

# ***THE INFLUENCE OF TRILINGUALISM ON THE NATIVE LANGUAGE***

# Why we need to learn English language?

lifting of one nation through humiliation of other nation is unacceptable.

is why I am talking about trilingualism,"he said. Kazakhstan has to know its official language – the Kazakh language.

The Russian language is the language of our big neighbor and one of the six UN languages. This language enabled us to access the great literature, the great culture.

That is why we should not forget it, or put it aside, every language is wealth for a person," the President said. "We need the English language to enter the global arena. Out of 10 million books published in the world 85% are in English. The science, all the new developments and information - they are all in English nowadays," said the President.

He added that there were 3500 foreign companies in Kazakhstan and the local citizens needed English to communicate with them and use the equipment they bring into the country.

Kazakh is the state language we all must learn it and preserve it

The Russian language is the language of integration with our immediate neighbors, the language of interethnic communication

Without the English language, our children will not be able cope in the future. Technology, science and innovation, all will be in English. We think that English should be taught from the first grade

Some scholars suggests that the most effective ages to start learning languages are 5 and 6, they claim that the first language should be fully developed before adding other languages.

# Nazarbayev Intellectual schools

We believe that all three of these languages - Kazakh, Russian and English - have an important role to play in the future of Kazakhstan; therefore fluency in three languages is a central aim of the school. Our students will need high-level language abilities to succeed in higher education and beyond.

According to our model, some subjects are taught in Kazakh, Russian or English, regardless of the medium language of teaching. Furthermore, in the framework of extra-curricular training, students can additionally study the material in any language
