

Topic: Virtual Reality

About me :)

Name: Anastasia

Surname: Zhilina

Form: 10

Hobby: take photos

A Virtual Reality system can transport the user to exotic locations such as a beach in Hawaii or the inside of the human body.

At the moment it is necessary to put a large helmet on your head to see the simulated world and you have to wear a special glove on your hand in order to manipulate the objects you see there.

You can «look behind» computer— generated objects, pick them up and examine them, walk around and see things from a different angle.

Surgeons could plan operations by first «travelling» through the brain, heart or lungs without damaging the body.

In schools pupils could explore the Great Pyramid or study molecules from the inside.
