# National Park of Ukraine

The National Park is not just rivers, forests, mountains, or natural phenomena. This is a place of a special, exceptionally beautiful nature of an individual country. They are carefully protected from destructive human exposure and at the same time open to anyone who wants to enjoy their beauty.

# Dermansk-Ostroh National Nature Park

Dermansko-Ostroh National Nature Park - protected area, national natural park in Ukraine. It is located on the territory of Zdolbunivsky (partly) and Ostrohsky districts of Rivne oblast.

The park is located in the eastern, eastern part of the Lesser Polesye - Ostroh valley. Covers the territory of the floodplain of the Zbininka River, which flows between the views of the hill of the Mizotsky Ridge and the Kremenets Mountai Here the narrow strip of Polissya landscapes at the bottom of the river valley is surrounded by landscapes characteristic of the forest-steppe zone within the two hills - Volyn and Podolsk. Flora of the park has 861 species of plants, mikobiota - 64 species, and fauna - 485 species. There are 49 plant species growing and 52 species of animals are included in the Red Data Book of Ukraine.

The natural park was created on December 11, 2009 in accordance with the decree of the President of Ukraine Viktor Yushchenko in order to preserve valuable natural territories and historical and cultural objects. The territory of the national natural park "Dermansko-Ostrozky" is agreed in accordance with the established procedure to include 5448.3 hectares of state-owned land, namely: 1647.6 hectares of land provided (including removal from land users) to the national natural park for permanent use, and 3800.7 hectares of land, which are included in its composition without withdrawal.

Thank you  
for  
attention
