

# London Eye

The London Eye is a giant observations wheel.  
It is located on banks of the river of the Thames in London.

The London eye was built in 1999.  
The wheel is 135 metres high.  
It has a diameter of 120 metres.

London eye has 32 cabs for the passengers.  
These cabs are very comfortable. 25 passengers are placed in one cab.

The London eye takes  
30 minutes to rotate

The London eye is the tallest Ferris wheel in Europe.  
It is the most popular tourist attraction.

Beautiful panorama opens from the London Eye.  
You can see Westminster Palace, Big Ben and other famous places.

At night the London Eye looks fantastic.

It is the symbol of modern Britain.

I dream to take a ride on the London Eye.  
It will be very interesting to see London some day!

**Thanks for the attention !!!**
