Books... I don't think that we can live without them.
I believe that books are with us all our life.

When I was a child my
parents read them to me.

Later I could read myself.

I like to read books about animals...

magic animals...

nature...

and children.

I like to get presents on my birthday.

I am happy if one of them is a book.

When I was 7 I was fond of reading too
but I preferred to read books about
travels.

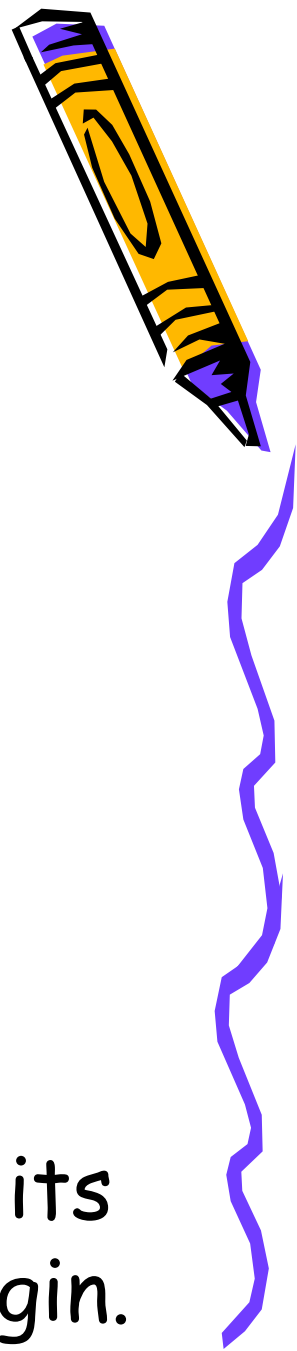

I travelled with the
characters of the stories.

I saw many interesting
places and learned a lot
of important facts about
other countries and
people.

Now I like to read about adventures.
My favorite book «The Girl from the Earth".

Its author Kir Bulychov. In it is told about the girl by name of Alice whom her father took in space travel behind rare animals.

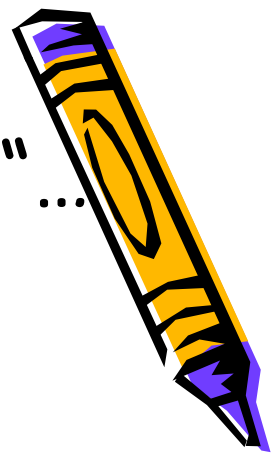

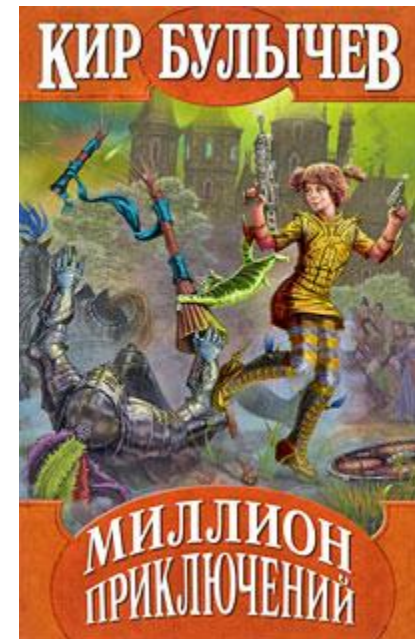

On this travel With Alice and its friends various adventures begin.

At Kir Bulychov has still books about adventures of Alice: "Birthday of Alice"...

"One million adventures"...

and others.

Our family has got
many books.

All the members
of our family buy
books and read
them.

Thanks for attention!
