Computer

- Lately computers have filled our life. Now they are almost in evry family. We have got used to them and we do not imagine our leisure without this miracle-machine.

What is the Internet?

- The Internet is not only the assistant in daily work, it is also the other world in which there are mail boxes, libraries, photo galleries, games, shops. On the Internet people can travel to different cities, visit different places, communicate with each other.

The set of the sites is intended for viewings of videos and movies in online the mode. On huge open spaces of the Internet it is possible to find any music, to listen to it and if there is a desire to download.

You can found everything in the Internet . It is part of our life.

Internet-is it important for us?

- Nowadays there are many different popular social networks where you can communicate with your friends and relatives. The Internet in the 21st century has become something more than just a network. For many people it is a life.

Internet-good or bad?

- On the one hand the Internet is a very good and useful thing. And on the other hand it has many disadvantages: the waste of time, money, it is bad for health. Many teenagers spend a lot of time sitting at the computers and spoiling their eyes.

социальные сети для общения

The Internet is a prospering means of communications, it is very brighter and more useful, than the others. The person who at least once suffered advantages of the Internet, more will never refuse its use.
