

# How do mass media reports show the life of teenagers in the Russian Federation?

- \* Russian media on television shows teenagers from the bad side
- \* The media claims that most teenagers lead a poor lifestyle, smoke, drink and degrade. They often turn a blind eye to adolescent successes. Why? We do not know.

\*Every year, teenagers from Russia become winners at international competitions in physics, computer science, mathematics, etc.

\*The media often began to keep silent about any discrimination of teenagers in society. The minority, for this reason, is very suffering and cannot reveal its identity, its talents and skills, because no one can help them.

\*The Russian media has long ceased to tell the truth. They come up with news or distort the truth. We recommend not to watch the media on TV! :)
