The common components of phone

- A **battery**, providing the power source for the phone functions.
- An input mechanism to allow the user to interact with the phone. The most common input mechanism is a **keypad**, but **touch screens** are also found in most smartphones.
- Basic **mobile phone services** to allow users to make calls and send text messages.
- All **GSM** phones use a **SIM card** to allow an account to be swapped among devices.
