

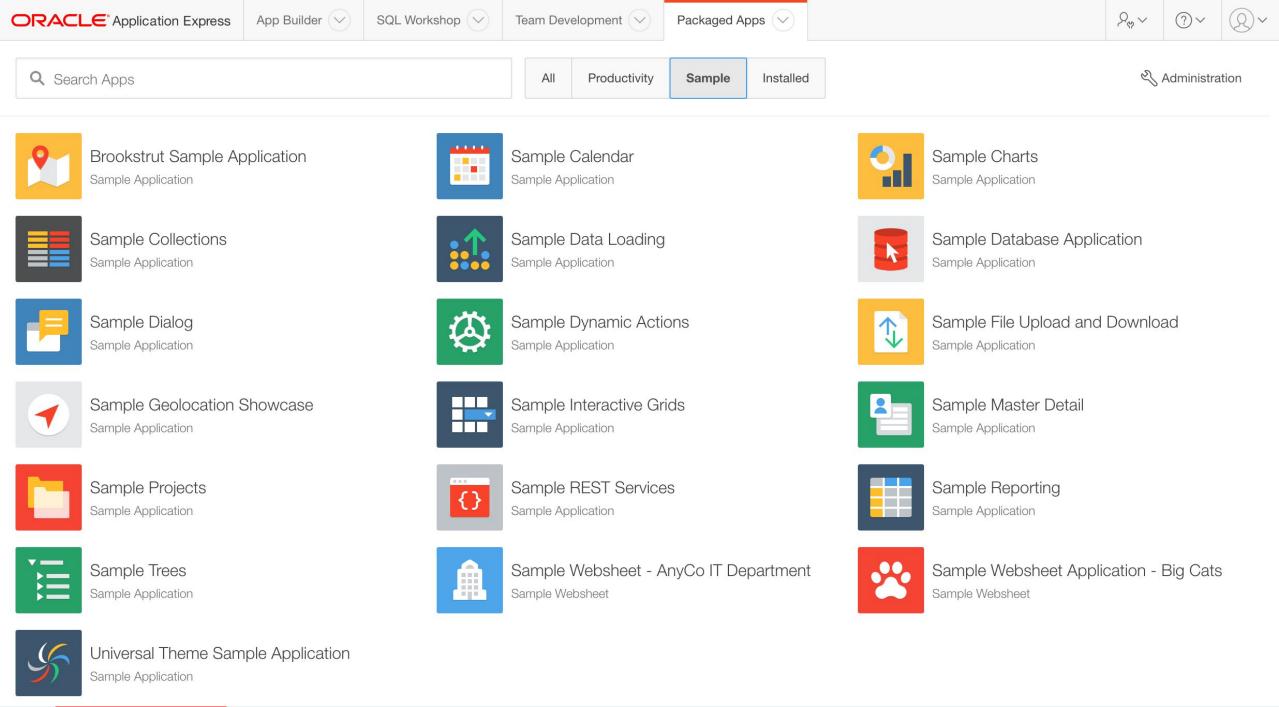

- Legacy Component View deprecated in APEX 5.1
- Will be de-supported and removed in APEX 5.2
- Does not support new 5.1 components like JET charts and Interactive Grid
- Does not support certain new attributes like new dynamic actions attributes specific to Interactive Grids
- Disabled by default, can be re-enabled via user preferences

Agenda

- 1 Oracle Application Express Overview
- Interactive Grid
- 3 Oracle JET Charts
- 4 Universal Theme
- 5 Productivity Improvements
- 6 Packaged Apps
- Calendar

Packaged Apps

New Productivity Apps

- Quick SQL –
 Quick and intuitive way to generate a relational SQL data model
- Competitive Analysis –
 Create side-by-side comparisons which can be scored and charted
- REST Client Assistant –
 Access RESTful services in Database or public services and map to SQL result set columns

Packaged Apps

Significantly Improved Productivity Apps

- P-Track
- Customer Tracker
- Group Calendar
- Live Poll
- Opportunity Tracker

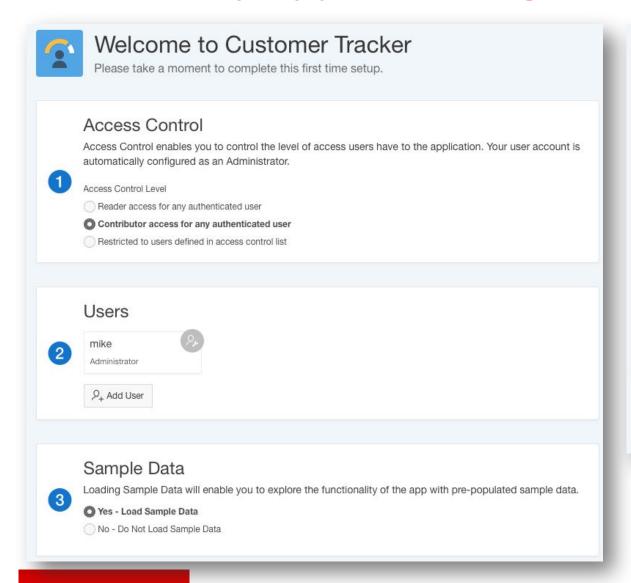

Improvements based on feedback from real-life use cases

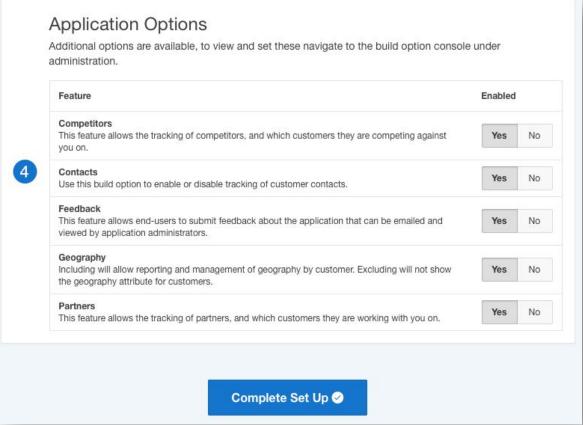

Packaged Apps

New / Improved Sample Apps

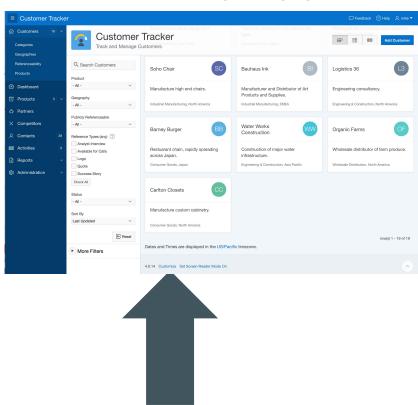

- Sample Interactive Grid –
 Demonstrates read-only, pagination, editing and advanced techniques
- Sample Charts –
 Completely revamped to showcase Oracle JET charts
- Sample Master-Detail –
 Highlights different ways to display related tables, including Interactive Grids
- Sample Projects
- Sample REST Services

Productivity Apps - Getting Started Page

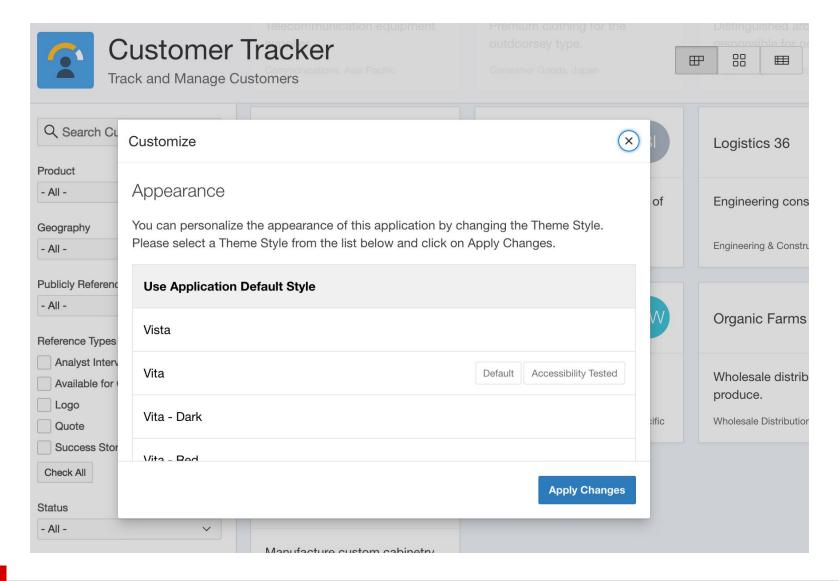

Productivity Apps – Display Customization

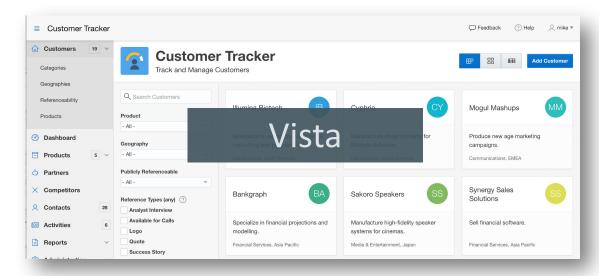

4.0.14 Customize Set Screen Reader Mode On

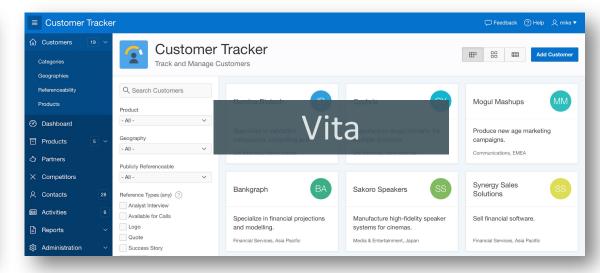

Productivity Apps – Display Customization

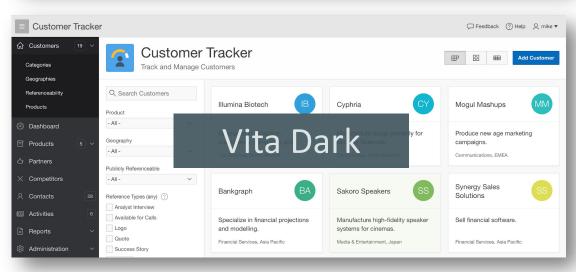

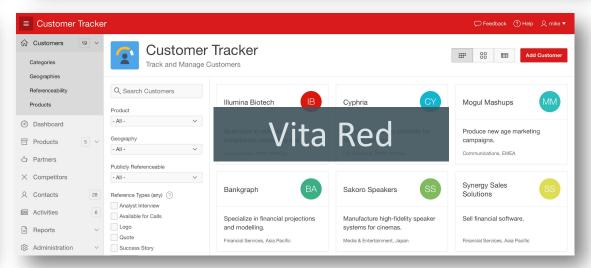

Productivity Apps – Display Customization

Agenda

- Oracle Application Express Overview
- Interactive Grid
- 3 Oracle JET Charts
- 4 Universal Theme
- 5 Productivity Improvements
- 6 Packaged Apps
- 7 Calendar

Calendar

New Functionality

- Inclusive End Date –
 In release 5.0 was exclusive, but now inclusive like other components
- JavaScript Customization –
 Support JS code customization of initialization attributes
- Dynamic Action Events –
 Capture calendar events and define actions against these events
- Keyboard Support –
 Use arrow keys to navigate within the calendar when it has focus

Hardware and Software Engineered to Work Together
