READING

The most important purpose of the book is to preserve the knowledge accumulated for centuries, and pass them on to future generations. This made possible the rapid progress of mankind in the last century in science. Most of the scientific discoveries done on the basis of the previously accumulated and systematized the information, the results of experiments from all over the world.

The knowledge we get from books, allow us to move forward, not wasting time on finding something that already someone known. The book we owe the fact that today you can enjoy the masterpieces of ancient literature. Communicate with the book helps a person to evolve and improve. After all, in order to understand the meaning that the author seeks to convey to the reader, it is necessary to read thoughtfully, carefully, to connect their own experience to be able to analyze information

A black and white photograph of a rectangular sign with a thick black border and a white, dotted background. The sign is supported by two vertical metal poles. The text 'THE END' is written in large, bold, black, sans-serif capital letters across the center of the sign. The background of the entire image is a dramatic, cloudy sky.
