

# \*Shopping

\*First if all I should say that we don't buy expensive clothes, household, gadgets very often. But we need food staff every day, so we need to remember its necessary to have a good meal before going to the shop, because when you are hungry you also buy more than you need.

\*Secondly when you buy clothes, you'd better take a friend or your mum, because they can help you that's the color of the item suits you and say show you right size.

\*So I think that shopping should be reasonable!

**\*Thank you for your  
attention!**
