Problems of GTO standards in school.

- The history of the development of the GTO complex begins soon after the Great October Revolution. The enthusiasm of Soviet people and their desire for new things manifested itself in all spheres: in culture, labor, science and sport. In the history of developing new methods and forms of physical education, the Komsomol played the main role.

Problems of GTO standards in school.

- He initiated the creation of the All-Union Complex "Ready for Labor and Defense". After the collapse of the Soviet Union in 1991, the program was forgotten. But, as it turned out, the history of the origin and development of the GTO complex did not end there.

Problems of GTO standards in school.

- But, as it turned out, the history of the origin and development of the GTO complex did not end there. The revival occurred in March 2014, when the corresponding decree issued by the President of the Russian Federation.

Problems of GTO standards in school.

- What is the problem of GTO in school? Let's start with the fact that modern children are not interested in doing physical training both at school and outside school, yet this is due to the fact that there is not enough motivation to get a "some" badge or 1-5 balls for admission to higher education, provided that the student will go to a higher educational institution, just here plays a role that not all schools have a well-equipped hall for a physical education lesson, and there is no place for a cross. As a teacher of physical culture, I encounter the fact that parents give the child to the section, but there is no desire to be engaged, and after two weeks in this section the child gives up the occupation.

Problems of GTO standards in school.

- I think that in order for the children to want to pass the GTO standards, they need to be motivated properly.
