Service-Oriented Programming (SOP)
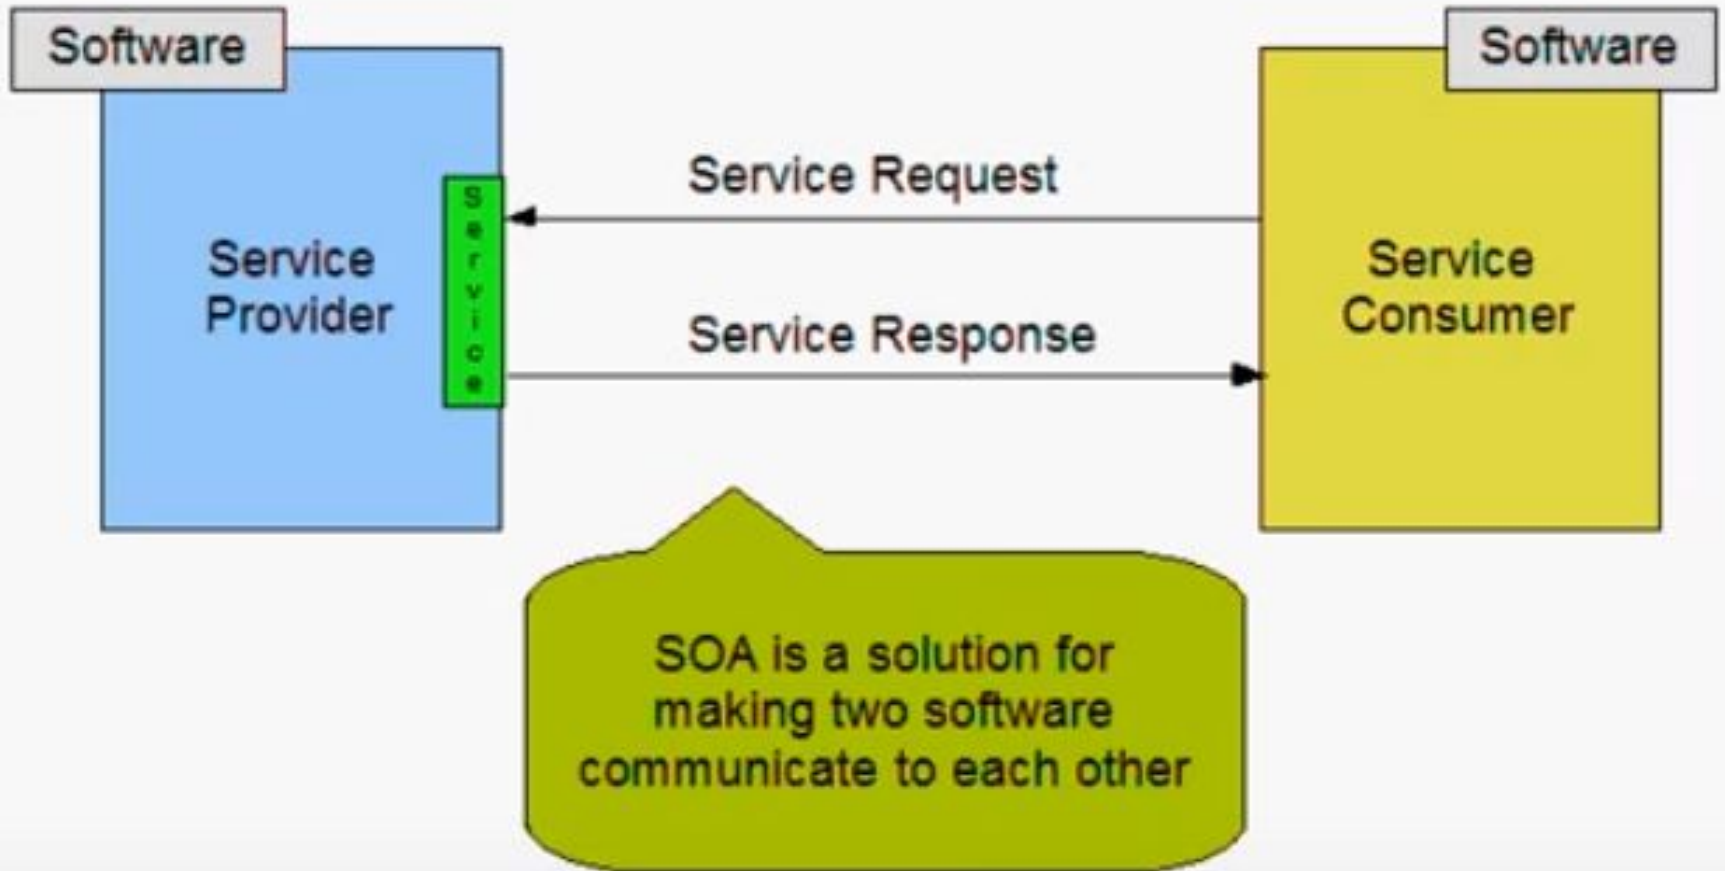

Service-Oriented Architecture (SOA)

Web Services

Service-Oriented Programming (SOP)

- **SOP** is a programming paradigm.

- Uses "services" as the unit of computer work, to design and implement integrated business applications and mission critical software programs.

- Inherently designed to reuse existing services.

- Naturally supports software reuse, which in turn helps to improve software quality.

SOA Example

Web Services

- Problem / Solution

- What is a Web Service?

- Why Web Service?

- Examples

- Consuming a Web Service.
