# Rock music

**Rock music has its own distinctive features, namely, hard rhythm, monotony, high volume, light effect live. They are just not the best way affect our body.**

**As a result of prolonged exposure to rock music, the following States are possible :**

**aggressiveness;  
rage;  
anger;  
depression;  
fear;  
suicidal;**

**involuntary movement of muscles;  
the lack of concentration and ability to clearly make decisions;  
desire constant sound of rock music;**

**Rock music can be helpful and relaxing,  
but at the same time dangerous when**

**"excessive" listening to and attending  
rock concerts.**

**Thank you for your  
attention!**
