

# About myself

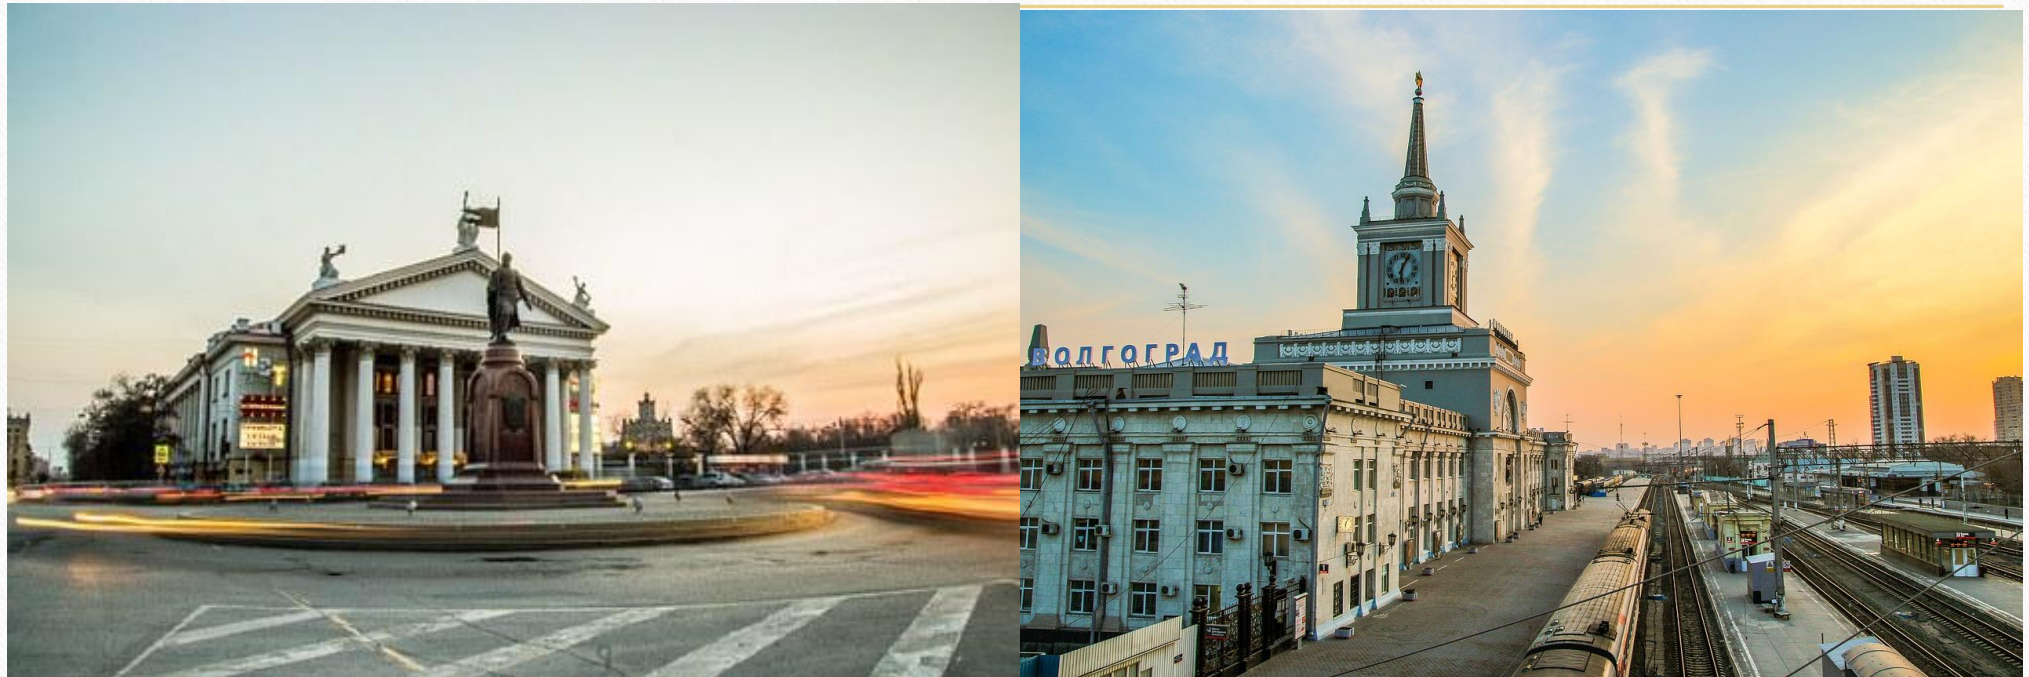

---

Anastasia Vlasova

Hello dears! My name is Anastasia  
Vlasova. I am 25 years old.

I came from the city of military glory of Volgograd. I'd like to tell you a little about him.

Volgograd used to be called Tsaritsyn, then it was renamed Stalingrad.

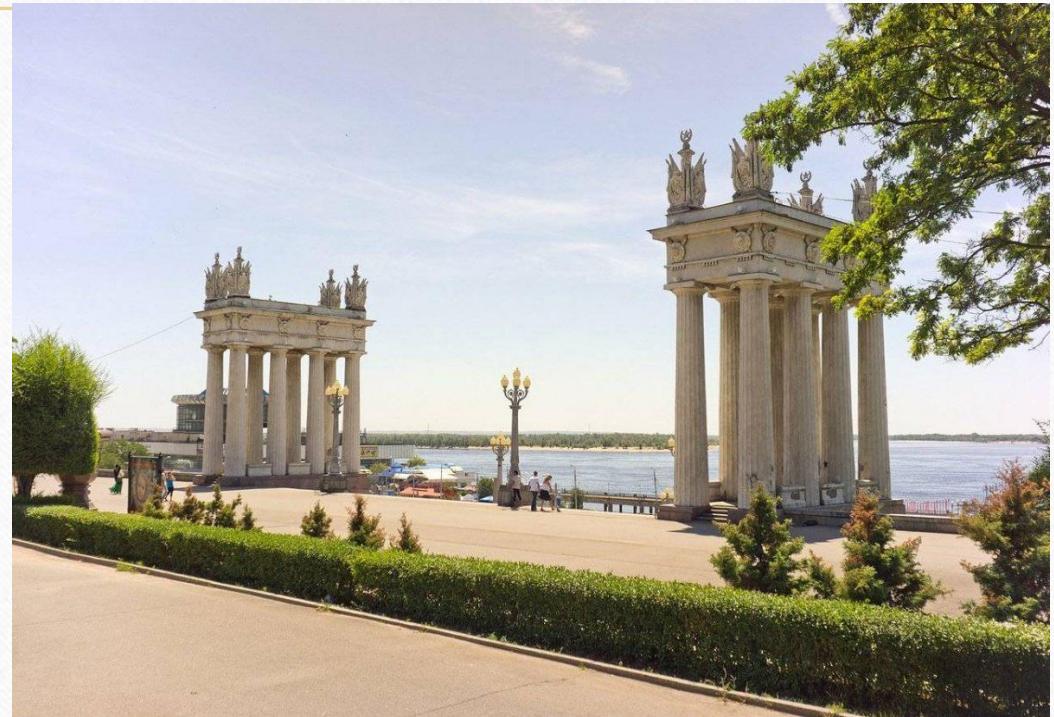

During the war thanks to the courage and sacrifice of the defenders of Stalingrad were able to stop the advance of the enemy. The battle of Stalingrad contributed to the beginning of a critical period and led to the Victory of Soviet troops over Nazi Germany. After the war, the city was virtually wiped out. The Soviet people made a lot of efforts to restore the city.

During this period, the city began the construction of social and cultural sites that have become a local landmark. The Museum-panorama “battle of Stalingrad”, the memorial complex on Mamayev Kurgan headed by the sculpture Motherland, river station, underground trams-still attract the attention of hundreds of thousands of tourists visiting memorable places and paying tribute to the Soviet war — liberators.

Today the city of Volgograd is the administrative center of the region. The most beautiful city, situated on the banks of the Volga river. Everything is beautiful here-people, houses, parks and alleys, public transport and even roads. This year, the city hosted the world Cup. This is my home, my family lives here.

My family: Dad, Mom, Sister, me and brother. My mother works as an accountant at school. Dad works as a dispatcher at the airport. My sister is an auditor at the firm. Brother to go to University for astrophysics. We live in a large two-storey house with a garden. Our garden was always full of flowers in spring and summer. We also had a few Apple and cherry trees. We have a lot of Pets - two cats, a dog and a spider.

Now I live in the biggest city of Russia and its capital Moscow. My first education was as a designer-architect. At the moment I work in the architectural Bureau. I develop architectural and planning solutions for houses and interiors.

I am fond of painting, so I like to visit art exhibitions. I'm meeting some friends tonight, and we're going to the movies. And after the theater sit in any cafe or McDonalds and exchange impressions about the film.

Sometimes to meet with friends fails, then the whole evening I spend with my niece and older sister. We go to the theater or the concert hall together. I love my day off, because you can relax and stock up on the whole week.

This summer I entered the master's degree at the teacher DPI. This is new, interesting and a bit difficult for me. I love to learn and I like it. I met new teachers and classmates. Classes make me feel better.

- I really hope that in the future I will be able to offer teaching this wonderful art to children. When I become a teacher, I would like to share my knowledge and love for art with the younger generation. Another reason why I would like to become a teacher is related to the profession itself and its positive aspects. In my opinion, every good teacher teaches his students not only one subject, but also different life lessons.

---

To sum up, I would like to say that it is very important to have some Hobbies. They don't let us get bored and make us happy. I feel that in the near future my hobby will be English. )

Thank you for listening
