

Hello

Here is where your presentation begins

Whoa!

It could be the part of the presentation where you can introduce yourself, write your email...

“This is a **QUOTE**. Words full of wisdom that someone important said and can make the reader get inspired.”

–Someone famous

Agenda

- 01** Title of your first step
- 02** Title of your second step
- 03** Title of your third step
- 04** Title of your fourth step

1. This is a great headline

And this is the subtitle that makes it comprehensible

The **slide title** goes here!

Do you know what helps you make your point clear?
Lists like this one:

- *Because they're simple*
- *You can organize your ideas clearly*
- *And because you'll never forget to buy milk!*

And the **most important thing:** the audience won't miss the point of your presentation

Maybe you need to divide the content

MERCURY

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it's only a bit larger than our Moon. The planet's name has nothing to do with the liquid metal since it was named after the Roman messenger god

VENUS

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot—even hotter than Mercury—and its atmosphere is extremely poisonous. It's the second-brightest natural object in the night sky after the Moon

You could use **three columns**, why not?

MARS

Despite being red, Mars is a cold place, not hot. It's full of iron oxide dust, which gives the planet its reddish cast

JUPITER

It's a gas giant and the biggest planet in our Solar System. Jupiter is the fourth-brightest object in the sky

MERCURY

Mercury is the closest planet to the Sun and the smallest one in our Solar System. It's only a bit larger than our Moon

A picture always reinforces the concept

Images reveal large amounts of data quickly, so remember: use an image instead of long texts. Your audience will appreciate that

**A picture is worth a
thousand words**

Text with image background

Combining a photo with a big text will catch your audience's attention and will explain your message in a better way

Awesome words

Because **key words** are great for catching your **audience's attention**

Infographics make your idea understandable...

01

MARS

Despite being red, Mars is a cold place, not hot

02

NEPTUNE

Neptune is the farthest planet from the Sun

03

VENUS

Venus has a beautiful name, but it's terribly hot

04

SATURN

It's a gas giant, composed mostly of hydrogen and helium

JUPITER

Jupiter is a gas giant and the biggest planet in our Solar System

VENUS

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot, even hotter than Mercury

MERCURY

Mercury is the closest planet to the Sun and is only a bit larger than our Moon

MARS

Despite being red, Mars is a cold place, not hot. It's full of iron oxide dust

If you want to modify [this graph](#) click on it, follow the link, change the data and replace it

MERCURY

Mercury is the closest planet to the Sun and the smallest one in the Solar System

VENUS

Venus has a beautiful name, but it's terribly hot, even hotter than Mercury

MARS

Despite being red, Mars is a cold place, not hot

JUPITER

Jupiter it's a gas giant and the biggest planet in our Solar System

... and the same goes for **tables**

	MASS (earths)	DIAMETER (earths)	SURFACE GRAVITY (earths)
MERCURY	0,06	0,38	0,38
SATURN	0,11	0,53	0,38
JUPITER	95,2	9,4	1,16

This is an awesome **map**

01

SATURN

It's a gas giant,
composed mostly of
hydrogen and helium

02

MARS

Despite being red, Mars
is a cold place, not hot

03

MERCURY

Mercury is the closest
planet to the Sun

04

JUPITER

It's a gas giant and the
biggest planet in our
Solar System

Add some **diagrams** to explain your steps

STEP ONE

Let your audience understand your first step

STEP TWO

Let your audience understand your second step

STEP THREE

Let your audience understand your third step

STEP FOUR

Let your audience understand your fourth step

STEP FIVE

Let your audience understand your fifth step

Diagrams are really useful

TEXT 01

VENUS

Venus has a beautiful name, but it's terribly hot, even hotter than Mercury

TEXT 02

MARS

Despite being red, Mars is a cold place, not hot. The planet is full of iron oxide dust

TEXT 03

SATURN

Yes, this is the ringed one. It's a gas giant, composed mostly of hydrogen and helium

TEXT 04

MERCURY

Mercury is the closest planet to the Sun and is only a bit larger than our Moon

A **timeline** always works fine

DAY 2

Venus has a beautiful name, but it's very hot

DAY 4

Saturn is composed of hydrogen and helium

2018

2019

2020

2021

DAY 1

Mercury is the closest planet to the Sun

DAY 3

Despite being red, Mars is a cold place

Icons will help you explain your idea

TEXT 01

Mercury is the closest planet to the Sun and the smallest one in the Solar System

TEXT 02

Venus has a beautiful name, but it's terribly hot, even hotter than Mercury

TEXT 03

Despite being red, Mars is a cold place, not hot. It's full of iron oxide dust

TEXT 04

Jupiter it's a gas giant and the biggest planet in our Solar System

4,498,300,000

Big **numbers** catch your audience's **attention**

333,000.00

Earths is the Sun's mass

24h 37m 23s

is Jupiter's rotation period

386,000 km

is the distance between the Earth and the Moon

Do you need to add some **values?**

01

DAY 1

Mercury is
the closest
planet to the
Sun

02

DAY 2

Venus has a
beautiful
name, but it's
terribly hot

03

DAY 3

Despite
being red,
Mars is a
cold place

04

DAY 4

Jupiter is the
biggest planet
in our Solar
System

Sometimes, reviewing concepts is a good idea

MERCURY

Mercury is the closest planet to the Sun and is only a bit larger than our Moon

VENUS

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot

MARS

Despite being red, Mars is a cold place, not hot. The planet is full of iron oxide dust

JUPITER

It's the biggest planet in our Solar System and the fourth-brightest object in the sky

SATURN

Yes, this is the ringed one. It's a gas giant, composed mostly of hydrogen and helium

NEPTUNE

Neptune is the farthest planet from the Sun and the fourth-largest in our Solar System

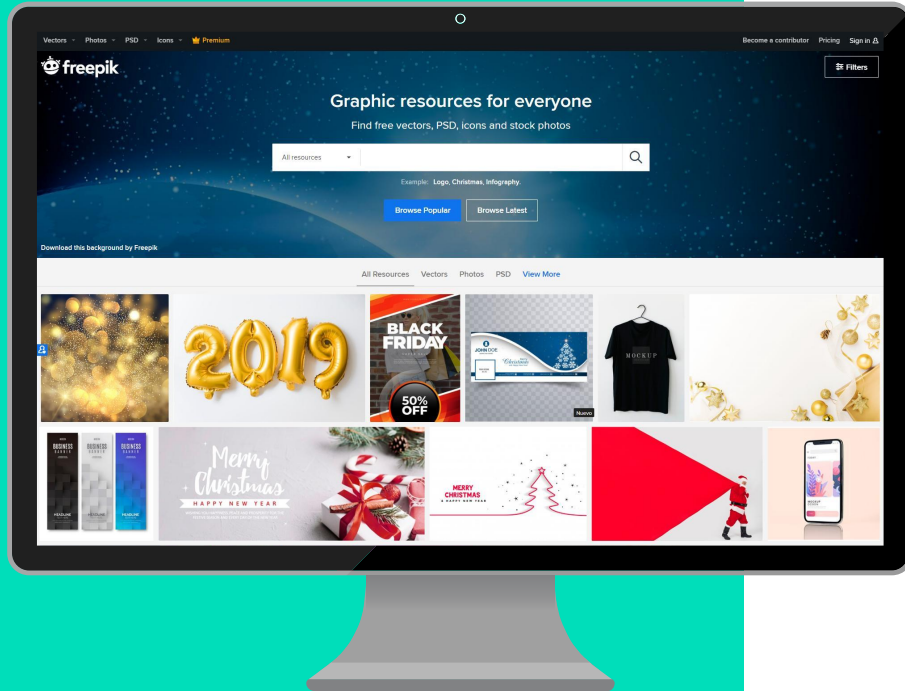

CONCLUSION 01

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it's only a bit larger than our Moon. The planet's name has nothing to do with the liquid metal since it was named after the Roman messenger god

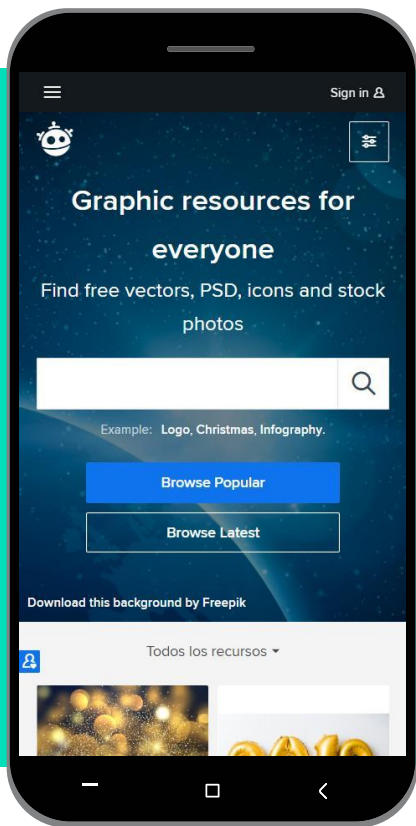

CONCLUSION 02

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot—even hotter than Mercury—and its atmosphere is extremely poisonous. It's the second-brightest natural object in the night sky after the Moon
