Since 1970, cameras are improved electronically, and in 1988 the company «Fujifilm» released the first digital camera.

Photos become a fixture of our time, and most cameras have long ceased to be even a separate subject, they are equipped with tablets

" We know that we renew memories. It is possible that we coordinate our impressions of events with photos that we have done ourselves or someone else, "- says Kimberly Wade

An ornate, symmetrical decorative border in a light gray color, featuring intricate scrollwork and floral motifs, framing the central text. The border is set against a dark gray background.
