

Long Term Cooperation between Huawei and SPBU: **Training of Highly Specialized AI R&D Researchers**

DESCRIPTION

Long Term Cooperation between Huawei and SPBU:

Long Term Training of Highly Specialized AI R&D Researchers

Project proposed by

Dr. Ovanes Petrosian

Abstract:

The aim of the project is to train highly specialized AI R&D Researchers for Huawei Saint-Petersburg research center. Project will be located in Saint-Petersburg State university and will be oriented on the most outstanding students with high research capabilities. The result of the project in long perspective will be 15-20 PhD's in AI with special skills for Huawei. The method of the project is to choose 15-20 most outstanding students and give them research topics for bachelor, master and PhD Thesis from Huawei, then to track them by quarterly reports in Huawei Saint-Petersburg research center (each student will have a KPI)

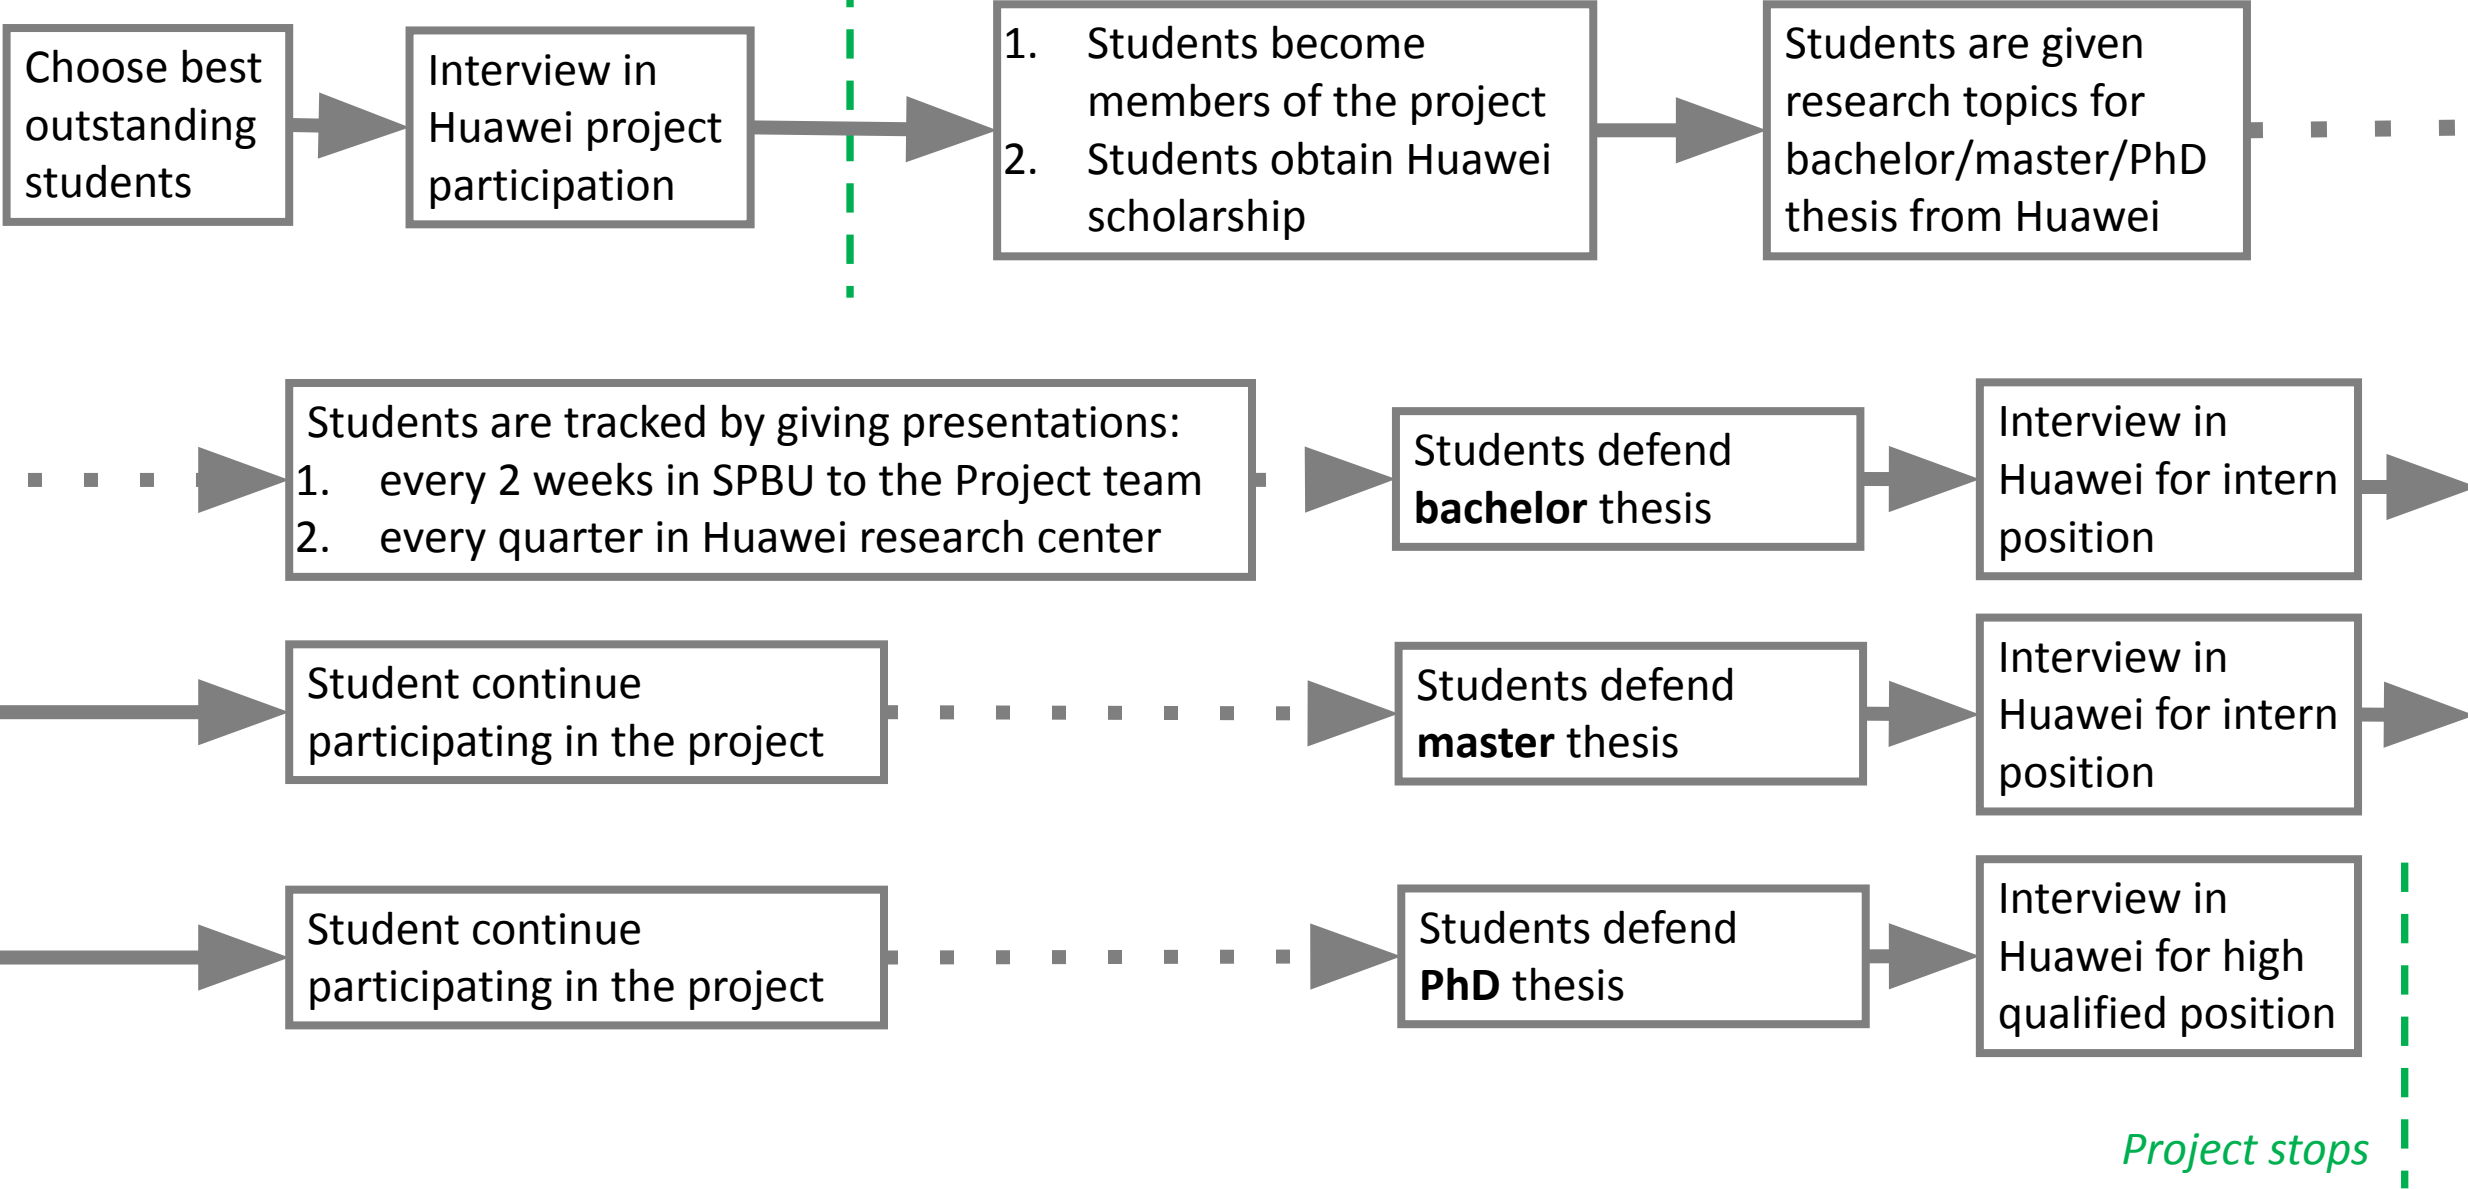

Result of Project:

The result of the project in long perspective will be 15-20 PhD's in AI with special skills for Huawei.
