Classification of geographical and natural phenomena
Peculiarities of the relief
Flora and Fauna
Natural resources
Geographical phenomena as symbols

Geographical and natural phenomena

- are divided into items denoting: the relief, flora, fauna, cultivated plants, natural resources.
- A special place is occupied by words which serve as symbols of a definite culture.

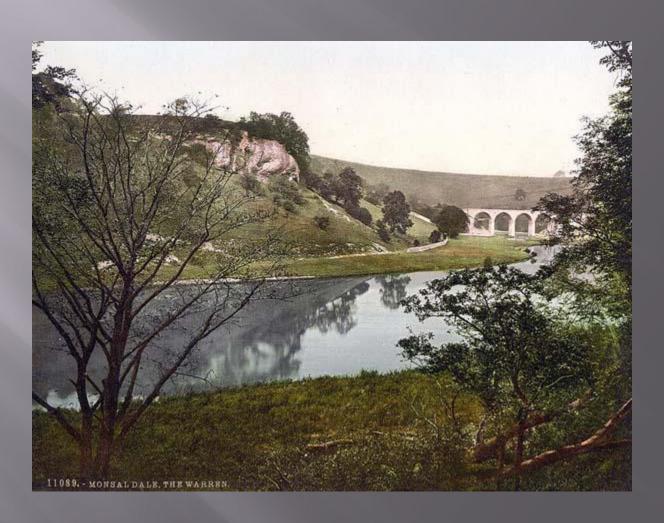

the relief of the British Isles

- *heath* (area of flat uncultivated land covered with shrubs or heather),
- dale (valley, esp. in Northern England),
- fen country (marshy land in the east of England),
- moor (marshy land),
- loch (Sc. lake),
- white cliffs (chalk cliffs).

Heath

Monsal Dale, the Warren, Derbyshire, England.

The Fens

Ilkley Moor, North Yorkshire, England.

Loch Ness

White cliffs, Dover, England

the USA and Canada

- canyon (deep narrow steep-sided valley usually with a river flowing through it),
- prairie (wide area of level grass land),
- · muskeg, cree (marshy land).
- · Among those more typical of Canada are crevasse (deep open crack in the ice),
- butte (steep hill in the middle of the valley),
- *cache* (place for hiding food, treasure or weapons).

Crevasse

Red Rock Butte in Monument Valley, Arizona

Cache

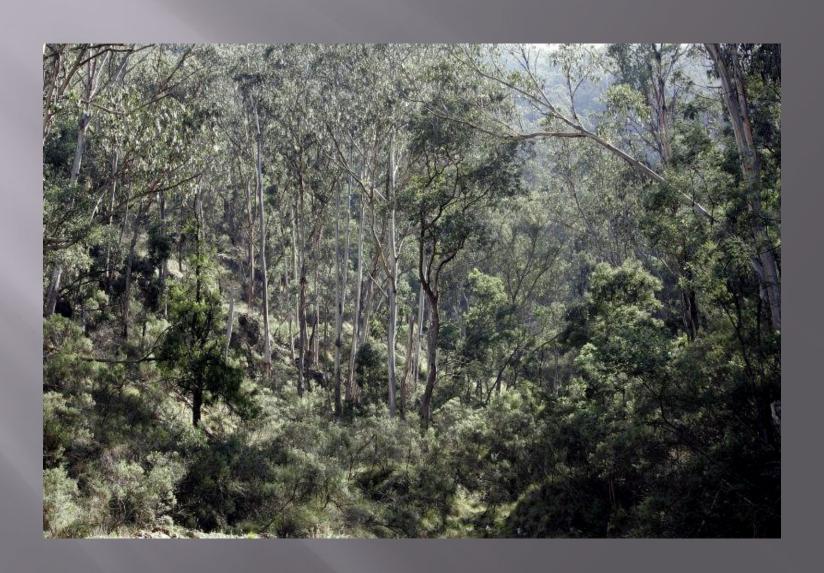

Webster's 1913 dictionary defines cache as: "a hole in the ground, or hiding place, for concealing and preserving provisions which is inconvenient to carry."

- The explorer cached important items (food and gunpowder) for his return trip. The trader could store some of his trade goods for later retrieval. The trapper needed a place to hide his beaver pelts until he was ready to transport them to the markets back east.
- A successful cache had to be built in secrecy, in a safe location, and with the utmost care to avoid leaving evidence. Some caches did not succeed. One of the most common reasons was flooding. In the early 1800's only rivers provided main travel routes. Caches built on or near riverbanks were sometimes ruined by rising waters. Some caches were lost to thieves if they were not well guarded during construction or if evidence was carelessly left behind. There may still be some caches out there today waiting to be rediscovered if the original owners hid them so well they couldn't find them again!

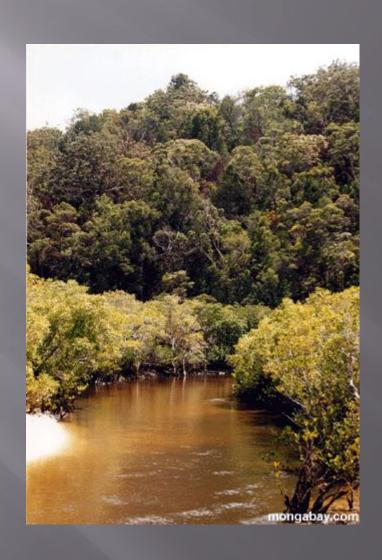

Australian and New Zealand relief

- bush (wild uncultivated area),
- creek (a river which disappears in dry seasons).
- · Australia only: bore drain (natural well), scrub (land covered with undeveloped trees or shrubs), out-back (remote inland area where few people live), soak (a hole in the ground where water gathers after the rain), ground fire (kind of forest fire), billabong (a gulf at the mouth of the river), namma hole (a deep hollow in the ground or the rock where the water is found), bluestone (a stone from which many houses in Australia are built),

Shamrock

Thistle

In the USA

• Sagebrush (полинь) is used to name tourists (sagebrushers) who travel at the foot of the Rocky Mountains, Nevada (the Sagebrush State) or rebellion of the farmers in the Western States against the federal control of land, water and natural resources (Sagebrush Rebellion)

Canada

has the maple and the beaver as symbols and is often referred to as The Land of Maple Leaf. The silver birch, the moose, the husky (північна лайка) and caribou (kind of deer) are other bright symbols. Some regions of the country got their names from the names of the animals, e.g. Cariboo (a kind of deer), Baccalaas (from baccalao – cod), Beaver Country.

Australian flora and fauna as symbols

waratah, kangaroo paw, pink common heath, Southern blue gum, Cooktown orchid, Sturt's desert pea, Sturt's desert rose, Piping Shrike, platypus (утконіс), kookaburra (a mocking-bird), Leadbeater's Possum (різновид опосума), Helmeted Honeyeater (a bird), koala, Hairy-nosed Wombat, black swan. Australia is traditionally associated with a lyrebird and gum (a tree). People often call Australia Kangarooland or Land of Wattle.

New Zealand

macrocarpa (a kind of a pine tree brought from California after World War I) has become a poetic symbol of the country and its name is widely used in poetry. One more floristic symbol of New Zealand is a yellow flower of kowhai-tree which has a very unusual form and grows all over the country.
