

My Future Company

Good afternoon. Let me
introduce you to my company.

My company is engaged in the production of toys related to historical themes.

A bit of history

To date, the oldest doll is the one that was found near Brno. Its age is more than thirty five thousand years. This amazing creation of human hands was created from the bones of a mammoth.

A serious step in the creation of the popularization of dolls was made by France's desire to consolidate its position as a trendsetter.

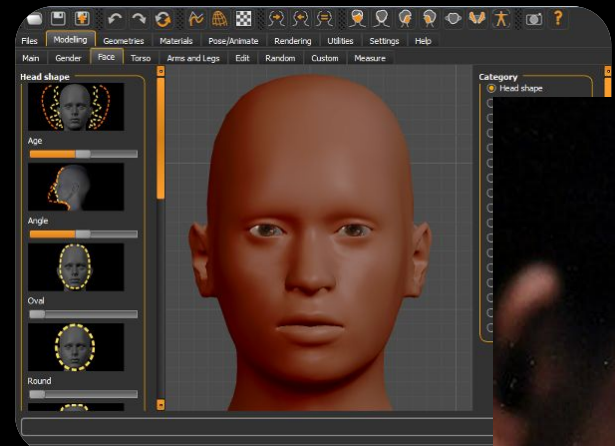

The firm includes, apart from the main office, a toy factory, as well as a chain of shops. Also, the company has its own online store and is responsible for the delivery of toys in more than ten countries around the world.

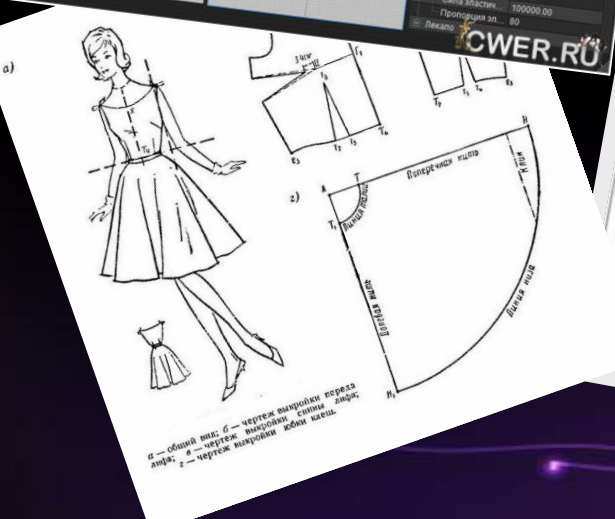

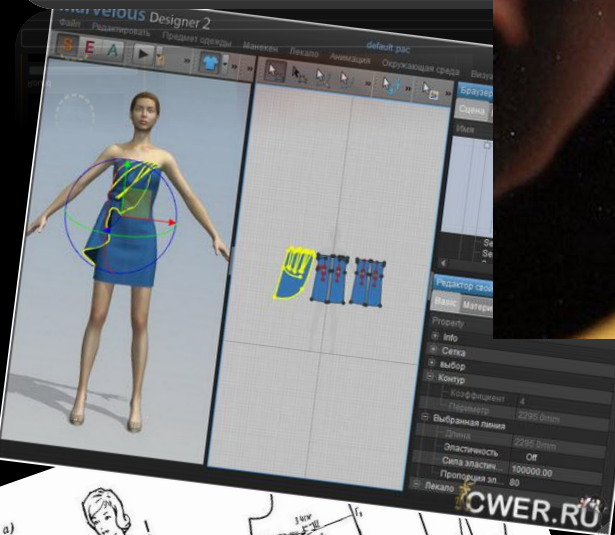

Before starting to manufacture a new toy, my company's specialists analyze all available archival and artistic materials, as well as portraits or statues related to the historical personality.

The creation of a toy begins with the fact that the team of our designers, using modern technologies, creates design and computer models of new developments.

OUR DOLLS ARE VERY REALISTIC. IN ADDITION, WE ARE ENGAGED IN THE RECONSTRUCTION OF OLD TOYS.

As for future plans, my firm is currently preparing to conclude a contract with a company that specializes in creating historical costumes. You can hear more about this company in the next presentation.

*And so, the presentation came to an end.
Thank you for attention.*
