

Secondary education in Kazakhstan

Innovations:

1. the five-day training
2. the updated program in grades 1,2,5,7
3. the transition to 12-year education
4. the transition to trilingualism
5. the requirements for school uniforms.
6. the two-stage UNT
7. the lack of current estimates

The main problems in schools of Kazakhstan:

1. the logistical challenges
2. the scientific and basic problems

Ways to solve problems:

1. The establishment of a special Commission responsible for carrying out the tasks presented and closely monitoring the allocation of the budget.
2. The allocation of funds from the national budget, to fully cover the costs.
3. The creation of a development plan.
