

SAT ESSAY

BY ZHAZIRA KARABALAYEVA

#1: AN INTRODUCTION

The first impression the grader will have of your writing is your essay introduction. Don't just jump right into discussing argumentative techniques — introduce your analysis with a statement (thesis statement) of what the author is arguing in the prompt.

WHAT IS PROMPT?

Prompt is the text you have to analyze.
Yesterday, our prompt was the text
“Air-Conditioning Will Be the End of Us”

SAT ESSAY IS NOT A TYPICAL ONE

SAT essay graders **do not care what your opinion** is on the issue. They care that **you understand and explain how the author argues his/her point.**

The SAT essay task is designed for you to demonstrate that you can **analyze the structure of an argument and its affect on the reader** with clear and coherent reasoning.

INTRODUCTION

1) As a matter of fact, climate change, or global warming, has been of the utmost concern worldwide. That being said, air-conditioning has been an unseen contribution to this serious problem. Eric Klinenberg, in his article “Viewpoint: Air-Conditioning Will Be the End of Us”, addresses the urgency to reduce the dependence on air-conditioning, with the aid of allusion to a current situation, humorous tone and clear reasons and examples.

2) Through consideration of quantitative data, exploring possible counterarguments to his position, and judicious use of striking phrasings and words, Klinenberg strengthens both the logic and persuasiveness of his argument that Americans need to greatly reduce their reliance on air conditioning.

2) Through consideration of quantitative data, exploring possible counterarguments to his position, and judicious use of striking phrasings and words, Klinenberg strengthens both the logic and persuasiveness of his argument that **Americans need to greatly reduce their reliance on air conditioning**.

SPECIFIC EXAMPLES THAT SUPPORT YOUR POINT

To support your thesis, you'll need to draw on specific examples from the passage of the techniques you claim the author uses. Make sure to provide enough information for each example to make it clear how it is relevant to your thesis - and stop there. No need to paraphrase the entire passage, or explain why you agree or disagree with the author's argument - **write enough that the reader can understand what your example is and be done.**

BODY 1

Klinenberg presents a common scene from daily life to start off the argument -- a gentle reminder from his utility provider to use air-conditioning wisely. He mentions the advice of his utility provider to the problem to “wisely” use air-conditioning. The word “wisely” is enquoted in the passage in order to add a sense of humor to the piece of writing and to somewhat criticize this advice, as well as the way Americans use air-conditioners. The word “ineffectual”, meaning ineffective, implies that try as one might, one hardly can persuade and change the tendency and the way people use air-conditioners. To prove his point, Klinenberg provides some factual information that “Today Americans use twice as much energy for air-conditioning as we did 20 years ago” and emphatically, “more than the rest of the world’s nations combined”. He strongly stresses the reliance American people on air-conditioners. He draws the readers’ attention by using a strong, quite informal for an article, word: “dumb”. He shows his disapproval to the way Americans deal with the problem of the effect of air-conditioning on climate change.

He strongly stresses the reliance American people on air-conditioners. He draws the readers’ attention by using a strong, quite informal for an article, word: “dumb”. He shows his disapproval to the way Americans deal with the problem of the effect of air-conditioning on climate change.

EXPLANATIONS OF THE EXAMPLES THAT SUPPORT YOUR POINT

It isn't enough to just summarize or paraphrase specific excerpts taken from the passage and call it a day. In each example paragraph, you must not only include details about an example, but also include an explanation of how each example demonstrates an argument technique and why it is persuasive.

BODY 1

Klinenberg presents a common scene from daily life to start off the argument -- a gentle reminder from his utility provider to use air-conditioning wisely. He mentions the advice of his utility provider to the problem to “wisely” use air-conditioning. The word **“wisely”** is enquoted in the passage in order to add a sense of humor to the piece of writing and to somewhat criticize this advice, as well as the way Americans use air-conditioners. The word **“ineffectual”**, meaning ineffective, implies that try as one might, one hardly can persuade and change the tendency and the way people use air-conditioners. To prove his point, Klinenberg provides some factual information that **“Today Americans use twice as much energy for air-conditioning as we did 20 years ago”** and emphatically, **“more than the rest of the world’s nations combined”**. He strongly stresses the reliance American people on air-conditioners. He draws the readers’ attention by using a strong, quite informal for an article, word: **“dumb”**. He shows his disapproval to the way Americans deal with the problem of the effect of air-conditioning on climate change.

A CONCLUSION

The conclusion should **restate your thesis and briefly mention the examples you wrote about in your essay (and how they supported your thesis)**. If you haven't done it already in your essay, this is NOT the place to write about a broader context, or to contradict yourself, or to add further examples you didn't discuss. End on a strong note.

- 1) In conclusion, Eric Klinenberg uses allusion to a current situation, humor tone and clear reasons and examples so as to warn the audience to less rely on air-conditioning. Although air-conditioners enable us to bear the increasing heat, they are, in fact, contributing to climate change.
- 2) On the whole, author Eric Klinenburg delivers a logical and reliable argument for persuading the public to reduce their reliance on air-conditioning. It is through his utilization of many effective literary strategies that make the article deserve recognition and approval.

COMPARE INTRODUCTION AND CONCLUSION

As a matter of fact, climate change, or global warming, has been of the utmost concern worldwide. That being said, air-conditioning has been an unseen contribution to this serious problem. Eric Klinenberg, in his article “Viewpoint: Air-Conditioning Will Be the End of Us”, addresses the urgency to reduce the dependence on air-conditioning, with the aid of allusion to a current situation, humorous tone and clear reasons and examples.

In conclusion, Eric Klinenberg uses allusion to a current situation, humor tone and clear reasons and examples so as to warn the audience to less rely on air-conditioning. Although air-conditioners enable us to bear the increasing heat, they are, in fact, contributing to climate change
