

# Problem of the Oil reserves

*And possible way to solve it*

## • Plan

- Introduction
- Problem statement
- Possible solving of the problem
- Conclusion

# General Oil consumption

***And what should we do to  
compensate it***

One of the first Oil fields

# What was before and what is now?

*Dry stats*

So, what about  
Oil Importance?

# Oil importance

Oil used as:

- Fuel for **transport**
- **Road** paving material
- Fuel for **heating**

Also **aviation**, **farming** and **army** depends on Oil too

Oil is used in production of **plastic** and **polymers**, without which we can not even make a **clothes**

# What about energy?

# Energy

Energy, generated by Oil produced in one year is equivalent to energy, generated by 52 atomic power stations in 50 years!

How we can reduce the Oil  
consumption?

How we can reduce the Oil  
consumption?
