

A thick black L-shaped frame is positioned around the text. It starts at the top left, goes right, then down, then right again, and finally down to the bottom right corner.

EDUCATION SYSTEM IN ITALY

Preschool

The educational program of preschool organizations is aimed at:

- acquaintance with the outside world;
- adaptation in the team;
- enrichment of vocabulary and mastery of rhetoric;
- physical development of the child;

School

The school system in Italy is different from the schemes adopted in most European countries. Education is divided into three stages:

- elementary grades:
children 6-11 years old;
- junior high school:
adolescents 11-14;
- high school: young people
14-19.

Only the first two steps are required.

Primary School

Children are taught the basics of arithmetic, reading, literacy, vocals and drawing. At the request of parents, additional classes on the basics of religion can be introduced. At the end of primary school, students pass exams, according to their results they receive a certificate and are transferred to the next level.

high school

The three-year course includes classes:
Italian and foreign languages;
math stories;
chemistry;
geography;
art;
biology;
technology.

At the end of each year, exams are passed, but no assessment is made - the results are set on the "passed or not passed" system. Upon completion of the secondary school stage, state exams are required in all subjects. In languages and mathematics tests are in writing, in other disciplines - in oral.

old school

When moving to high school, the student must decide whether to combine education with vocational training or study in the usual school curriculum and prepare for university entrance.
