TO BUILD RELATIONSHIP WITH ENTERPRISE CUSTOMERS

Everybody is a genius.
But if you judge a fish
by its ability to climb a tree,
it will live its whole life
believing that it is stupid.

– Albert Einstein

@ SaaStr Annual 2018

Q: What client structure you have

Brian Hulligan: "We have roughly equal portions in small (<50 ppl), medium (50-200) and *enterprise (200+ ppl)* segments"

Enterprise is inaccessible without **outbound sales machine**

ICP: ENTERPRISE VS SMB

SMB

- In a constant search how to survive
- Eager to learn
- Free is good
- <\$100 is ok if it's useful
- \$100-\$1000 should have ROI
- Discounts are good
- Swag is good

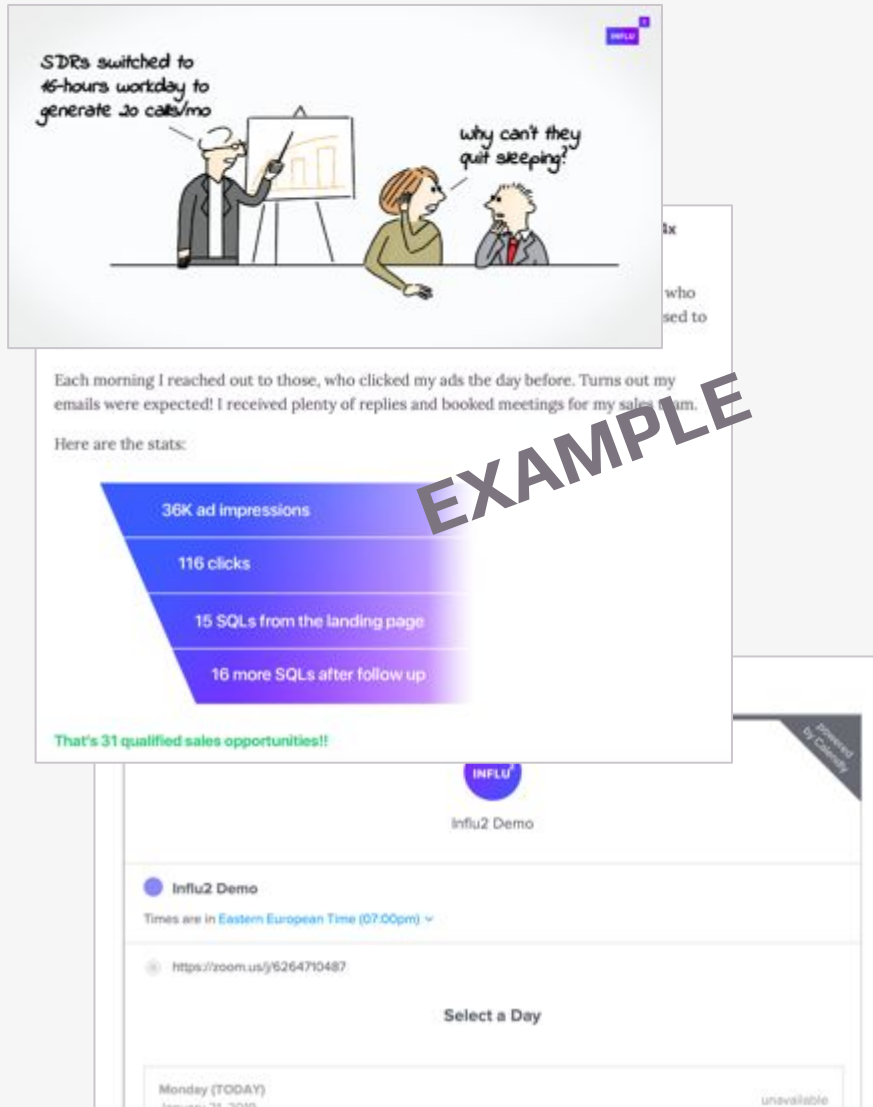

ENTERPRISE

- Expects personal treatment
- Never fills out leadforms, goes to webinars, etc.
- Expect sales people to come
- Overwhelmed with offerings
- Looks for validation before trying
- Risk averse
- Anything below \$10K is stationery

DOLPHIN: Sales Development Aircover Campaign

INFLU

2

- 2000+ targets - we now use 6000
- 2-3 campaigns per month
- Mention function/industry e.g. "Fintech CMO guide to XYZ"
- Relevant content/case/article
- Call-to-action to talk on the landing page
- SDRs leverage click signals

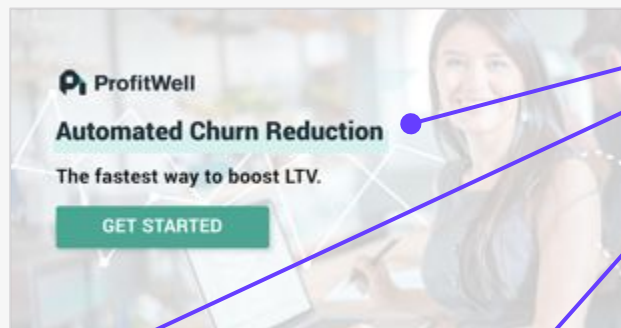

EXPECT:

- 3x-5x better response rate on intent signals
- 20-30% improvement in SDRs productivity

SALES DEV AIRCOVER CAMPAIGN: PROFITWELL

Banners:

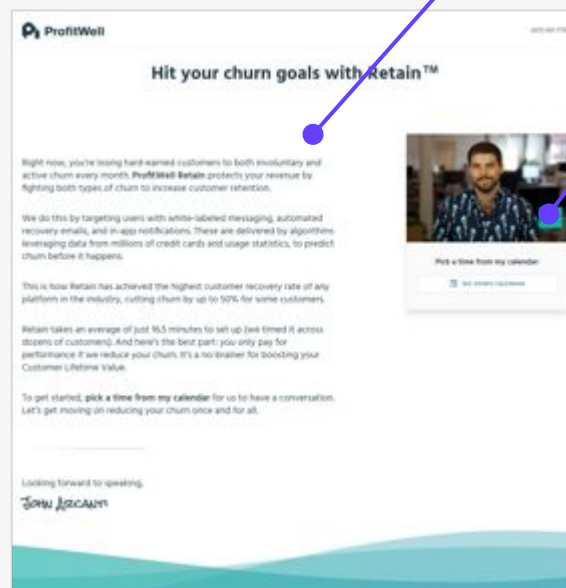

Clear value proposition

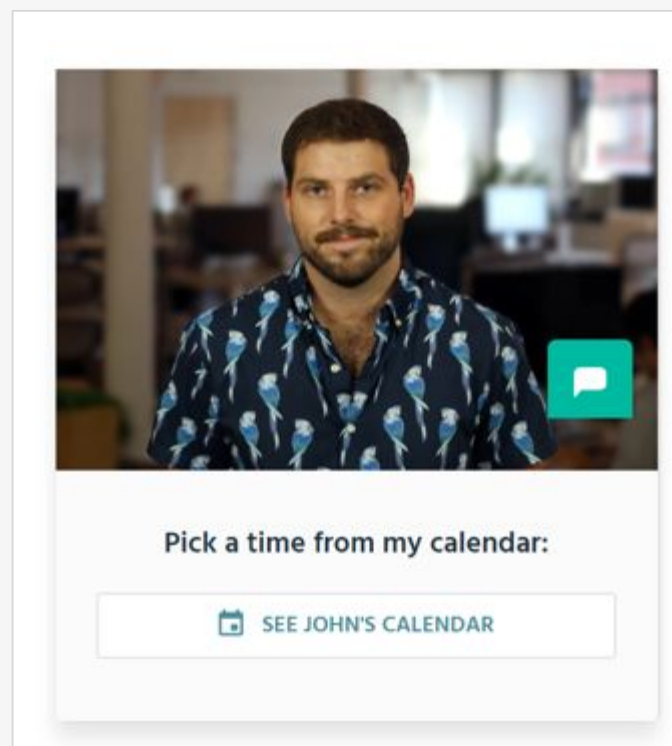

Right now, you're losing hard-earned customers to both involuntary and active churn every month. **ProfitWell Retain** protects your revenue by fighting both types of churn to increase customer retention.

Landing page:

Call-to-action to book a meeting

SHARK: 1-2-1 ABM Campaigns

**Is Software a Black Box
at Bank of America?**

By analyzing data from your existing systems, Seerene is able to deliver consistent clear-cut KPIs.

[TURN ON THE LIGHTS](#)

Seerene is a code+people management platform that lets CIOs and IT executives see across all of their software initiatives, to easily understand things like effort, costs, and risks. They derive this insight by looking at all the data in the code repositories and source control systems. It is easy to setup, it doesn't require any change in behavior, and no code leaves the firewall.

Seerene is used by Fortune 500 companies including SAP, T-Mobile, and Adidas.
