

ABOUT MYSELF

Let me introduce myself

*My name is
Sonya Minkova*

I was born in Ryazan in 1999

All my life I have lived in the Ryazan region, the village of Aleksandrovo

*My life is very diverse.
I have got some hobbies*

I like...

to play the
guitar

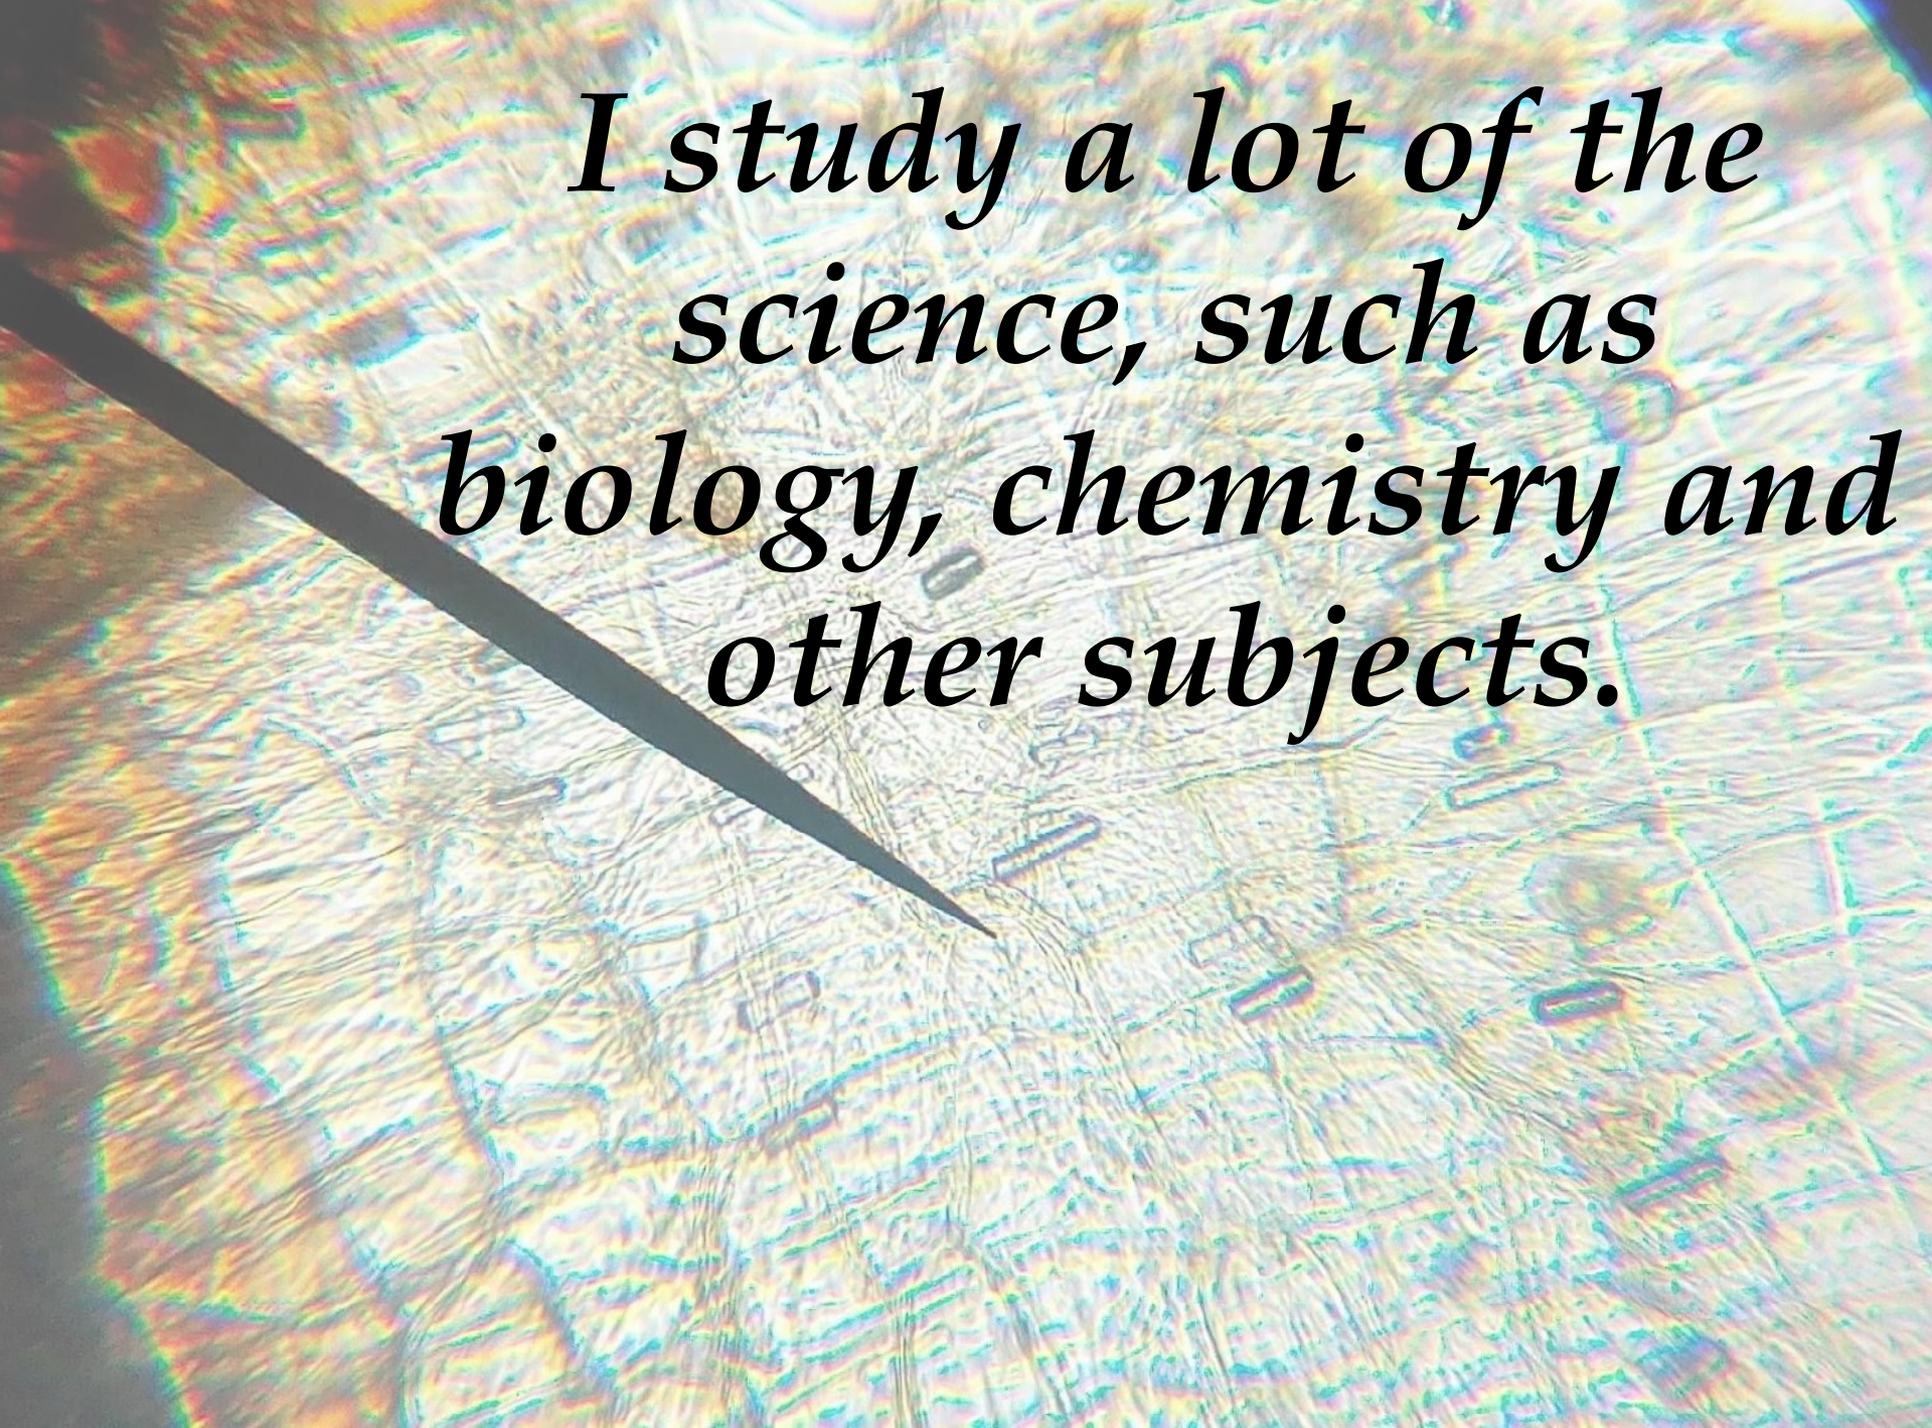

to take
photos

In 2005-2016 I went to school

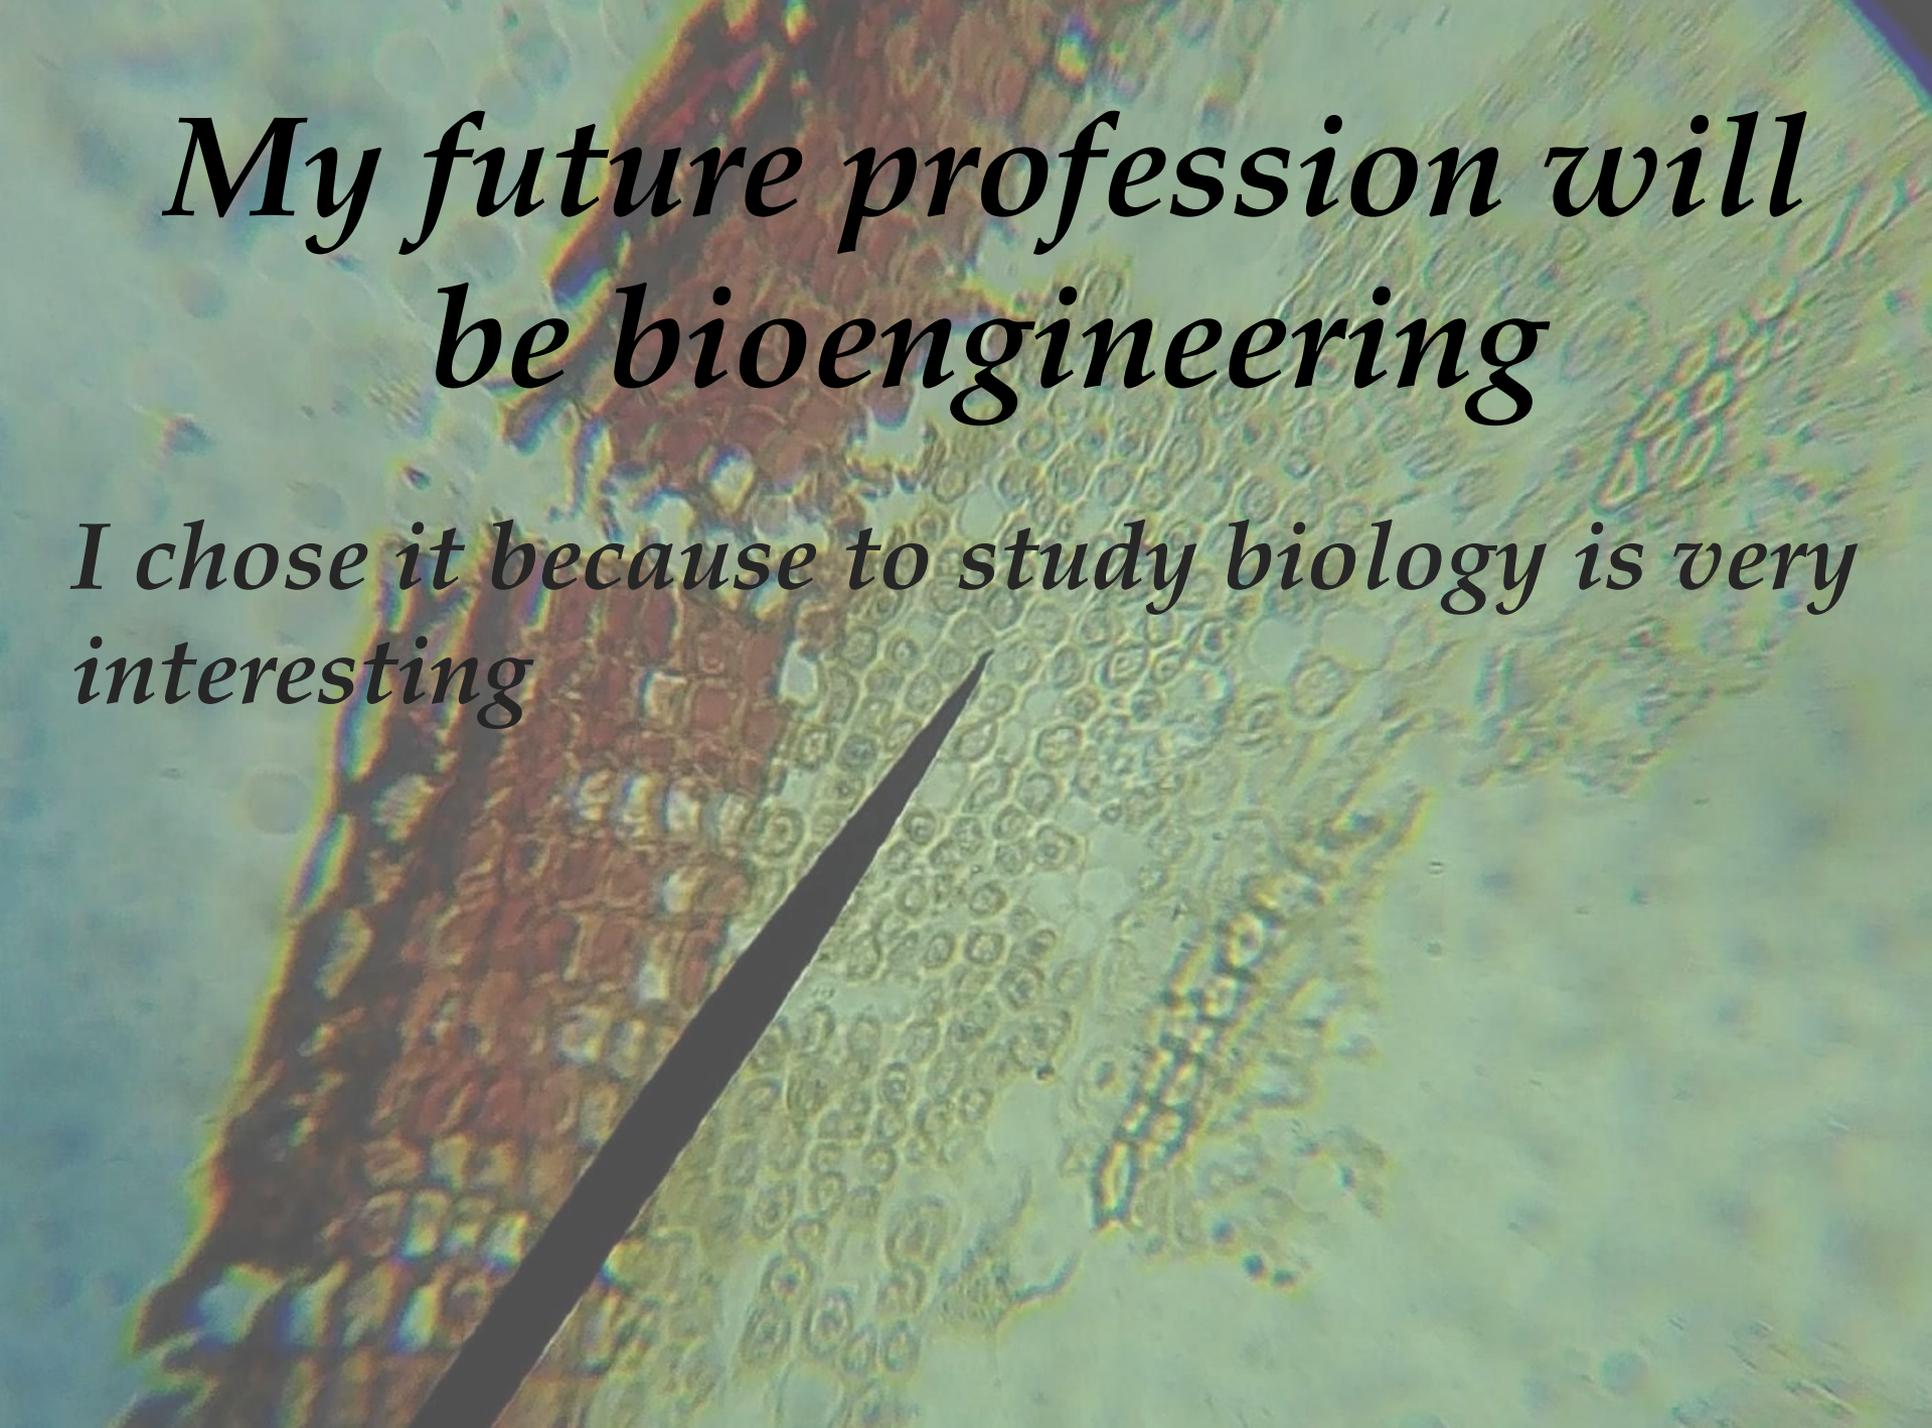

*Now I am a student of Ryazan State
University named for S. Yesenin*

A microscopic view of plant tissue, likely a leaf cross-section, showing various cells and structures. A prominent black arrow points from the top left towards a specific cell in the lower middle of the image. The text is overlaid on the upper right portion of the image.

*I study a lot of the
science, such as
biology, chemistry and
other subjects.*

A microscopic image of plant tissue, likely a cross-section of a stem or root, showing various cellular structures. A prominent diagonal line, possibly a vascular bundle or a specific tissue layer, runs from the bottom left towards the top right. The background is filled with a dense network of cells, some appearing as small, rounded structures. The overall color palette is a mix of light green, yellow, and brown, with some blue and purple highlights, suggesting a stained or processed sample.

*My future profession will
be bioengineering*

*I chose it because to study biology is very
interesting*

A microscopic image showing a dense field of cells, likely a tissue culture or a smear. The cells are stained, with prominent red and blue/purple colors. A thick black diagonal line runs from the top-left towards the bottom-right, pointing towards the text. The text is overlaid on the right side of the image.

*I especially like
genetic
engineering and
virology*

And English is necessary for biology studying in more depth

- Because it is user for writing scientific articles and books.*
- So knowledge of English is necessary for a scientist.*

*Thank you for your
attention!*
