

MY ACTION PLAN «GETTING READY FOR THE FUTURE»

Done by
Egor Zharikov
Form 9a

My ambition

- I want to get a higher education, that's why I am going to go in the 10th form. After school I wish to enter the university. It is my dream. At the university I am going to get a language education because I am fond of foreign languages.

My experience

- Up to now I have already been learning the English language for 8 years. I can say that my English skills are quite good. Also I study English with a private teacher which helps me a lot. I practice my English in the Internet through chatting with foreign students.

My skills

- As for my skills, I can say that I am good at translating simple texts. I am able to explain some topics for weaker pupils. Lately I have started to train hard on my English grammar. I wish to upgrade my skills in different languages all my life, because language is a necessary thing for the future employment.

I need to...

- ▣ I think I need to improve my English skills. Yes, I agree that I have to study the English language more. I want to practice my language qualifications in real life, to try to speak more, preferably with native speakers.
