

Class 2 Sources of Environmental Law of the Russian Federation

Lecturer: Mikhail Sergeevich Permillovskiy, Docent
of the Department of International Law and Comparative
Jurisprudence, Higher School of Economics, Management
and Law, NARFU

Class 2 Sources of Environmental Law of the Russian Federation

1. The concept of sources of environmental law.
2. The constitutional basis for the protection of the environment.
3. Federal Law "On Environmental Protection", a general characteristic.
4. Environmental legislation.
5. Secondary legislation as sources of environmental law.
6. Legal acts of subjects of the Russian Federation, acts of local governments.

1. The concept of sources of environmental law

Sources of environmental law - the normative legal acts containing norms which regulate relations in the sphere of interaction between society and nature.

Custom and the decisions of the courts are not a source of environmental law.

Features of sources of environmental law (legal acts):

- a) an objective form;
- b) approved by the authority;
- c) official publication.

Features of the sources of environmental law :

- They are taken at the federal and regional levels, because it is the joint jurisdiction of the Federation and its subjects;
- The legal norms of environmental law are situated in different branches of law - along with a special legislation on the environment, as in acts of civil, constitutional, business, criminal and other legislation.

According to the legal force:

Federal sources of law:

- The Constitution of the Russian Federation;
- International treaties generally recognized principles and norms of international law;
- Federated contracts;
- Federal constitutional laws;
- Federal laws;
- Acts of the President of the Russian Federation (decrees, orders);
- Acts of the Government of the Russian Federation (regulations and orders);
- Normative legal acts of federal departments and agencies

Regional and local regulations:

- Constitution, statutes of subjects of the Russian Federation;
- Laws of subjects of the Russian Federation;
- Acts of heads of subjects of the Russian Federation;
- Acts of the executive authorities of subjects of the Russian Federation;
- Acts of local self-government.

Local regulations

2. The constitutional basis for the protection of the environment

Constitution plays a major role.

Some provisions of the Constitution directly focus on environmental relations (Art. 9, 36, 42, 58, 72):

- "land and other natural resources are used and protected in the Russian Federation as the basis of life and activity of the people living in the area."
- a multitude forms of ownership of natural wealth
- a private ownership of land. Owners possess, use and dispose of natural resources freely.

2. The constitutional basis for the protection of the environment

Some provisions of the Constitution directly focus on environmental relations (Art. 9, 36, 42, 58, 72):

- the right of everyone to a favorable environment, reliable information about its condition and to compensation for damage caused to health or property by ecological violations
- the duty of each person to preserve nature and the environment, and care for natural resources

The Constitution has rules that govern environmental relations indirectly (Art. 1, 2, 7, 8, 17-19, 45-48, 57).

- the concept of "decent human life" includes environmental components
- responsibility of officials for concealing the facts and circumstances that pose a threat to life and health
- and others

Issues that are regulated at the level of the state (Article. 71)

- regulation and protection of human and civil rights;
- federal and state property and its management (in relation to natural resources and other objects related to this sphere);
- establishing the principles of federal policy and federal programs in the field of environmental development of the Russian Federation;
- nuclear energy, fission materials;
- production of poisonous substances, drugs and the use thereof;
- determination of the status and protection of the state borders, territorial waters, air space, the exclusive economic zone and the continental shelf of the Russian Federation.

Subjects of Russia together with the state authorities can address issues (Art. 72):

- possession, use and disposal of land, mineral resources, water and other natural resources;
- delimitation of state property (with respect to natural resources and other objects relevant to the subject field);
- environmental protection and ecological safety;
- specially protected natural territories;
- implementation of measures on combating catastrophes, natural disasters, epidemics, elimination of their consequences;
- land, water, forest legislation, legislation on subsoil and environmental protection;
- protection of native habitat and traditional way of life of small ethnic communities.

3. Federal Law "On Environmental Protection", a general characteristic.

- The law is the main source of environmental law in a legal state. All other acts **must comply with the law.**
- The environmental relations shall be governed by the **international treaties of the Russian Federation, the land, water, forestry legislation, the legislation on sub-soil, animal world, other legislation** in the field of environmental protection and use of natural wealth, and to some extent by the **legislation on the sanitary and epidemiological well being of the public and the legislation on health protection.**

Federal Law of 10 January 2002 "On
Environmental Protection" (last update 21/07/14)
