

ENVIRONMENTAL PROTECTION MEASURES TAKEN BY YOUR CITY AUTHORITIES

- ▶ Environmental protection is a set of measures aimed at preserving the wealth of natural resources, reducing the negative impact of human factors on the environment, and preventing air, water, and soil pollution.

Nature protection is assigned to special services: they monitor the quality of the environment, collect information about sources of pollution, and monitor the state of the soil, water, and atmosphere.

- ▶ Wasteless technologies will Help reduce the level of negative human impact and improve the environmental situation. Reducing the amount of harmful industrial emissions due to a set of measures in the technological processes of processing raw materials and finished products.
- ▶ Creation of special equipment and environmental protection enterprises for waste control and control.
- ▶ Chemical and technological methods. A system of devices with communication flows installed between them, for processing raw materials into products.

ENVIRONMENTAL PROTECTION MEASURES:

Sources of Water Pollution

- ▶ cleaning water resources
- ▶ measures to reduce noise
- ▶ vibration
- ▶ ultrasound
- ▶ infrasound
- ▶ air purification from harmful gases
- ▶ proper storage of toxic and radiation waste
- ▶ waste separation during recycling for recycling

PASSIVE WAYS:

Sperrbereich
Kein Zutritt
Vorsicht Strahlung

Ortsdosisleistung max. 35 µSv/h

Datum: 13.08.2009 Name: [signature]

- ▶ Active methods eliminate the source of negative impact. Before minimizing the formation of harmful waste, it is necessary to assess its level, concentration, and volume. State and government intervention is not enough. The acute problem of negative impact on the environment is the responsibility of the entire population of the earth. People should be aware of the principles of recycling and reuse of industrial waste. Be able to apply simple ways to preserve and protect the environment — planting trees, proper waste management, and avoiding motor transport.
