

**MUSIC - RaP**

**A rapper is called a rapper, or a more general term MC. Like jazz and reggae, it is traditionally considered "black music."**

**How did rap come  
about?**

# RAP RAP RAP

Rap in its modern form appeared in the 1970s among African Americans in the Bronx, where it was "exported" by visiting Jamaican DJs. In particular, the ancestor of rap is called DJ Kool Herc. They first read rap not for commercial purposes, but for fun, and did it at first mostly DJs. These were simple rhyming verses addressed to the audience.

RaP

A piece of video clip in the  
style of rap

The background features a series of parallel diagonal stripes in various shades of gray and black. Interspersed among these stripes are several bright pink lines of varying thicknesses, creating a dynamic and modern aesthetic.
