Проект

Time Capsule: School of Future

Выполнили:
Горбовская Ева,
Ельцова Мария,
учащиеся 4б класса

Руководитель:
Симанова Ирина Павловна

Глазов 2018

The Purpose of the Project

- to create a time capsule;
- to preserve our thoughts on school life in the future for new generations.

Our Main Tasks

- to model the time capsule;
- to write a message to future generations;
- to decide what aspects of school life in 2018 will be changed;
- to think of the way new advances will function;
- to carry out a poll about school life in 100 years.

Stages of the Project: Preliminary Step

- we set the problem, the purpose and the tasks;
- we chose the title for our project;
- we share responsibilities;
- we set a deadline.

Stages of the Project: Information Gathering

We raised the following issues:

- what will homework be like in the future;
- how will children deal with their home assignment;
- who will teach children;
- what gadgets will be used to provide the best education;
- will there be any books in the future and if so, what will books be like;
- how will children communicate and make friends with their classmates and schoolmates;
- will children be healthy in the future and what will they do to keep fit?

Stages of the Project: Presentation

How to present our ideas?

- paper and crayons

What if there will not be paper in future?

- PowerPoint presentation

Will it be interesting to read such a message?

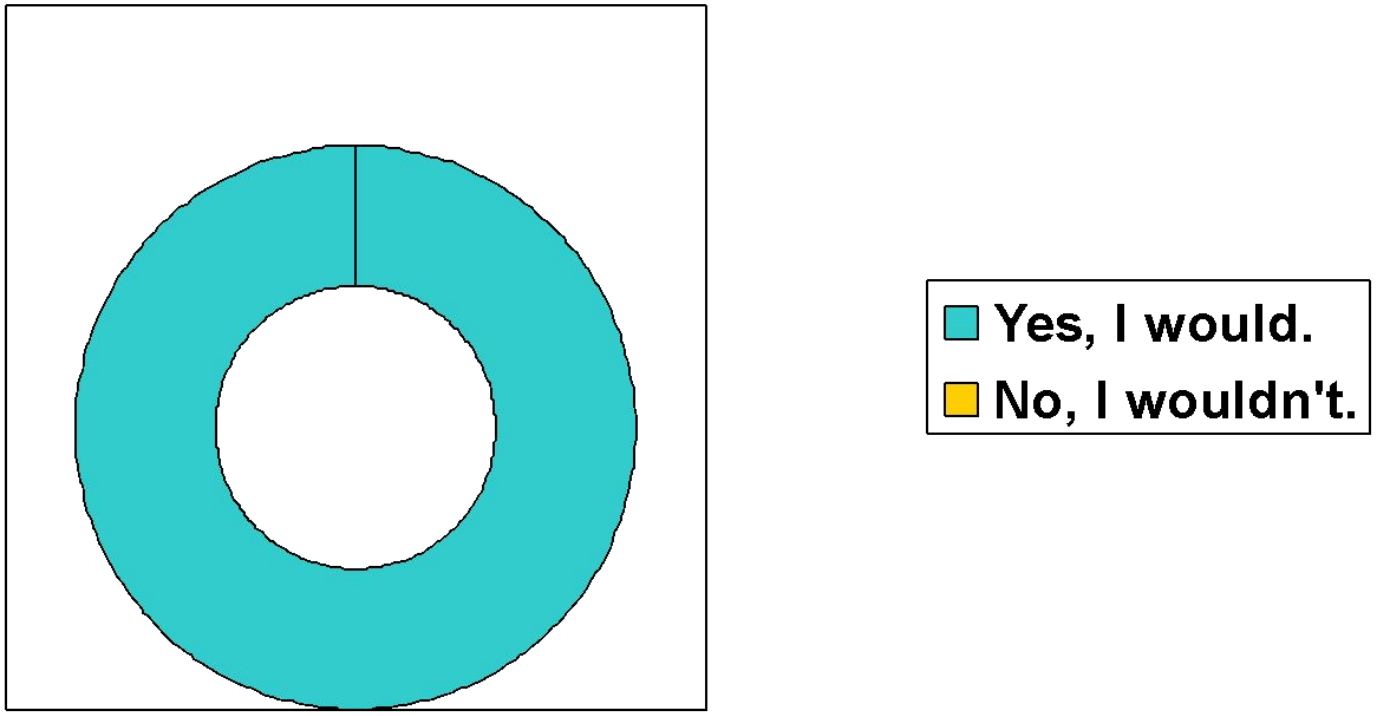
- video message

Stages of the Project: Reflection

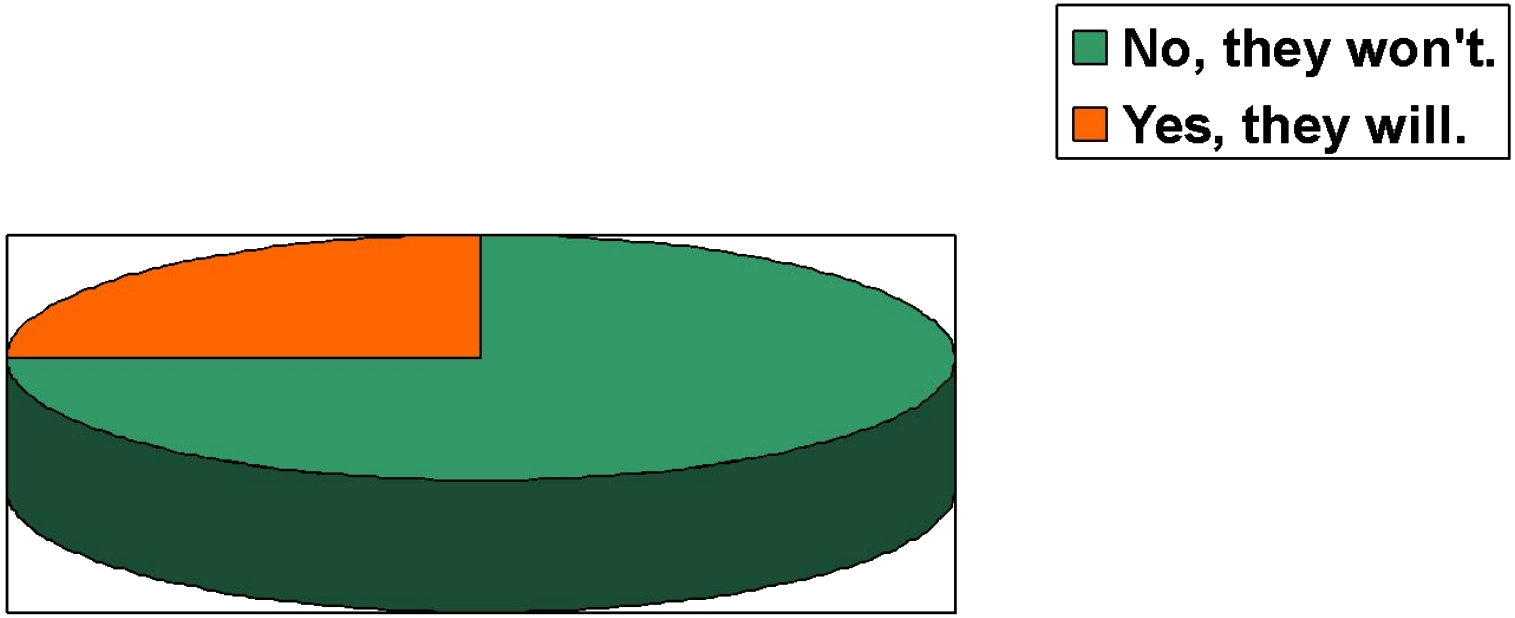
- We estimated our work: what is good and what needs to be worked out.

Our Survey:

Would like to find a time capsule and read its message?

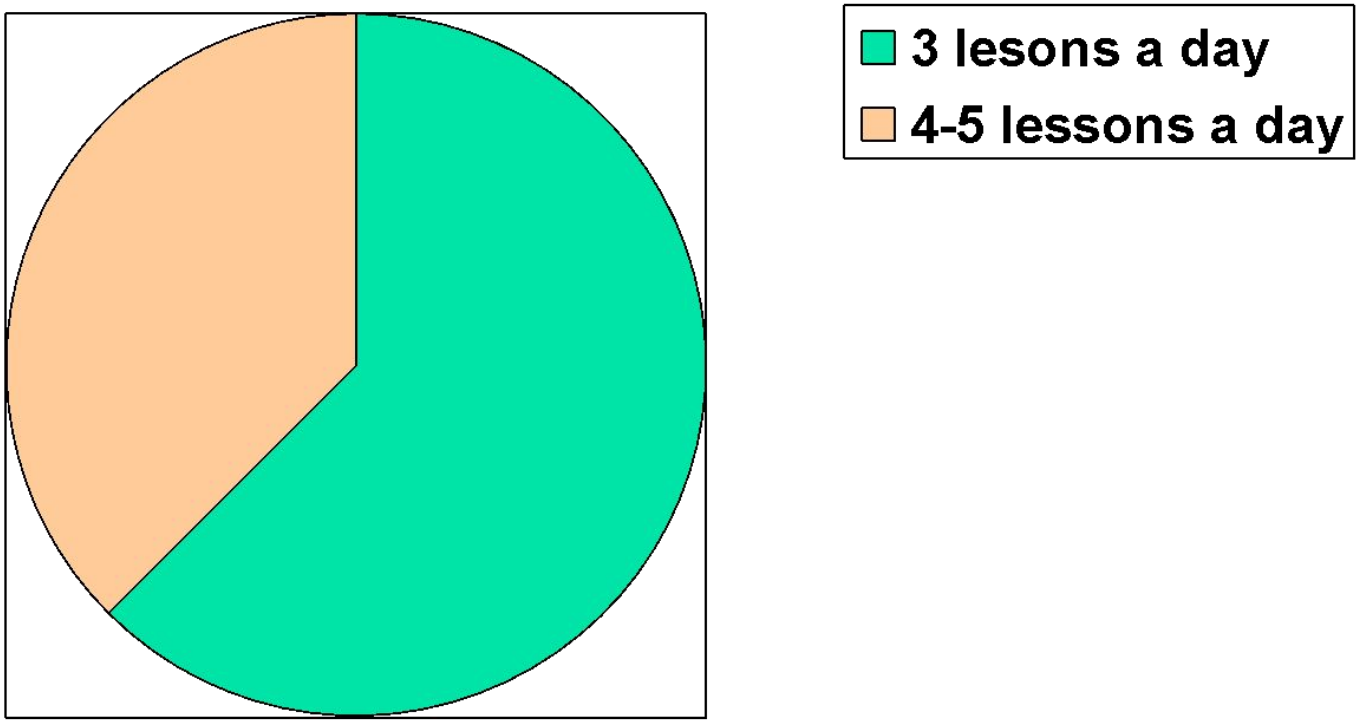


Our Survey:
Will children go to school?



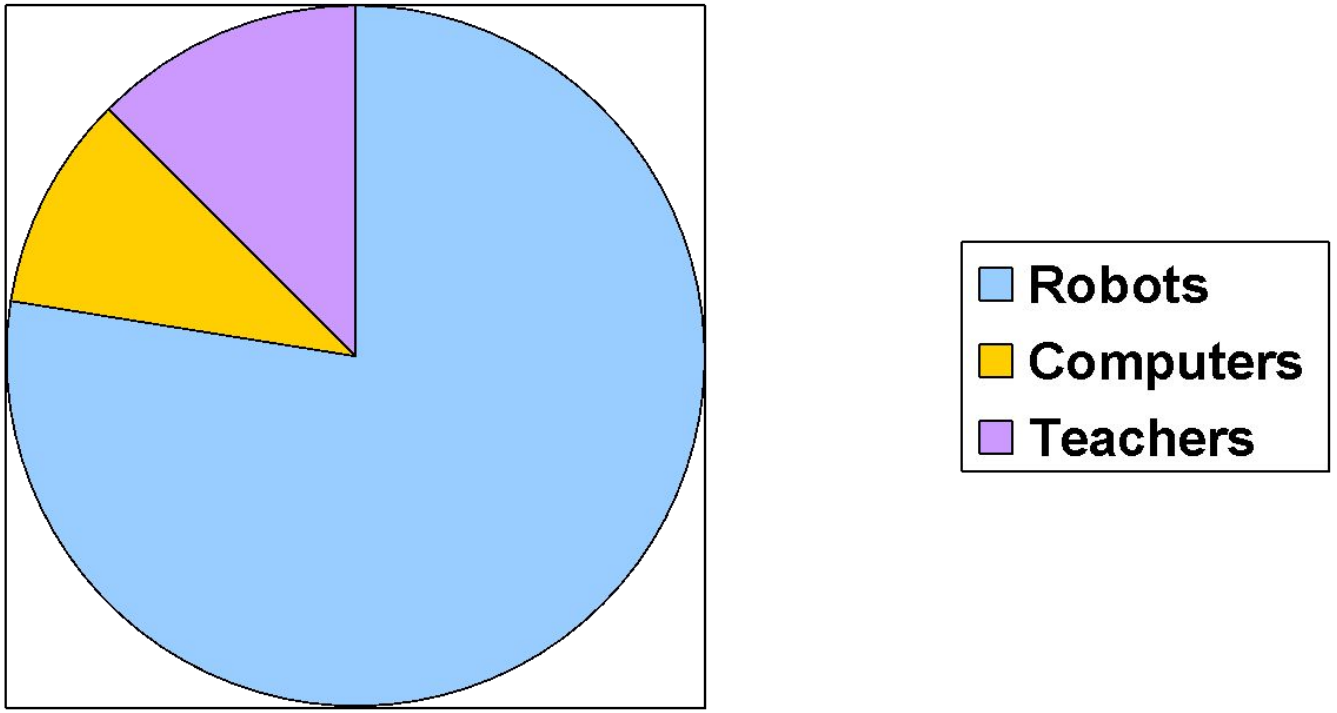
Our Survey:

How many lessons a day will children have?



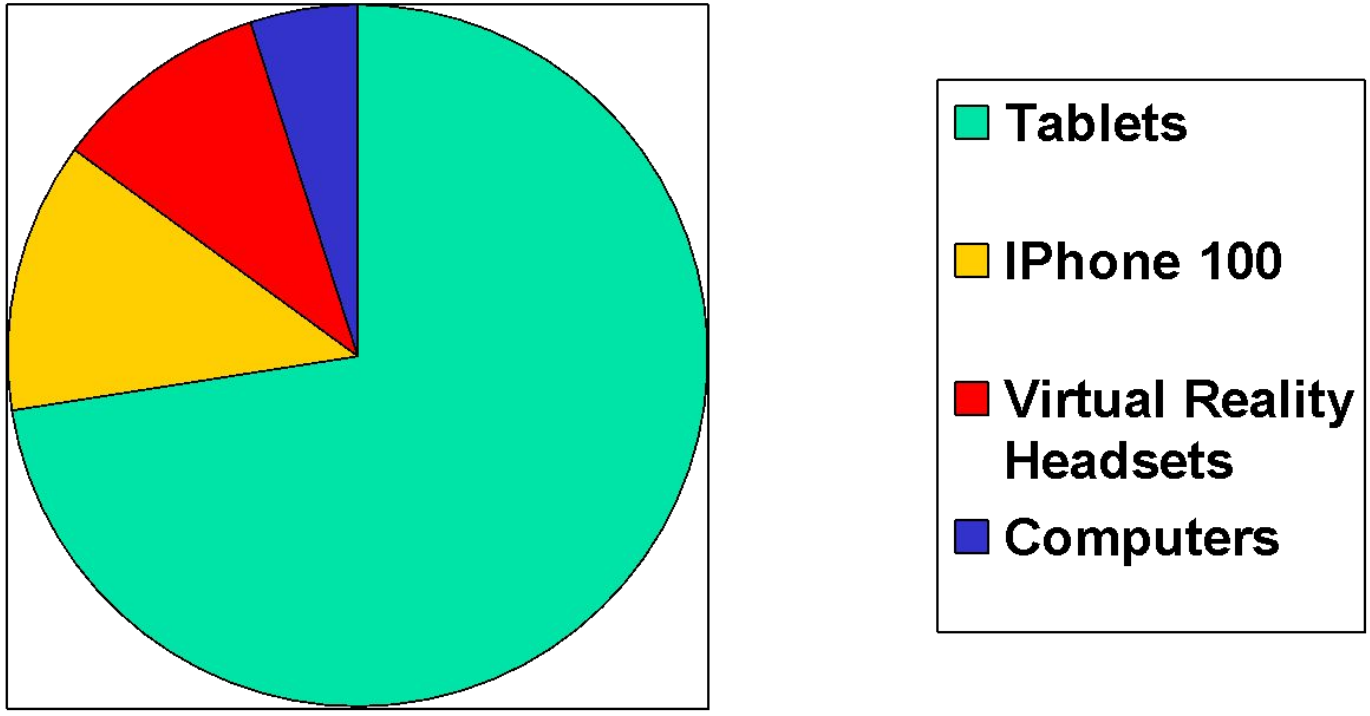
Our Survey:

Who will teach children in the future?



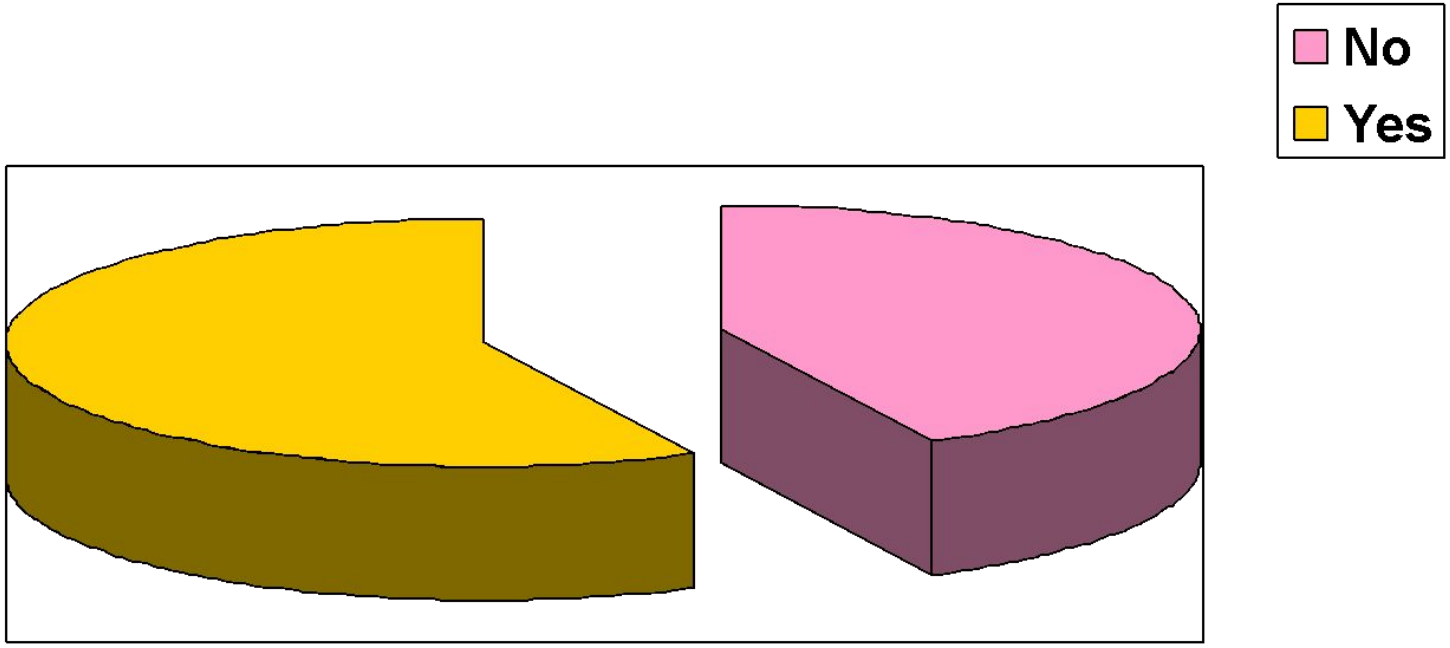
Our Survey:

What devices will be the most popular in the future?

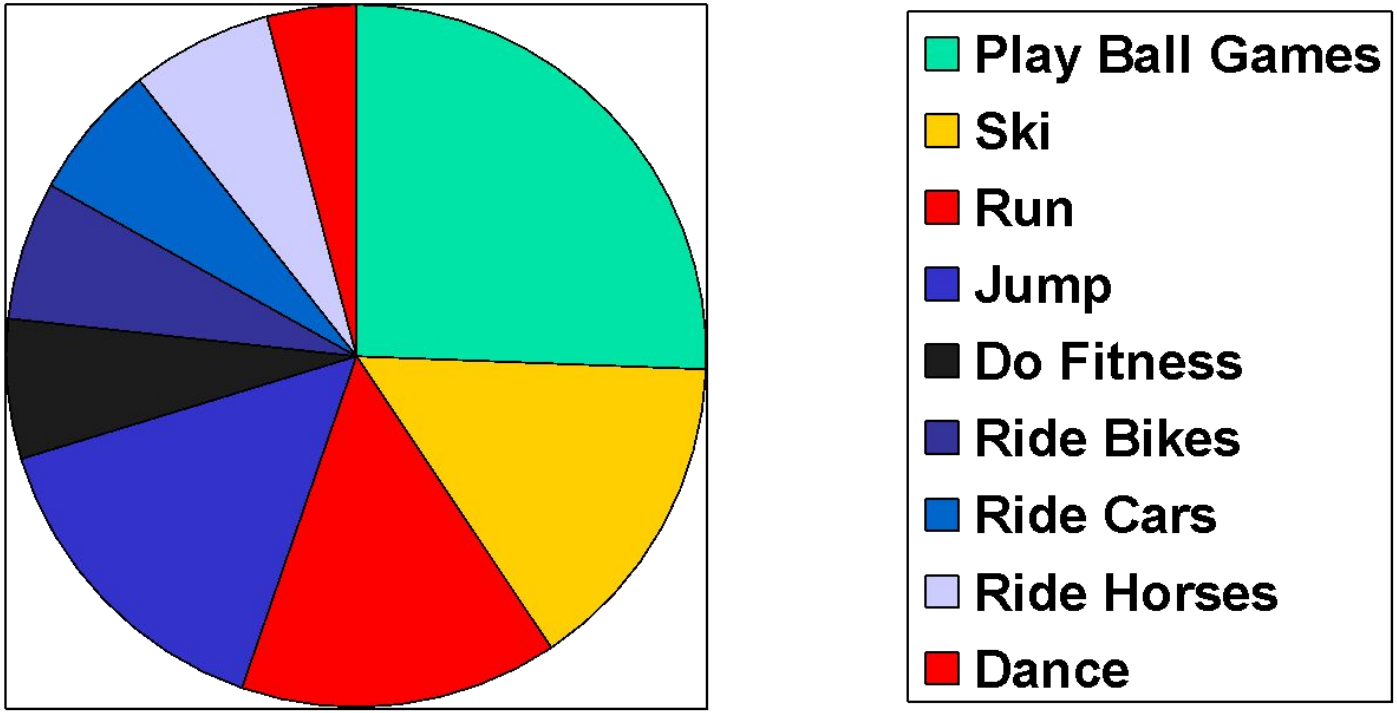


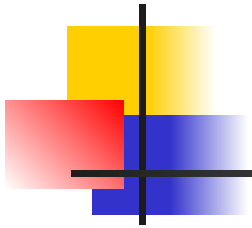
Our Survey:

Do you think there will be books in the future?



Our Survey:
What will children do on the PE lessons?





Thank you for attention!
