

KOFAX Transformation Modules 5

Module 2 – Product Overview

What is it?

Training Module Overview

- What is KTM?
- Structured, semi-structured and unstructured documents
- Classification, separation and extraction
- Kofax product differentiation
- Licensing
- Program Group components
- Integration with Kofax Capture

What is KTM?

- KTM is a classification, separation and extraction “transformation” product for Kofax Capture (a suite of custom module add-ons)
- Although somewhat new to Kofax Capture, the product was introduced as Ascent Xtrata Pro 3.0. The product has now been rebranded as Kofax Transformation Modules, and this version is a 5.x release.
- Supports classification and extraction of structured, semi-structured and unstructured documents.
- Platform for delivering pre-configured, out-of-the-box solutions
- Offers learn-by-example extraction as well as numerous other methods to automatically extract data from documents
- Invoice classification by image and instructions (rules).

Structured or Unstructured?

- KTM – Includes processing modules, a configuration application and several tools that work within Kofax Capture providing advanced document classification, separation, and extraction for structured, semi-structured and unstructured documents. It is optimized for invoice processing.

NOTE

JULY 23, 2003 GRANDVILLE MICKELSON
(Date) (City) (Date)

11450 GOLF LAKE WYOMING, WY 83418
(Property Address)

1. BORROWER'S PROMISE TO PAY
I, the undersigned, for a loan that I have received, I promise to pay U.S. \$ ****131,920.00 (this amount is called "Principal"), plus interest, to the order of the Lender. The Lender is GREENBRIDGE MORTGAGE SERVICES, LLC.

I will make all payments under this Note in the form of cash, check or money order.
I understand that the Lender may transfer this Note. The Lender or anyone who takes this Note by transfer and who is entitled to receive payments under this Note is called the "Note Holder."

2. INTEREST
Interest will be charged on unpaid principal until the full amount of Principal has been paid. I will pay interest at a yearly rate of 5.250%.
The interest rate required by this Section 2 is the rate I will pay both before and after any default described in Section 6(b) of this Note.

3. PAYMENTS
(A) Time and Place of Payments
I will pay principal and interest by making a payment every month.
I will make my monthly payment on the FIRST day of each month beginning on SEPTEMBER 01, 2003. I will make these payments every month until I have paid all of the principal and interest and any other charges described below that I may owe under this Note. Each monthly payment will be applied as of its scheduled due date and will be applied to interest before Principal. If, on AUGUST 01, 2033, I still owe amounts under this Note, I will pay those amounts in full on that date, which is called the "Maturity Date."
I will make my monthly payments to HOME MORTGAGE, INC., P.O. BOX 10304, DSB WYOMING, WY 83034-0304 or at a different place if required by the Note Holder.

(B) Amount of Monthly Payments
My monthly payment will be in the amount of U.S. \$ ****49.03.

4. BORROWER'S RIGHT TO PREPAY
I have the right to make payments of Principal at any time before they are due. A payment of Principal only is known as a "Prepayment." When I make a Prepayment, I will tell the Note Holder in writing that I am doing so. I may one designate a payment as a Prepayment if I have not made all the monthly payments due under the Note.
I may make a full Prepayment or partial Prepayments without paying a Prepayment charge. The Note Holder will use my Prepayments to reduce the amount of Principal that I owe under this Note. However, the Note Holder may apply my Prepayment to the accrued and unpaid interest on the Prepayment amount, before applying my Prepayment to reduce the Principal amount of the Note. If I make a partial Prepayment, there will be no changes in the due date or in the amount of my monthly payments unless the Note Holder agrees in writing to those changes.

Definitions

- **Classification** – Distinguishing between different Document Types and Form Types.
- **Separation** – Creating boundaries between individual documents in a batch. Documents may be single-page or multi-page.
- **Extraction** – The process of automatically lifting data from a document using rules or zones along with the output from a recognition engine (OCR, OMR, barcode, etc). This data usually is output to a database or document management application for later retrieval.

Some of KTM's Features Include...

- KCNS compatible
- Enterprise Option (High Availability) compatible
- Processes image (.tif) files
- 2 variations
 - Invoice Projects
 - Standard Projects
- Knowledge Bases
 - Generic and Specific Knowledge Bases
 - Country-specific
 - Based on “on-line learning”
 - Optional password protection
- “Professional” add-on available
 - Includes advanced page classification and trainable document separation using the special “Project Planner” configuration tool
- Other standard features
 - Database lookups
 - Regular expression support
 - Dictionary files
 - Table recognition
 - Scripting WinWrap Basic (similar to VBA)
 - Language-specific support in OCR (ABBYY Fine Reader, RecoStar, AEG, Kadmos)

KTM 4.0 – New Features

- Multiple instances of the KTM Server module
 - Classification and Separation
 - Extraction
- Document Review module
- Correction module: character-based correction
- Multiple instances of the KTM Validation module
- KTM Verification module
- Trainable Group Locator
- SQL Server support for statistics export
- Specific on-line learning for tables
- Page-level and zonal image cleanup
- Trainable Document Separation (Professional Version only)

KTM 4.5 – New Features

1. Manual anchors for field registration
2. Web Validation and Verification modules
3. Arabic OCR engine (right left)
4. Upgraded ABBYY OCR engine
5. Integrated A2iA engine for cursive text and check recognition
6. Database (SQL and ODBC) lookup utility
7. Metadata-driven application setup
8. Vendor Locator
9. Invoice Evaluator
10. Country-specific settings and generic knowledge bases
11. Purchase order line item matching

KTM 5.0 – New Features

- Document Routing
- Batch Restructuring
- Multi Processor Support
- Thin client enhancements
 - New Thin Client Correction
 - Enhanced Thin Client Validation
 - folder support
 - batch editing
 - multiple steps
- Enhanced Document Review Module
- Script support in Verification
- Miscellaneous other features
 - New simplified licensing

KOFAX
Transformation
Modules 5

Kofax Capture alone and with KTM Compared

Feature	KC	KTM	Notes
Functionality			
Classification - Image-based	Y	Y	Allows forms and non-content rich documents (e.g. checks, invoices, etc.) to be classified. Kofax Capture based on histograms developed from single sample images. KTM uses multiple reduced-scal, low res sample pages, allowing for variety within a form type.
Classification - Rules-based	Y	Y	Allows content-rich documents (e.g. correspondence) to be classified. KC relies on form identification zones in fixed locations. KTM matches words anywhere on a page.
Classification - Learn by Example	N	Y	Allows complex classification and is easy to extend.
Separation - Rules-based	Y	Y	Typically, only addresses simple separation schemes. KC relies manual separation, fixed pages, bar codes, patch coded and word(s) found in a fixed form ID zone. KTM classifies pages first and then separates based rules related to page classification.
Separation - Learn by Example	N	Y	The KTM Professional Add-on addresses complex, fully-automatic separation requirements based on trainable document separation (TDS) configurations.
Extraction - template-based	Y	Y	Useful for structured documents and forms or semi-structured forms where required data is in the same location every time.
Extraction - Free-form rules	N	Y	Required for semi-structured and unstructured documents.
Extraction - Learn by example	N	Y	Trainable extraction using pre-created or user-created, transportable knowledge base files. Pre-configured methods for invoices. User-created methods for other kinds of documents.
Automatic table extraction	Y (limited)	Y	Kofax Capture only returns OCR data for the first row of a table. All other rows must be manually keyed. KTM performs automatic table data extraction of ALL rows and is trainable.
Separate server instances for classification/separation and extraction	N	Y	KC offers a single Recognition Server module that may be used for simple classification, separation and extraction. KTM offers the option of two KTM Servers: one typically used for classification and separation and the second used for extraction.
Multiple instances of Validation	N	Y	KTM offers up to five instances of KTM Validation as well as a separate KTM Verification module.

- New simplified licensing
 - New base licensing scheme based on numbers of fields extracted
 - 5-Fields Extraction Base License
 - Unlimited Field Extraction Base License
- Both base licenses include
 - Layout and content classification
 - Fixed- and free-form extraction
 - Invoice header and amount extraction (GLs/IHL)
 - Keying modules (inc web clients)

- New simplified licensing
 - Add-ons
 - Table Extraction
 - Professional (Project Planner)
 - Additional OCR engines (Kadmos)
 - Check Recognition
 - Cursive Field Recognition
 - Cursive Full-Page Recognition
 - Arabic OCR
 - Invoice Add-On Pack (Vendor Locator & Invoice Evaluator)
 - Invoice Line Items Matching
 - Medical Claims Add-on Pack

• New simplified licensing

Name	Base / AddOn	volume / system	Classification		Extraction							Add Ons							Usage		
			Content	Layout	LIM Locator	Vendor Locator	Invoice Evaluator	Invoice-specific Group Locators	Table Locator	IHL	all other Locators	Keying Modules	Kadmos	Check Recog.	Cursive Recog.	Document Reader	Arabic	Thin Clients	Doc Sep	Medical Claims project	KTT development
KTM 5-Fields Extraction	Base	volume license	X	X				X		X	X										
KTM Unlimited Fields Extraction	Base	volume license	X	X				X		X	X										
KTM Table Extraction	add on	volume license							X												
KTM Professional	add on	volume license																	X		
KTM Keying Modules	add on	system license										X									
KTM Additional OCR Engines	add on	volume license											X								
KTM Check Recognition	add on	volume license												X

KTM Invoice Line Item Matching	add on	volume license			X																
KTM Web Server	add on	system license																	X		
KTM Medical Claims Add-on Pack	add on	system license																			X

Licensing – New “Mix & Match”

- New simplified licensing
- ‘Mix-and-match’ possible
 - Mixture of base license volumes for a single system
900k total volume = 300k 5-field extraction + 600k unlimited field extraction
 - Different volumes for add-ons possible
30k Table Extraction + 120k Arabic OCR

Program Group Components

KOFAX Transformation Modules 5

NOTE: In this example, 5 instances of KTM Validation have been installed. Project Planner (Professional Upgrade) has also been installed.

KTM Server

The Server may run as an application or as a self-starting Windows service. Up to 16 services may be used. It classifies, separates and extracts. With the Pro Upgrade, you may also want to run separate instances of the Server: one for classification and separation and one for extraction.

KTM Correction

The screenshot displays the 'Example Batch - Correction' window. It features a menu bar (Batch, Edit, View, Field, Options, Help) and a toolbar. The interface is divided into three main sections:

- Previous Field:** An empty text box.
- Current Field: CreditCardNum:** Shows a handwritten credit card number '5434001760307978' with vertical bars between digits. The first digit '5' is highlighted in yellow. Below it, the corrected number '5434001760307978' is shown, with the '6' highlighted in yellow.
- Next Field: CreditCardNum:** Shows a handwritten credit card number '154345611548827977' with vertical bars between digits. The second-to-last digit '2' is highlighted in yellow. Below it, the corrected number '5434561548827977' is shown, with the '2' highlighted in yellow.

The status bar at the bottom indicates 'Ready' and 'Folder: 1/1 (Example)'. The text 'DVR NUM CAPS' is also visible in the status bar.

The character-based Correction module allows for single-key correction of characters read at a low confidence level. This client Correction is a new feature in KTM 5!

For help, Press F1 Idle 00:45

The KTM Knowledge Base Learning server may run as an unattended application or a windows service. It accomplished sending documents “tagged” for online learning back to a pre-specified folder. It also instantly and dynamically updates Specific Knowledge Bases.

Knowledge Base Administrator

The screenshot displays the Knowledge Base Administrator application window titled "Kofax Transformation - Knowledge Base Administration - Project1S.fpr". The interface includes a menu bar (File, View, Go, Project, Tools, Help) and a sidebar with sections for "My Knowledge", "Tasks", and "Details". The "Knowledge Bases" section shows a table of existing knowledge bases:

Name	Protection	Last Modified	Sample ...	Type	Algorithm	Owner
<input checked="" type="checkbox"/> USStandard.kbo	No licen...	9/10/2008 12:...	976	Order d...	Generic	Built-In ...
<input checked="" type="checkbox"/> USStandard.kbi	No licen...	9/10/2008 12:...	1420	Invoice ...	Generic	Built-In ...
<input checked="" type="checkbox"/> USStandard.kba	No licen...	9/10/2008 12:...	1120	Amounts	Generic	Built-In ...

A "Create Knowledge Base" dialog box is open, showing the following configuration:

- Selected training folders:** <Default> (11)
- Path:** C:\Program Files\Kofax\Transformation\Proje
- Create with password protection
- Knowledge Base Types:** Amount Group (*.kba), Invoice Group (*.kbi), Order Group (*.kbo)
- Knowledge Base Algorithm:** Generic, Specific
- Knowledge Base Information:** Name: knowledgebase1, Description: (empty), Owner: (empty)

The status bar at the bottom left indicates "Ready".

The Knowledge Base Administrator is a standalone application that is used to build training sets and create knowledge bases for an already-existing KTM project.

OCR Server

The OCR Server allows you to create OCR output (including Xdocuments) outside of Project Builder and without having to process batches through the Kofax Capture workflow.

The screenshot displays the Kofax Transformation - OCR Server interface. The window title is "Kofax Transformation - OCR Server". The menu bar includes "File", "Process", "Options", and "Help".

XDoc Browser

The XDoc Browser provides direct access to the results of automatic processing on a document-by-document basis. It may be used for testing and demonstration.

The screenshot displays the XDoc Browser interface for a document named '000001FF.xdc'. The left pane shows a tree view of the document structure, with 'WordsOfLine' selected. The right pane shows the invoice content, including a header with 'Dki Semiconductor' and 'INVOICE', a table of invoice details, a table of items, and a footer with payment information.

Statistics Viewer

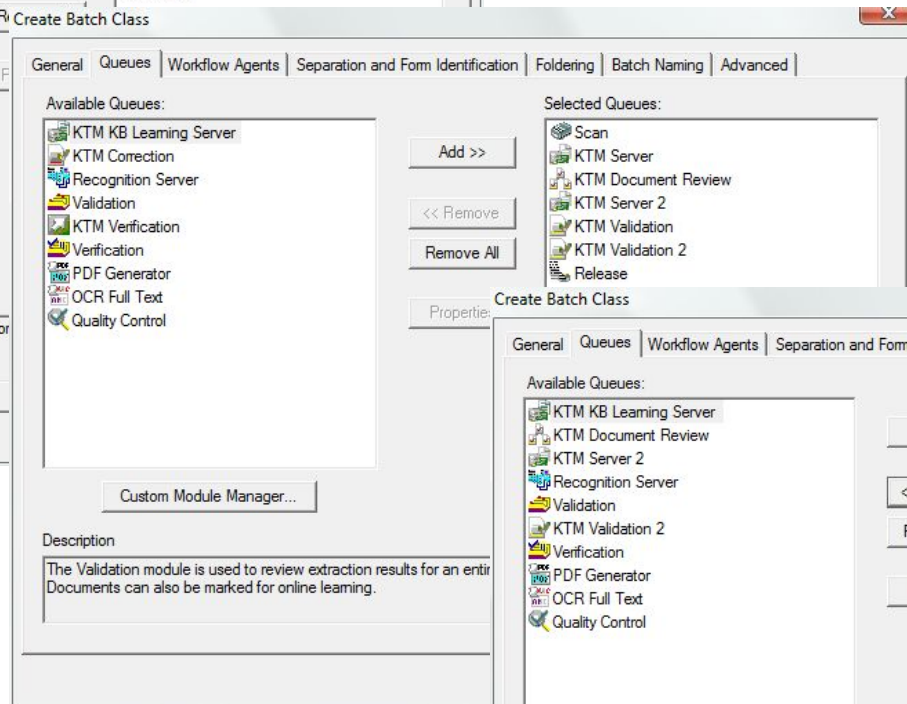

The Statistics Viewer allows you to view summary statistics of the results of automatic processing as you set up and modify your projects.

Kofax Capture Batch Workflow

Typical invoice processing solution

Typical free-form solution using page using advanced document separation

Typical fixed-form solution

Kofax Capture Integration

The image displays two overlapping software windows. The background window is 'Kofax Capture Administration', showing a tree view of document classes and a context menu for 'Invoices'. The foreground window is 'Kofax Transformation Modules - Synchronization Tool', which is in the 'Synchronize' tab. It shows a 'Classification Project' table with columns for 'Project' and 'Kofax Capture Form Type'. The table lists several projects like 'Continental Express', 'Dell', 'FedEx', 'Oki', and 'Pinpoint', each with a corresponding form type. To the right, there is a 'Kofax Capture Document Classes' tree view showing a hierarchy of document classes under 'Invoice'. At the bottom of the synchronization tool window, there are instructions for 'Step 1: Assign project classes to Kofax Capture form types', 'Step 2: Assign extraction fields to Kofax Capture index fields and define display fields for validation', and 'Step 3: Synchronize project classes and extraction fields with Kofax Capture'. Navigation buttons for 'Previous Step', 'Next Step', 'Cancel', and 'Help' are visible at the bottom of the tool window.

Step 1: Assign project classes to Kofax Capture form types
Step 2: Assign extraction fields to Kofax Capture index fields and define display fields for validation
Step 3: Synchronize project classes and extraction fields with Kofax Capture

For Help, press F1

Easy-to-use Synchronization Tool integrates KTM projects with Kofax Capture Document Classes and Form Types.
