

HUMAN-COMPUTER INTERACTION

Human-Computer Interaction (HCI) is a field of study focusing on the design of computer technology and, in particular, the interaction between humans (the users) and computers. It encompasses multiple disciplines, such as computer science, cognitive science, and human-factors engineering

It's perhaps easy to see that until the mid to late 1970s that this discipline wasn't particularly important.

Computing moved off the desktop to be everywhere all the time. Computers are in phones, cars, meeting rooms, and coffee shops.
