Work in pairs.

Think of the situation when you were successful.
It could be your achievements in studying, sport, relations
with people, etc.

What traits of your character helped you to do that?
Tell you partner about it.

You can use some phrases:

Once I decided...

At first I couldn't do that because...

But I kept on trying...

And one lucky day the success came: I...

I believe I managed to do that owing to ...

Look at the picture. Do you know what that means? Let's make some guesses!

Now let's check whether we were right. Watch the video and then say what the pictures mean.

Now let's watch it once again. Then say whether the statements are true or not

- You don't necessarily need to love what you do
- Work for rich and successful people is always hard and boring
- You should focus yourself to one thing
- Never let anyone to push yourself to the limits
- Many successful people are really shy
- Successful people never have self-doubts
- Every person can be creative
- Practice is the best way to improve
- Successful people don't serve anyone else, they serve only themselves
- Successful people never fail

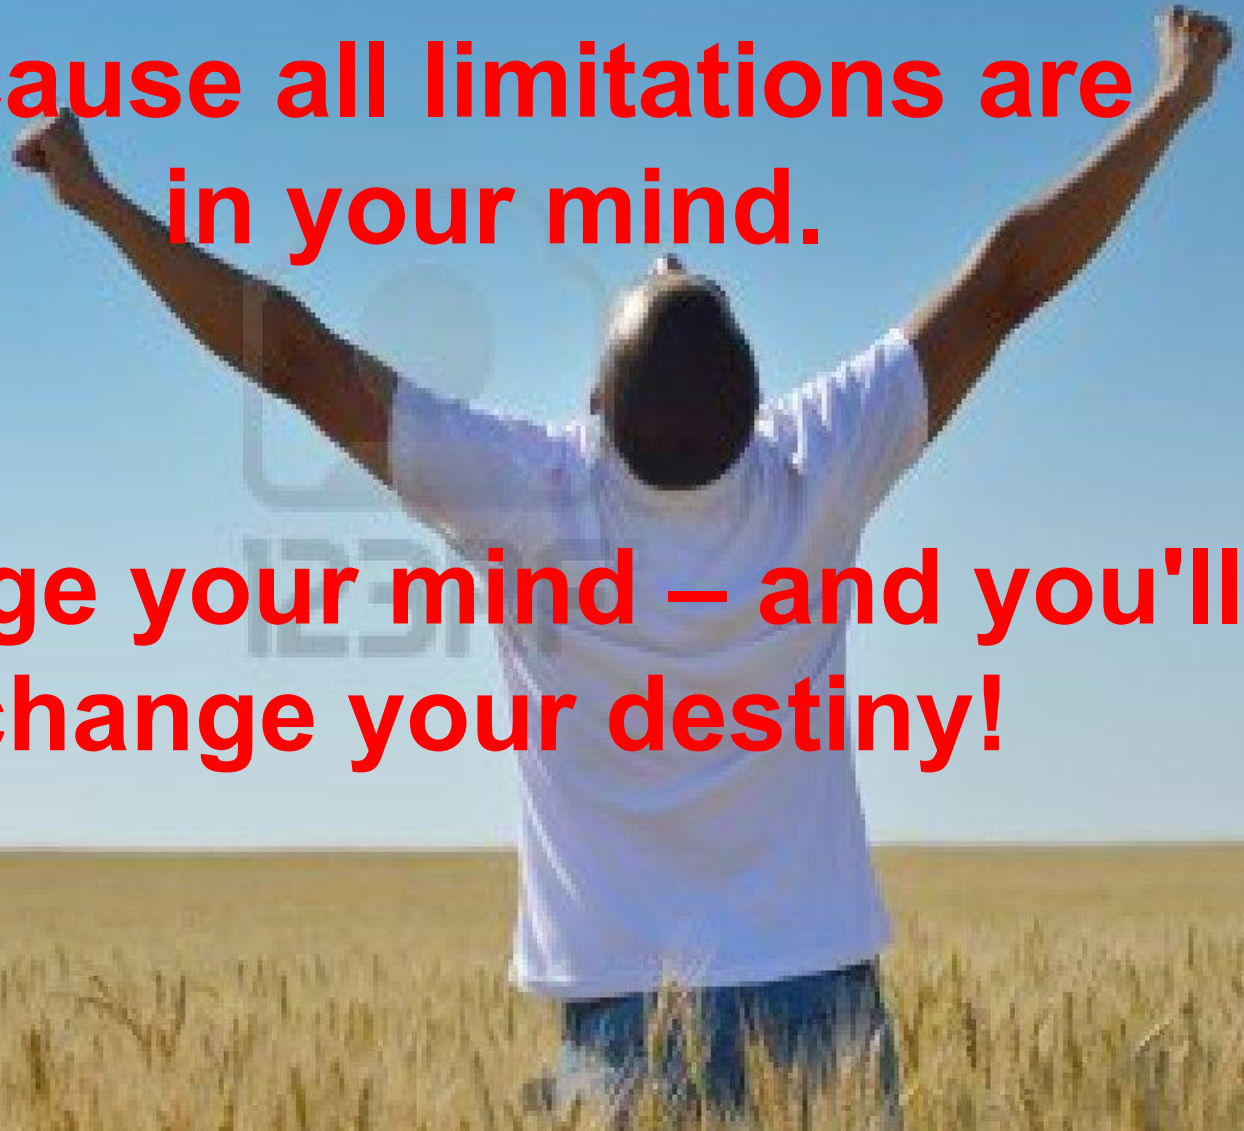

Have a look at the pyramid of success. What visible and invisible percentage rate of success do you see?

Believe in yourself!
Your dreams are achievable
because all limitations are
in your mind.

Change your mind – and you'll
change your destiny!
