

RUSSIAN UAVS PRESENTATION

By Gnr Novikov

Points:

- FORPOST ISR (2014)
- SUKHOI ZOND SERIES (2015)
- KAMOV KA-175 (2016)

***Note: UAV-Unmanned Aerial Vehicle OR
Безпилотник (Bezpilotnik)**

A young man with brown hair is shown from the chest up, wearing a light-colored button-down shirt. He has his eyes closed and his hand is covering his mouth as if he is yawning. A large, semi-transparent red 'X' is superimposed over his face. The background is a plain, light gray.

PAY ATTENTION!
YOU WILL BE TESTED!

FORPOST ISR

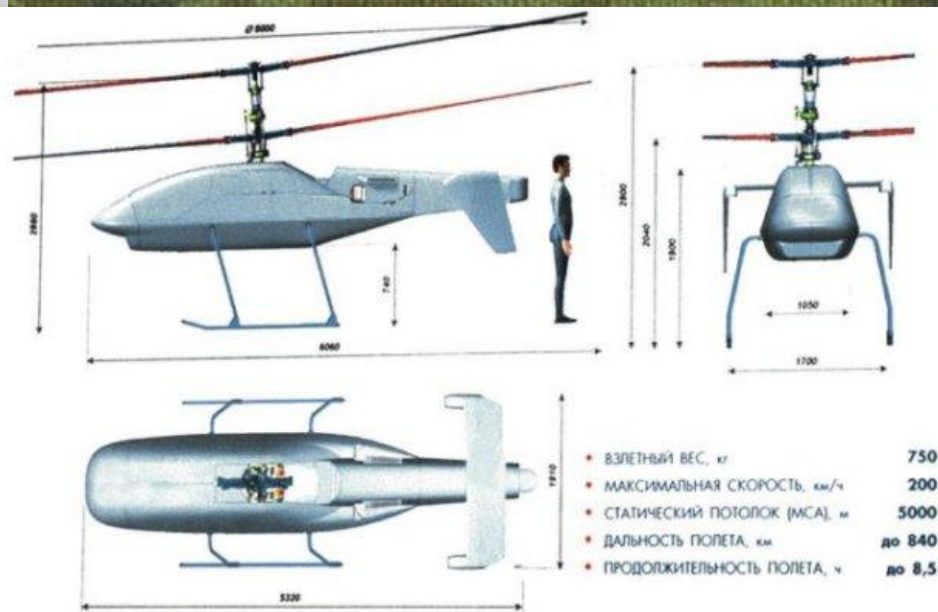

Forpost ISR Unmanned Reconnaissance Drone (2014) The Forpost is a Russian license-produced version of the Israeli Searcher II drone

SUKHOI ZOND SERIES

The Sukhoi Zond series of UAVs will cover a spectrum of useful communications relay and environmental monitoring roles for Russia.

KAMOV KA-175 UAV HELI

Kamov unveiled plans for their Ka-175 unmanned helicopter drone in August of 2014.
